

Sugar & Gur Domestic & International Fundamentals**Recent updates**

- Sugar prices have fallen below Rs 3,000 a quintal for the first time in this crushing season due to intensified competition among mills. Mills in Maharashtra on last week quoted Rs 2,990 a quintal for sale of the S30 variety of sugar to stockists and traders. The realisation for mills for the S30 variety of sugar has slumped by over 15 per cent since the beginning of this crushing season in October. The M30 variety of sugar continued to trade above Rs 3,100 a quintal at the mill gate.
- Several sugar mills in India were unable to pay cane price to the farmers because of the recent fall in sugar prices which have started falling below the cost of production. There was concern about sugarcane farmers getting affected due to their cane price arrears accumulating.
- Indian Sugar Mills Association (ISMA) has increased sugar output estimate to 26.1mn tonnes in the crop year (October, 2017 to September, 2018) as against its earlier estimate of 25.1mn tonnes. The consumption of sugar in India is seen at 25mn tonnes in current year as against 24.6mn tonnes in earlier year. India may have surplus sugar available for exports in 2018-19. The main reason for the fall in sugar prices in the recent past was the expected sugar production during the current season, which is now looking to be more than the domestic requirement, because of which several sugar mills were under pressure to sell their sugar for revenue generation to pay to the cane farmers.

Previous updates.

- Sugar futures fell hard in 2017, proving the worst performance of the major agricultural commodity contracts. New York-traded raw sugar futures tumbled by 22% - reversing 2016's gains almost exactly - while London white sugar plunged by 25%, undermined by the prospect of a return to a world production surplus. Besides unexpectedly strong output estimates for many major producers, such as the European Union and India, consumption ideas took a dent from health concerns – largely, but not universally, in Western nations.
- The Mexican sugar industry stands to lose almost US \$543 million annually as a result of a trade pact Mexico signed with the United States, according to an estimate by the CEO of a domestic sugar refinery. The two countries reached an agreement last June that on one hand avoided punishing tariffs but on the other reduced the quota of refined sugar that Mexico can export to its northern trade partner. The director of Sucroliq said the quota requirement, coupled with a provision that requires sugar producers to export their unrefined product to refineries by sea instead of directly over the border to end users, will have a significant impact on growers' bottom lines.
- Ukraine has almost completed the 2017/18 sugar season, processing 2.1 million tonnes of white sugar from the 2017 sugar beet harvest, the agriculture ministry said on Tuesday. It said 46 sugar refineries had processed 13.7 million tonnes of sugar beet so far this season out of the 13.8 million tonnes that have been harvested. Ukraine consumes about 1.5 million tonnes of sugar a year and produced 2 million tonnes of white sugar from beet in 2016. The country produced about 5 million tonnes of white beet sugar a year during Soviet times but has cut production sharply due to a lack of export markets in the face of competition from cheaper cane sugar
- Sugar production in Uttar Pradesh recorded a growth of 24.54% to 4.1 million tonnes until January 12 on the back of higher recovery and increased crushing. Last year, mills produced 3.32 million tonnes Sugar in the corresponding period.
