

RED CHILLI

Fundamentals:

Today's Update:

- Mostly steady sentiment witnessed in Red Chilli spot market on Tuesday.
- Demand from masala millers, local buyers and some exporters are supporting the prices due to higher production and good availability of premium quality in the current season 2022-23.

Previous Update:

- We suggest stockists and masala millers are likely to wait for price correction for fresh procurement. AgriWatch expects from mid-February they may start buying.
- New arrivals from Kurnool/Yemmiganur & Prakasham/Bhadrachalam at Guntur spot market.
- Further correction in the prices is expected in coming days as overall the Chilli crop is in good conditions so far in all the key growing states and production is also expected to be higher in 2023 seasons.
- However, we expect good export demand for premium quality likely to support Red Chilli prices from lower levels.
- As per AgriWatch estimates, Red Chilli all India production for 2023 is estimated at 15.56 lakh metric tonne (LMT). Last year's production was 14.07 lakh MT, up by 10.59%.
- As per AgriWatch's revised estimates, Red Chilli all India sowing area for 2022 is estimated at 9.21 lakh hectares as compared to last year's 9.03 lakh hectares, up by 2.03%.

TURMERIC

Fundamentals:

Today's Update:

- Mostly steady sentiment witnessed in Turmeric spot market on Tuesday.
- New crop supply is reported at 5,000 to 7,000 bags on an average daily basis in the Nizamabad market which is around 80-90 bags in the Erode spot market on an average daily basis with 15% to 22% moisture content.
- New crop arrivals have started from the producing centers amid high production and weak demand it is likely to increase in the coming days as farmers and stockists are in fear of decline in prices in the coming months.
- AgriWatch expects, prices may decline in the coming days after the start of new crop arrivals from other producing states like Maharashtra and Andhra Pradesh.

Previous Update:

- AgriWatch initial estimates, Turmeric (Dry) all India production for 2023 is at 5.13 lakh MT compared to last year's 4.67 lakh MT.
- *As per AgriWatch revised estimates, Turmeric all India sowing area for 2022 is estimated at 1.70 lakh hectares as compared to last year 1.66 lakh hectares, up by 2.44%.*
- In Sangli district Turmeric harvesting started and in the other districts like Hingoli and Nanded it will start from mid-week of February.

BLACK PEPPER

Fundamentals:

Today's Update:

- Steady to firm sentiment was witnessed in Black pepper spot market on Tuesday.
- Vietnam Pepper prices as on last trade ranged from 58,000 to 61,000 VND/kg. Last week, the pepper market continuously went up. Compared to the beginning of the week, the key provinces recorded an increase of 1,500-2,000 VND/kg. The lowest price is currently 58,000 VND/kg recorded in Gia Lai province, an increase of 2,000 VND/kg. Next is Dong Nai with 58,500 VND/kg, an increase of 1,500 VND/kg. After increasing by 2,000 VND/kg, the two provinces of Dak Lak and Dak Nong are purchasing pepper at the same rate of 59,500 VND/kg. Similarly, pepper prices in Binh Phuoc and Ba Ria - Vung Tau increased by 2,000 VND/kg and 1,500 VND/kg, respectively, to 60,500 VND/kg and 61,000 VND/kg, respectively.
- Indonesia is one of the leading producers of white and black pepper in the world. The pepper harvest in Indonesia usually takes place from July to October every year. Lampong is Indonesia's main black pepper growing region, while Muntok white pepper is concentrated mainly in Banka Belitung. The East Kalimantan and Sulawesi regions also produce white pepper, but mainly for domestic consumption.
- In the context of low pepper prices, black pepper farmers in Indonesia are turning to alternative crops such as cassava, rubber and palm oil. Indonesia's pepper area has decreased by nearly 25% from the 120,000 ha recorded in the 1990s. Indonesia's pepper quality problems may be exacerbated by ongoing water shortages.
- Indonesia's pepper production decreased due to consecutive droughts for many years and unsatisfactory prices. Forecasting, the 2023 crop production will be about 48,000 tons, lower than 52,000 tons in the previous crop year. Vietnam continues to be the largest pepper importer of Indonesia (37%), followed by China (20%), the US (12%), India (9%) and Germany (3%).

