#### Sugar & Gur Domestic & International Fundamentals

- Sugar prices traded steady to weak amid paling domestic demand for the product.
- A significant diversion of Brazilian(centre- south region) cane towards ethanol led the country to produce only 0.12 million tons of sugar in the second half of December which was 68.19% less than the sugar crushed in the first half. Similarly, an y-o-y comparison of sugar production in the region showed a sharp decline of 46% from 0.21 million tons in 2013(second half of December) to 0.12 million tons this year.
- The U.P govt. had announced its new molasses policy, 2014-15(Nov-Oct), wherein the molasses reservation rate to the country-liquor manufacturers had been reduced from 34 per cent to 15 per cent. The policy had been specifically formulated to help the sick driven sugar industry, who was required to reserve a part of their total molasses production for the country-liquor manufacturers at a rate which is much lower than the market specified prices.
- Tenders are invited by ANDHRA PRAOESH STATE CIVIL SUPPLIES CORPORATION LIMITED for supply of ISS Grade S-30/S-31 cane sugar under PDS for the Month of February 2015 through procurement. Opening date of tender has been fixed at 13th January, 2015.
- As per the latest report published by IBIS; India imported 63.70 thousand tons of sugar for the week ending 04th Jan, 2014. On the other hand Indian sugar exports declined 46.32% from 57.61 thousand tons to 30.92 thousand tons for the same duration.
- An early start of crushing this season (Oct, 2014- Sep, 2015); particularly in Uttar Pradesh led India to produce 74.61 lakh tons of sugar (till 31st Dec, 2014) which was 27.26% higher than the figure achieved last year during the same period.

**Outlook**: Sugar prices are currently trading low and are expected to decline further as the country is going through its peak production time that will last for some time from now.
