

RED CHILLI

Fundamentals:

Today's Update:

- Mostly steady to firm sentiment was witnessed in Red Chilli spot market on Tuesday.
- It is anticipated that the supply of crops will gradually increase as they are currently in the drying process.
- Due to a month delay in sowing, there has been a delay in supply at the Byadgi mandi in Karnataka and we expect new crop supply will continue till April.
- According to the reports, prices in the Byadgi market have reached an all-time high, up by 76.39% (Dabbi Deluxe) and other varieties as well compared to the same period last year. This surge in prices attributed to weaker supply in the market. Despite this, there have been reports of weak demand, particularly from oil companies.
- However, AgriWatch predicts that if prices correct in the medium term, we may see more activity from buyers in the market, including oil companies. As prices begin to stabilize, demand is expected to pick up, leading to increased buying activity.

Previous Update:

- AgriWatch predicts that there may be slight corrections in prices of some specific varieties which are trading at higher range in the upcoming week as the new crop supply is expected to commence in larger quantities.
- As per AgriWatch estimates, Red Chilli all India production for 2023 is estimated at 15.56 lakh metric tonne (LMT). Last year's production was 14.07 lakh MT, up by 10.59%.

CORIANDER SEED

Fundamentals:

Today's Update:

- Mostly steady sentiment has been recorded in Coriander spot market on Tuesday.
- As we had reported earlier, farmers and stockists have begun selling off their stocks due to concerns about a possible decline in prices resulting from higher production levels. Consequently, there has been an increase in supply at most mandis today.
- Due to the significant supply pressure in the cash market, prices have come under pressure and subdued demand has been observed throughout the day. This trend is expected to persist throughout the week, correction in prices are expected in the coming days.
- Higher quality varieties (Scooter, Eagle and Parrot) are likely to trade in a steady to rangebound manner in near term on comparatively good demand.

Previous Update:

- Higher temperature in the Gujarat and Rajasthan regions during the last month has resulted in the reduction of premium quality crops, specifically Scooter and Parrot, in the forthcoming days, as their quality has been adversely impacted. Meanwhile, in Rajasthan rains and hail storms during this week, has resulted in a production loss of approximately 7% to 9% has been reported which might clear in the coming days.
- *As per AgriWatch estimates, Current year Coriander seed expected production would be around 4.43 lakh MT as compared to last year 3.10 lakh MT, up by 42.90%.*
- *Overall keeping in view of higher ending stocks in the coming marketing year Coriander prices are likely to trade in weak sentiment.*
