

# **Daily Sugar & Gur Fundamental Report**

24 Apr, 2018

### **Sugar & Gur Domestic & International Fundamentals**

### Recent updates.

- As sugarcane arrears mount in most production centres in tandem with falling sugar prices in the backdrop of a generous harvest, the Centre hopes the mills export at least 2 million tonnes of sugar by September to ease the pressure in the domestic market.
- > Sugar prices are ruling at about Rs 2,900 a quintal against a production cost of about Rs 3,300 and higher in the domestic market. If the government wants the industry to export when global prices are ruling even lower at about Rs1,900, it will have to support exports. It has to set up a sugar stabilisation fund to support the industry and farmers and come out with a comprehensive financial package for bank loans and Sugar Development Fund loans, Palani G Periasamy, President, South Indian Sugar Mills Association said.
- ➤ China's (official) sugar imports reached 380,000 tonnes in March 2018, up sharply from 22,943 in the previous month and the highest monthly count since January 2017, customs data showed.
- ➤ Kenya expects its sugar production to rise to 420,000-450,000 tonnes in 2018 as the country recovers from a drought-induced drop the previous year, said Solomon Odera, the head of the Sugar Directorate.

#### Previous updates.

- Brazilian sugar exports are expected to fall to 21.3 mln tonnes in the new 2018/19 (Apr/Mar) crop year, down 6.5 mln from 27.8 mln a year earlier due to a smaller cane crush and falling sugar production in both the Centre/South and Northeast regions, according to local consultancy JOB Economia.
- Uganda's sugar output may climb 17% this year to 428,000 tonnes as improved rainfall is likely to boost cane output, said Wilberforce Mubiru, secretariat manager at the Uganda Sugar Manufacturers' Association (USMA), according to Bloomberg.
- Despite government making it mandatory for sugar mills to export 2 million tonne sugar in 2017-18
  marketing year as per the quota allocated to individual mills, India has not started sugar export due to
  lack of export parity. While mills are hopeful that the central government may announce export
  incentives, domestic market sugar prices have slided to Rs 26/kg, a new low for the year
- Sugar production in Maharashtra has almost reached its past record and mills produced 10.49 million tonnes up to April 15, 2018. Mills in Uttar Pradesh produced record 10.48 million tonnes of sugar. Crushing operations are almost over in Karnataka and only one sugar mill was operational as on April 15, 2018. The state has so far produced 3.63 million tonnes of sugar.
- On bumper production, ISMA said sugar prices have been under severe pressure in the last 4-5 months
  and have fallen by Rs 9 per kg across the country. As compared to the cost of production, the current
  ex-mill sugar prices are around Rs 8 per kg lower and the sugar mills are incurring substantial losses.
- Indian Sugar Mills Association (Isma), has forecast the country's production at 29.5 million tonnes for the current season; it estimates consumption of 25.5-26 mt. With four mt of carryover stock from the previous year, the overall surplus might jump to 7.5-8 mt. The government has, to reduce this surplus, also directed mills to export a cumulative two mt by September. The industry says this is impossible, as global prices have also been falling. Excess supply from Brazil and the European Union has led to a big slide in these; any exports would mean losses.
- The area sown under cane in UP has been growing consistently over the years. This year, too, it is estimated to increase by 100,000 hectares.

## NCDEX Sugar (M grade) Future Quotes (At 05:00 p.m. as on 23-04-2018)
