

Daily Sugar & Gur Fundamental Report

11 Apr, 2018

Sugar & Gur Domestic & International Fundamentals

Recent updates.

- The Centre is likely to provide financial support to cane farmers for produce sold to sugar mills, two
 government sources said, in a rare move to subsidise the industry which is reeling under a glut and
 struggling to export because of low global prices.
- To pay around Rs 55 (\$0.84) for every tonne of cane sold to the mills, two government sources said, seeking anonymity in line with government policy. Although India is not planning any direct incentive for sugar exports, rival suppliers such as Brazil, Australia and Thailand could still lodge complaints with the World Trade Organisation (WTO), saying such support will help Indian industry to sell overseas.

Previous updates.

- Sugarcane farmers in Uttar Pradesh are owed over Rs 8,300 crore for the crop they have supplied to
 mills this crushing season at the state government's "advised" price (SAP). Maharashtra's cane growers
 had similar unpaid dues of Rs 2,213 crore as on March 31, that too, against the Centre's lower
 mandated "fair and remunerative price" (FRP).
- The lack of a market-linked procurement mechanism for sugarcane is coming back to haunt the
 government, industry and investors. Excess output in India has coincided with higher output in Thailand,
 bringing down global prices. That has meant that even as domestic prices have turned weak, exports are
 not looking viable either
- Brazil has proposed that China introduce a quota for imports of Brazilian sugar that would face a 50
 percent levy to solve a trade spat between both countries but China is resisting the plan, a person close
 to the negotiations told Reuters on Friday.
- China currently allows 1.94 million tonnes of total sugar imports a year at a tariff of 15 percent as part of
 its commitment to the World Trade Organization (WTO). Imports beyond that level face a 50 percent
 levy. Last May, China introduced an additional 45 percent duty on imports from several countries,
 including top growers such as Brazil and Thailand, to protect its industry from what it identified as a
 surge in imports.
- Sugar prices have witnessed a sustained decline since the beginning of the current crushing season in October 2017. So far this season, the benchmark variety 'M' has lost 18 per cent of its median value on expectations of a bumper supply for crushing seasons 2017-18 and 2018-19.
- Sugar production in Maharashtra has touched 101 lakh tons, the second highest in the state's history, reports.
- Sugar output increased 49 per cent to 28.18 million tonne (MT) so far in 2017-18 marketing year, but
 mills are unable to make cane payment to growers owing to low prices, industry body ISMA said on
 Tuesday.
