

## Sugar & Gur Domestic & International Fundamentals

- Market sentiments traded between firmer to normal zone with price trending up for the day.
- The govt had raised sugar import duty from 15% to 25% on both raw as well as refined sugar. The move was taken to relieve the ailing sugar industry which was struggling hard to match up with the higher cane prices and lower market price for their product. Meanwhile, it is also expected to resolve the problem of accumulated cane arrears in the country which stands at about Rs 6800 crores.
- CACP advocated a 4.3% rise in FRP (to Rs 230/quintal) for sugarcane possessing an average recovery rate of 9.5% for the cropping year 2015-16. It is notable, that the current FRP for cane yield has been fixed at Rs220/quintal (for 9.5% average recovery) and Rs243/quintal (for 10.5% average recovery) for 2014-15 seasons.
- U.P millers had started evacuating contractual and seasonal labors out of work on the verge of reducing compensated losses to them. Reportedly, the millers' association had decided to suspend operation for this crushing month if govt did not agree to their demand of adopting cane linkage formula.
- Total around 675000 bags of gur stored in cold storages till 19<sup>th</sup> August 2014 lower compared to 827000 bags at same period last year.
- Gur prices witness artificial firmness at present and likely move down in the coming days due to good stock availability in the Maharashtra markets. It is notable that cane has diverted more towards gur production in Pune and Sangli area this year. In addition to it, market participants is expecting early arrivals of gur for the next marketing year which drive the prices southwards in the medium term.

**Outlook:** Sugar prices are trading up due to strong market demand outlook in the country. In addition, upcoming festive demand is also likely to increase sugar prices in the medium term as expected.
