

Sugar & Gur Domestic & International Fundamentals

Recent updates.

- The industry hopes the government will create a buffer stock, have a fixed minimum support price for sugar and push exports.
- The Agriwatch Agri Commodities Index dipped 0.14% to 101.19 during the week ended May 19, 2018 from 101.33 during the previous week as plunging sugar prices offset gains in cereals, pulses and edible oils. The Sugar Index is now at its lowest since November 2015. The base for the Index and all sub-Indices is 2014 (= 100). Four of the nine commodity group sub-Indices and 15 of the 29 individual commodity sub-Indices ended the week lower.

Previous updates.

- Maharashtra's sugar season is nearing its end and only four sugar mills are continuing their crushing operations. With production crossing 107 lakh tonnes, the 2017-18 season has seen the highest production of sugar in the state. Of the 187 mills functional this season, 183 have ceased crushing operations. Two mills in Ahmednagar and one each in Pune and Satara districts are continuing operations.
- Record sugar production in India and Thailand is weighing heavily on millers in Brazil, the world's top producer. As many as nine mills may not process sugar cane in 2018-19 due to financial problems, joining a group of about 80 that have stopped production since 2008, according to Unica, Brazil's sugar industry group.
- While sugar prices have fallen by 30% in past few months owing to bumper sugarcane production across India, including Punjab, rates for molasses, a by-product of sugarcane, has also now crashed by 85 per cent.
- Sugar prices tumbled down by Rs 90 per quintal at the wholesale market in the national capital during the week as supplies exceeded the demand due to record production.
- Sugar exports have not started even after centre gave cane farmers a Rs 1,540-crore financial assistance package, seeking to flush out last year's surplus stock in the world's biggest consumer market of the natural sweetener.
- The wholesale gur (jaggery) market in the national capital today as prices remained to be continuously enquired at previous levels in the absence of any worthwhile moving factors. sluggish demand due to off season along with adequate stocks managed to keep gur prices unmoved. Following are today's rates (in Rs per quintal): Gur chakku Rs 2,900-3,000, pedi Rs 2,900-3,000, dhayya Rs 3,100-3,200 and shakkar Rs 3,200-3,300.
- India imported 1,908 th sugar or 1.6 percent of the country's total import of the sweetener from Pakistan during April-May of the current financial year, the commerce ministry said.
- Thailand's sugarcane crush continues to wind down as daily sugar production has fallen to about 10,000 tonnes over the past week.
- Thailand, the world's second-biggest sugar exporter after Brazil, has decided to cut its exports of raw sugar by at least 500,000 tonnes this year, as a swelling global surplus and falling prices make it less worthwhile to export it, according to Japan's Nikkei newspaper.
- Raw-sugar futures have already fallen 26 percent this year, the biggest drop among 34 commodities tracked by Bloomberg. Record output in India and Thailand is driving the enormous glut. Hedge funds are positioning for more losses and have held wagers on prices declines for five straight months.
