AGRIWATCH

27th September, 2014

Sugar & Gur Domestic & International Fundamentals

- Market sentiments traded between weaker to normal zone with price falling down for the day.
- Tenders are invited by NORTHERN RAILWAY for supply of battan cane 90 / 92 cm long 9 To 10 cm c.
 Opening date for tenders has been fixed at 16th Oct, 2014.
- Brazil's centre south region (that accounts for 80% of country's cane production) witnessed a 17% decline in sugar production from 3.02 million tons (second half of august) to 2.5 million tons in the first half of September, 2014. Slowdown in cane crushing in the area and a diversion of harvested cane towards ethanol production could be cited responsible for this fall.
- The worst ever draught in 100 years accompanied by an accidental fire in Brazil is likely to move cane production down by almost 15% for cropping year 2014-15.
- As per the new estimates by ISMA; sugar production in the country is likely to range in between 250-255 lakh tons for 2014-15. However, a consolidated figure will be released soon, after making careful evaluation of monsoonal impact on the crop.
- Total around 536000 bags of gur stored in cold storages till 15th Sep, 2014 lower compared to 671000 bags at same period last year.
- Gur prices witness artificial firmness at present and likely move down in the coming days due to good stock availability in the Maharashtra markets. It is notable that cane has diverted more towards gur production in Pune and Sangli area this year. In addition to it, market participants is expecting early arrivals of gur for the next marketing year which drive the prices southwards in the medium term.

Outlook: Despite undergoing a hike in import duty, sugar prices fell down amidst abundant stock availability and uninterrupted supply within the nation.
