

RED CHILLI

Fundamentals:

Today's Update:

- Steady to weak sentiment was reported in the Red Chilli spot markets on Monday.
- The recent heavy rain and gales in the Palnadu region, particularly in Prathtipadu and Pedakurapadu mandals, have raised concerns among farmers about the potential damage to their red chilli stocks, which are currently drying up in their fields.
- The farmers in the region fear that this damage could result in traders offering lower prices due to the inferior quality of the red chillies. Some farmers have taken precautions by covering their red chilli stocks with plastic covers in response to the warning issued by the Meteorological department. However, this approach may not be feasible for all farmers in the region.
- Agriwatch expects, Red Chilli prices may correct more by INR 500 to 1,000 per quintal in coming days, Stockists may accumulate stocks at this prices level.

Previous Update:

- It is anticipated that in Karnataka, there will be approximately 50 to 55 lakh bags (with 1 bag weighing 35 kgs) of cold storage stocks. Of this, 70% is expected to be filled, and it is likely that the total capacity of cold storage will be completely utilized.
- AgriWatch expects, sowing for the upcoming season (2023-24) in Karnataka producing districts will commence by the end of June or in the first week of July. Due to the higher price range, there is a possibility that the area under Chilli cultivation may increase in the district.
- As per AgriWatch estimates, Red Chilli all India production for 2023 is estimated at 15.56 lakh metric tonne (LMT). Last year's production was 14.07 lakh MT, up by 10.59%.

TURMERIC

Fundamentals:

Today's Update:

- Steady sentiment was reported in the Turmeric spot markets on Monday.
- Turmeric cash markets are currently experiencing a decline in prices across most markets due to significant supply pressure from all producing centers. The average daily arrivals in Nizamabad during April have reached 15,000 bags, up from 1500 bags at the start of the season.
- AgriWatch predicts that this trend will persist and prices will continue to decrease in the first week of May due to sustained supply pressure.

Previous Update:

- The benchmark market has reported around 6 lakh bags so far and this number is expected to rise in the upcoming days. However, the subdued demand and low-price range during this season make it unlikely that there will be significant bulk arrivals.
- AgriWatch initial estimates, Turmeric (Dry) all India production for 2023 is at 5.13 lakh MT compared to last year's 4.67 lakh MT.

BLACK PEPPER

Fundamentals:

Today's Update:

- Steady to weak sentiment was witnessed in Black pepper spot markets on Monday.
- The latest trading information shows that the price range for pepper in Vietnam is between 64,000 to 67,000 VND per kilogram. The province of Gia Lai recorded the lowest price of 64,000 VND/kg over the weekend, while Dong Nai province traded at 64,500 VND/kg. In Dak Lak and Dak Nong, the price for pepper was 65,000 VND/kg, while in Binh Phuoc and Ba Ria - Vung Tau, the prices were 66,000 VND/kg and 67,000 VND/kg, respectively.
- As per the Vietnam Pepper Association (VPA), approximately 70% of the pepper farming areas in Vietnam have already been harvested by mid-March 2023. Despite this, both planters and stockists are holding onto their pepper stocks instead of selling them immediately, as they anticipate higher prices in the near future. Some are only selling their stocks to meet their basic requirements.
- Sources suggest that pepper production in Vietnam has drastically reduced due to the decline in planting areas and crop losses. As a result, stockists are hoarding the remaining pepper stocks, expecting the prices to surge. Additionally, they are anticipating a surge in demand from China in the forthcoming days.

Previous Update:

- World pepper production in 2023 is forecast around 539,850 Mt up from 521,000 Mt in 2022.
- As per current situation, AgriWatch expects India's pepper production for 2022-23 likely to be around 52,000 to 53,000 MT. Last year production was 57,000 to 58,000 MT.

JEERA (CUMIN SEED)

Fundamentals:

Today's Update:

- Mixed sentiment was witnessed in Cumin cash markets on Monday.
- Buyers in both the domestic and export markets are holding off on purchases due to the unexpected high prices, as a result of which prices have slightly corrected from previous days levels.
- However, AgriWatch predicts that demand, especially in the export market, will increase in the medium-term due to limited stocks from the previous year. This increased demand is expected to support the prices further.
- The limited availability of good quality Cumin and lower production has led to a decline in arrivals and an anticipation of further price increases from farmers and stockists.

Previous Update

- AgriWatch expects, prices to fall in near-term due to all-time high price there is lower demand. While in long-term due to quality issue and lower production, prices will trade at higher range as compared the last season.
- *As per AgriWatch initial estimates, current year Cumin seed expected production would be around 3.03 lakh MT as compared to last year 3.16 lakh MT, down by 4.11%.*

CARDAMOM

Fundamentals

Today's Update:

- Weak sentiment was witnessed in Cardamom spot markets on Monday.
- Agriwatch expects buyers to stay active in the spot market and support the prices. We expect prices likely to go up by INR 150 to 200 per kg from current level in the coming months.

Previous Update:

- As per initial report AgriWatch estimates India's production for the marketing year 2022-23 is expected to be around 30,000 metric tonne (MT). Last year it was 27,000 MT. Favorable weather condition in Kerala growing regions is the main reason for higher production expectations.

CORIANDER SEED

Fundamentals:

Today's Update:

- Mixed sentiment was witnessed in Coriander spot markets on Monday.
- Stockists are currently making most of the purchases in anticipation of an increase in prices. However, weak demand in both the export and domestic markets has led to a decline in prices.
- Agriwatch predicts that prices will continue to decrease in the coming days due to subdued demand and an increase in arrivals.

Previous Update:

- Current year Coriander seed production is expected to be around 5.22 lakh MT as compared to last year's 3.10 lakh MT, up by 68.39%.
- Overall keeping in view of higher ending stocks in the coming marketing year Coriander prices are likely to trade in weak sentiment.*