Previous Update:

- According to data from Cambodia's Ministry of Agriculture, the country's pepper exports in 11 months of 2022 reached 8,303 tons, down more than 70% over the same period. Currently, Cambodia is exporting pepper to 20 countries and territories with the main products being ordinary pepper and Kampot pepper, a geographical indication product.
- According to Govt. official, pepper exports fell because the global economy has not yet recovered from the impact of the COVID-19 pandemic. The lack of tourists has led to a decrease in orders for consumer goods such as pepper. Cambodia's annual pepper production is about 20,000 tons with an area of nearly 7,000 hectares, but this output has decreased by about 10-20%.
- Pepper is grown mainly for export because domestic consumption only accounts for 5-7% of production each year. Sales have decreased significantly from the beginning of 2022 until now. As of November, Kampot pepper exports reached just over 80 tons, while the same period was over 114 tons.
- The main harvest season of Vietnam lasts until the end of April. The Vietnam Pepper Association (VPA) predicts that in 2023 production will increase by about 5% compared to 2022 to 180,000-185,000 tons.
- In 2022, Vietnam pepper export reported 228,000 tons, a decrease of 12% in volume compared to the same period in 2021.
- As per current situation, AgriWatch expects India's pepper production for 2022-23 likely to be around 52,000 to 53,000 MT. Last year production was 57,000 to 58,000 MT.

JEERA (CUMIN SEED)

Fundamentals:

Today's Update:

- Mixed sentiment has been recorded in Jeera spot market on Tuesday.
- Due to higher arrivals in the Unjha benchmark market prices reported down by INR 200 per quintal from the previous day.
- However, buyers reported active for old crop at lower prices level as good quality new crop likely to enter in bulk quantities from last week of Feb or first week of March in the spot market. However, at Unjha spot market very small quantity new crop arrivals with 150-250 bags (15%-20% moisture content) reported on an average daily basis.
- Overall keeping in view of lower ending stocks by 50% till the end of the coming marketing year Cumin prices are likely to trade in firm sentiment.
- As per AgriWatch initial estimates, current year Cumin seed expected production would be around 3.00 lakh MT as compared to last year 3.16 lakh MT, down by 5.06%.

Previous Update

- On the Rabi sowing front, as per the Agriculture Department of Gujarat, about 275,830 hectares of sowing has been completed in Jeera against 307,135 hectares sown in the corresponding period last year down by 10.19% due to higher temperature during the sowing period. The normal area (three years average) is 421,457 hectares.
- In Gujarat Jeera sowing area may go down 20 - 25%, however in Rajasthan area up by 10 - 12%, but yield may lower current year due to higher temperature earlier and currently frost situation in some areas. However, actual damage percentage may come after 7 to 10 days.
- As per AgriWatch initial estimates, current year Jeera all India sowing area is estimated at 7.09 lakh hectares as compared to last year 7.26 lakh hectares, down by 2.31%.

CARDAMOM

Fundamentals

Today's Update:

- Mixed sentiment has been recorded in Small Cardamom Kerala spot market on Tuesday.
- Good export demand reported for Indian small Cardamom due to quality. We expect buyers likely to active further in the spot market and support the prices.

Previous Update:

- Lower supply reported as planters are expecting higher prices in coming days for releasing their produce.
- Current year Guatemala Cardamom production reported higher, around 40,000 MT. But for the best quality buyers are looking for Indian variety due to which bullish sentiment is expected in coming days.
- As per initial report AgriWatch estimates India's production for the marketing year 2022-23 is expected to be around 30,000 metric tonne (MT). Last year it was 27,000 MT. Favorable weather condition in Kerala growing regions is the main reason for higher production expectations.

CORIANDER SEED

Fundamentals:

Today's Update:

- Mostly steady sentiment was recorded in Coriander spot market on Tuesday.
- New Coriander crop has started in Neemuch, Baran and Ramganj spot markets around 150 to 1,000 bags are arriving on an average daily basis with 22%-25% moisture content due to which weak demand is reported.
- New crop arrivals are likely to start in bulk quantities after 15 Feb, 2023 in bulk quantities and it is expected that prices may correct after that on higher production.
- Currently, domestic buyers are waiting for some prices correction in coming days. We expect from March second week when new crop supply likely to enter in the spot market in bulk quantities buyers will active.
- We expect buyers may inactive in the spot market as prices already moving at higher levels, they are expecting some prices correction for fresh buying. Buyers may active in the spot market after Holi festival (March 2nd week).
- *As per AgriWatch estimates, Current year Coriander seed expected production would be around 4.43 lakh MT as compared to last year 3.10 lakh MT, up by 42.90%.*
- *Overall keeping in view of higher ending stocks in the coming marketing year Coriander prices are likely to trade in weak sentiment.*

Previous Update:

- Reportedly, due to higher prices in Coriander cash markets, its sowing area in Gujarat's growing regions is likely to increase by 60%-70% from the previous year. In Madhya Pradesh, it is likely to increase by 30%-35% from the season 2021-22.
- However, in Rajasthan growing regions, the total sowing area may increase by 10%-15% from the previous year. It is mainly because farmers are interested in sowing other commodities like Paddy, Mustard, etc. because of higher prices as compared to Coriander.
- As per AgriWatch estimates, current year Coriander all India sowing area is estimated at 4.08 lakh hectares as compared to last year 2.97 lakh hectares, up by 37% due to all time higher prices at the time of sowing period.
