#### Sugar & Gur Domestic & International Fundamentals

- Market sentiments continued to trade between weaker to normal zone with price falling down for the day.
- Rabobank raised its global sugar supply deficit from an earlier estimate of 0.9 million tons to 3.2 million tons for 2014-15. The revision had been made considering prevalent draught like condition in major producing areas and an expected diversion of cane toward ethanol production in Brazil.
- Contrary to the production estimates by leading trading houses, Platts Kingman predicted a 2% surge in Centre-South Brazilian cane output from 562 million tons in 2014/15 to 575 million tons in 2015/16.
- Brazilian sugar export declined 4% from 2.53 million tons in August to 2.42 million tons in the month of September. Also there saw a 12% fall in shipment (from 2.76 million tons) when made comparison on yo-y basis.
- As per the new estimates by ISMA; sugar production in the country is likely to range in between 250-255 lakh tons for 2014-15. However, a consolidated figure will be released soon, after making careful evaluation of monsoonal impact on the crop.
- Total around 128650 bags of gur stored in cold storages till 06<sup>th</sup> Oct, 2014 lower compared to 186470 bags at same period last year.
- Gur prices fell down and are expected to scroll down further amidst good stock availability in the Maharashtra markets. It is notable that cane has diverted more towards gur production in Pune and Sangli area this year. In addition to it, market participants is expecting early arrivals of gur for the next marketing year which drive the prices southwards in the medium term.

**Outlook**: Sugar prices are currently hovering in a range with weaker tone due to lackluster trade. However, upcoming festive demand likely to increase sugar prices in the medium term as expected.
