

Sugar & Gur Domestic & International Fundamentals

- Domestic market remained dormant amid mounting sugar stock on persistent supply by the millers.
- As per the data released by IBIS, India imported 88 thousand tons of sugar (mainly raw) last week (15-21 Dec, 2014) compared to 28.4 thousand tons of exports for the same duration.
- Brazil's centre south region churned around 0.37 million tons of sugar in the first two weeks of December which was 51.3% less than the figure achieved during second half of November. Meanwhile, Brazilian ethanol industry showed an upsurge this year with the country producing 25.6 billion liters of ethanol till date.
- Brazilian agency, CONAB forecasted central south cane production to 582.9 million tons (2014-15) which is 2.8% less than the previous estimate made by it. Notably, the agency attributed the severe draught weather condition in the country for the estimation cut.
- On the wake of rising refinery demand, the Indonesian govt. had approved an import quota of 0.6 million tons of raw sugar for the first quarter of 2015-16. The move was largely welcomed by the local refiners and food industry in particular who were affected hard by the supply constraint.
- An early start of crushing this season (Oct, 2014- Sep, 2015) led India to produce 42.25 lakh tons of sugar (till 15th Dec, 2014) which was 46.9% higher than the figure achieved last year during the same period. Reportedly, 442 Indian sugar mills participated in the crushing process as against 426 mills last year.
- Gur prices fell down on increased supply from producing areas against reduced off take by local consumers.

Outlook: Sugar prices are currently trading low and are expected to decline further as the country is going through its peak production time that will last for some time from now.
