

RED CHILLI

Fundamentals:

Today's Update:

- Steady sentiment witnessed in the Red Chilli spot market on Friday.
- Further correction in the prices is expected in coming days as overall the Chilli crop is in good conditions so far in all the key growing states and production is also expected to be higher in 2023 seasons.
- However, we expect good export demand for premium quality likely to support Red Chilli prices from lower levels.
- We suggest stockists and masala millers are likely to wait for price correction for fresh procurement. AgriWatch expects from mid-February they may start buying.

Previous Update:

- At Byadgi market in Haveri, Red Chilli Dabbi Dlx Local closed lower at Rs. 45000-54000 per Bags, down by 1.82 per cent from previous trading day. Total arrivals are at 111000 Bags, steady as against previous day's arrival. Red Chilli 5531 Best at Byadgi market ended weak at Rs. 15000-19000 per Bags, lower by 2.56 per cent from previous day's price level.
- Increasing new crop supply in the spot market put cap on prices.

- In Gujarat Jeera sowing area may go down 20 - 25%, however in Rajasthan area up by 10 - 12%, but yield may lower current year due to higher temperature earlier and currently frost situation in some areas. However, actual damage percentage may come after 7 to 10 days.

Previous Update:

- Lower supply reported as planters are expecting higher prices in coming days for releasing their produce.
- Current year Guatemala Cardamom production reported higher, around 40,000 MT. But for the best quality buyers are looking for Indian variety due to which bullish sentiment is expected in coming days.

CORIANDER SEED

Fundamentals:

Today's Update:

- Mixed sentiment was recorded in Coriander spot market on Friday.
- Anticipation of higher production this season keeping the trade participants away from the market, which is further weighing on prices.
- *As per AgriWatch estimates, Current year Coriander seed expected production would be around 4.43 lakh MT as compared to last year 3.10 lakh MT, down by 5.06%.*
- New Coriander crop has started in Neemuch and Ramganj spot markets around 150 to 250 bags on an average daily basis with higher moisture content.
- New crop arrivals are likely to start after 15 Feb, 2023 in bulk quantities and it is expected that prices may correct after that on higher production.
- Overall keeping in view of higher ending stocks in the coming marketing year Coriander prices are likely to trade in weak sentiment. However, weather is likely to play very important role in the next 15 to 20 days as the Coriander standing crop is at maturity stage.

Previous Update:

- Reportedly, due to higher prices in Coriander cash markets, its sowing area in Gujarat's growing regions is likely to increase by 60%-70% from the previous year. In Madhya Pradesh, it is likely to increase by 30%-35% from the season 2021-22.
- However, in Rajasthan growing regions, the total sowing area may increase by 10%-15% from the previous year. It is mainly because farmers are interested in sowing other commodities like Paddy, Mustard, etc. because of higher prices as compared to Coriander.
- As per AgriWatch estimates, current year Coriander all India sowing area is estimated at 4.08 lakh hectares as compared to last year 2.97 lakh hectares, up by 37% due to all time higher prices at the time of sowing period.
