RED CHILLI

Spot Market Recap

- Mostly market reported closed due to Corona virus issue.
- *At Guntur region, Currently from Rs.11,000 to Rs.15,000 depend on variety chilli stored into cold storage.*
- *In Andhra Pradesh and Telangana Kharif chilli nursery activity likely to start after first spell of rainfall. As per market information, nursery activity may start from last week of May or early June.*
- *As per trade sources, in Andhra Pradesh and Telangana, around 540,000 tonnes chilli stored in Cold storage.*
- As per market information, as of now chilli export reported lower (around 60 – 70% from normal level) due to lockdown or as result of lower activity from Mandi to Port level. However, trade participant were hopeful that Govt. will take some measures in coming days to increase export activity also it is very important to retain our (India's) clients in international market.
- In Andhra Pradesh, Red Chilli harvesting activity almost completed and farmers bringing their produce into cold storage. As per trade information, daily 2,500 – 3,500 bags daily basis stored into cold storage.
- Telangana – harvesting completed, stored in cold storage.
- Karnataka completed, stored in Cold storage.

Fundamental Analysis

Red Chilli Arrival Scenario: (in Bags)				
Market	% Change Over Previous Week	Today	Week ago	Year Ago
		1st May to 7th May 2020	24th Apr to 30th Apr 2020	1st May to 7th May 2019
Guntur (Andhra Pradesh)	-	Closed	Closed	145,000
Warangal (Telangana)	-	Closed	Closed	49,000
Total	-	-	-	194,000

Previous Update:

New crop supply continued at Guntur spot market, on an average daily basis 85,000 to 93,000 bags (1 bag = 45kgs) supply reported. Normal moisture percentage reported around 5 to 7%, it is mandatory otherwise whole chilli will be brittle.

Normal Export demand is reported in the Guntur spot market from countries like Vietnam, Malaysia, Bangladesh, Sri Lanka etc

We expect during new season, farmers will get good prices for Red Chilli (good quality) as chilli cold storage stocks reported lower than last year and buyers will active during current marketing period. Also the market's reliance on Andhra Pradesh will be higher than usual as Karnataka and Madhya Pradesh chilli production expected lower.

Current year from 1st January to 20th March red chilli supply in Guntur market reported around 165,375 MT as compared to last year 164,475 MT, up by 0.55% as farmers expected higher prices in future.

New chilli arrivals continuing in Madhya Pradesh Bedia spot market at around 2,275 quintal daily basis with variety like Mahi and Fatki, last week it was 2,450 quintal, sources revealed that, new crop supply likely to increase in coming days. Agriwatch estimate, Madhya Pradesh Chilli production would be around 52,500 MT after rainfall, earlier estimate was 59,314 MT.

Red Chilli Spot Price Outlook (Guntur, 334 variety)

Candlestick chart formation indicates prices downward correction in the market. Red Chilli 334 variety prices are moving at Rs.11,000 – 11,500/-qtl. We expect prices (cold storage) likely to correction from higher levels and to move in a range between Rs.10,000 – 13,000/- in coming days.

Arrival * Qtl, # 65 kgs				

Previous Update:

At Nizamabad spot market, new Turmeric supply continued with higher moisture level around 4 - 5%. New Turmeric supply at Duggirala spot market likely to enter from last week March or April first week. In Warangal spot market, new crop likely to enter from April first week.

Turmeric buyers reported active from lower levels in the spot market as lower sowing area in Tamil Nadu due to deficient rainfall and in AP as shifted to Cotton and in some parts to Chilli due to current higher prices.

As per Agriwatch's second advance production estimate, Turmeric production for 2020-21 is estimated at 452,698 (after flood in MH, AP and Karnataka) MT (basis dry crop) compared to previous year's 532,353 MT (2019-20 marketing season).

In Andhra Pradesh, Duggirala market turmeric supply continued in the market, last week on an average 3,400 quintal reported on daily basis, previous week it was 6,250 quintal. In Erode spot market, turmeric new crop supply entering on an average 3,500 – 4,000 bags reported.

In Nizamabad indicative market during current year (2020), Turmeric arrivals reported around 41,328 MT from 2nd January till 20th March compared to last year same period 36,008 MT, 14.77% reported up from last year.

Fundamental Price Outlook

Before lockdown turmeric (finger, NCDEX quality) in Nizamabad is trading at Rs.5,600/quintal. We expect that prices may not increase much further from current levels amid lack of good demand around higher levels. **We expect prices to move in a range between Rs.5,500 – 6,200/-qtl in coming days.**

BLACK PEPPER

Spot Market Recap

- Weak sentiment witnessed in Black Pepper spot market at Kochi spot market.
- As per trade sources, interstate demand reported lower due to lockdown.
- Indian New pepper rate is Rs.30,000 per quintal, steady from previous day.
- According to estimates of the Export-Import Department Vietnam, pepper exports in April reached 40 thousand tons, worth 80 million USD, up 8.2% in volume, but down 14.3% in value compared to April 2019. . Generally for the first 4 months of 2020, export of pepper reached 121 thousand tons, worth US \$ 256 million, up 11.9% in volume, but down 9.4% in value over the same period in 2019.

Fundamental Analysis

Black Pepper Arrival Scenario: (in Tons)				
Market	% Change Over Previous Week	Today	Week ago	Year Ago
		1st May to 7th May 2020	24th Apr to 30th Apr 2020	1st May to 7th May 2019
Kochi (Kerala)	-24.44	68	90	59
Total	-24.44	68	90	59

Previous Update:

February and March 2020, when the two states of Kerala and Karnataka come to the main harvest, Indian pepper output can reach the threshold of 200 - 300 tons / week. India's pepper price is expected to drop below Rs.300 per kg (equivalent to US \$ 4.2 per kg), possibly even reaching Rs. 275 per kg (US \$ 3.84 per kg) in short term.

Indonesia holds the position of the third largest producer in 2019 with 25,000 tons of black pepper and 40,000 tons of white pepper.

Brazil is the second largest producer with a total production of 67,000 tons in 2019, including 64,000 tons of black pepper and 3,000 tons of white pepper. Like Vietnam, Brazilian pepper production also decreased in 2019 compared to 2018. The reason is that some pepper gardens have been exhausted, while newly planted white pepper farms have not yet been harvested.

According to preliminary calculations of the International Pepper Commission (IPC), world pepper production in 2019 decreased for the first time in several years in a row, mainly due to adverse weather in Vietnam. Specifically, global pepper production is 74,000 tons lower than in 2018. However, the world supply of pepper is still more than 60,000 - 70,000 tons more than demand.

In India, the Kerala state 2020 pepper harvest has officially started in January 2020, but the yield and quality are low due to adverse weather. The moisture of the first harvest is about 17-20%, higher than the normal level of 13%.

International Scenario

Vietnam Pepper prices today throughout the Central Highlands and the South unchanged, ranging from 38,000 to 40,000 VND / kg. In particular, Gia Lai pepper prices are the lowest and highest in Ba Ria - Vung Tau.

In early April 2020, export prices of Brazil and Malaysia were stable; export prices of Indian and Indonesian pepper decreased; Vietnam's export price of pepper increased.

Brazil: Brazil's export price of black pepper is stable at US \$ 2,000 / ton from February 5, 2020 to early April 2020.

Malaysia: At Kuching port, on 7/4/2020, the price of black and white pepper was stable compared to March 31, 2020 at US \$ 3,685 / ton and US \$ 5,275 / ton.

Global pepper market is forecast to remain under oversupply. The supply of area, productivity, output of Vietnam and the world has increased in recent years while the demand has only increased from 2 - 2.5% / year.

Vietnam's pepper harvest in 2020 has reached over 50% with an estimated output of 250,000 tons, inventory in 2019 will turn to about 90,000 tons, so the supply in 2020 is estimated at 350,000 tons.

Increased pepper production reported in Sri Lanka and Malaysia. In particular, Sri Lanka's pepper output is estimated at 26,700 tons, an increase of 44% compared to 2018; and in Malaysia reached 24,000 tons. Some Malaysian pepper growing areas are in a period of high productivity, so the country's output has increased slightly compared to the previous year.

China's pepper production in 2019 is estimated at 33,000 tons, including 1,000 tons of black pepper and 32,000 tons of white pepper. Thus, the output has decreased by 6% compared to the previous year.

Total	-	-	-	159,321

Previous Update:

Fourth round picking activity finished, Cardamom quality supply reported lower. Fifth round picking activity likely to start from mid March. Agriwatch expect current marketing year (2019-20) production likely to be around 18,000 – 19,000 MT due to unfavourable weather.

The current season, officially began on August 1. From 1st August 2019 to 19th March 2020 arrivals reported 6,053 tons and sales 5,699 tons. Lower production expectations during current marketing year will support prices from lower levels.

Last season total arrivals reported from 1st August 2018 to 31st July 2019 arrivals reported 19,100 tons and sales 18,639 tons.

Gondal (Guj.)	517.50	24,700	4000	23000
Total	76.12	90,700	51,500	107,600

Previous Update:

Coriander new crop supply entering at Guna, Neemuch, Ramganj, Kotamandi with on an average 6,000-10,000 bags, with higher moisture content.

As per Agriwatch final production estimate, Coriander production for 2020-21 (marketing period) is estimated at 352,316 MT (88 lakh bags) compared to previous year's 268,957 MT (67 lakh bags, 1 bag = 40 kg).

Buyers may likely to active from lower prices like Rs.5,000/- level or some little correction than that, to go for active buying as ending stocks slowly come down and current year new crop reported delayed.

We have noticed that, at Gondal market increased supply reported due to higher production current year as sowing area reported increased as we have mentioned earlier due to new sowing area has come up as a result of water availability.
