

Sugar & Gur Domestic & International Fundamentals

Recent updates.

- **The Union Cabinet will consider on Wednesday a proposal to increase** the minimum price that sugar mills are required to pay to cane growers by Rs 20 to Rs 275 per quintal for the next marketing year starting October, according to sources.
- **India is likely to end the 2017/18 (Oct/Sep) season with an inventory of 10 mln tonnes**, up from 3.87 mln a year ago. The surge is due to a combination of record production and low exports.
- **The glut is likely to swell in the 2018/19 season starting Oct. 1**, with Indian production expected to jump by almost a tenth from the current year to between 35 million tonnes and 35.5 million tonnes. Northern state of Uttar Pradesh, the biggest producer in India, could churn out 13-13.5 million tonnes of sugar in the next year. That would be up 12 percent from the current year, with the ISMA saying farmers have devoted a bigger area to high-yielding varieties of sugar cane. Maharashtra's sugar output is estimated at 11-11.5 million tonnes in the new season, up from 10.71 million tonnes.

Monsoon Update:

- **The monsoon is expected to ramp up over Central and West India**, the IMD has forecast fairly widespread to widespread rainfall along the West Coast, North-East, East and adjoining Central India and the islands in the Bay from July 21 to 23. Scattered to fairly widespread rainfall is likely over North-West India during this period, while it will be isolated to scattered over the rest of the country. According to the European Centre for Medium-Range Weather Forecasts, the rains would escalate further over East and North-East India, adjoining Central India and North-West India during the next 5-10 days.

Previous updates.

- **China will levy extra tariffs on out-of-quota sugar imports from all origins** starting from Aug. 1, the Commerce Ministry said on Monday, just over a year after introducing hefty penalties on top growers including Brazil and Thailand. China allows 1.94 million tonnes of sugar imports a year at a tariff of 15 percent as part of its commitments to the World Trade Organization. Shipments outside of that allowance - out-of-quota imports - are charged a higher tariff and need special permits.
- **Industry body ISMA has estimated production of 350 - 355 lakh tonnes of sugar in the season 2018-19.** This is about 28 - 33 lakh tonnes higher than the current 2017-18 SS production of around 322.5 lac tons. This is assuming normal rainfall," an ISMA release noted. Based on the satellite images procured in the latter part of June 2018, the total acreage under sugarcane in the country is estimated to be around 54.35 lakh hectares in 2018-19 SS, which is about 8 per cent higher than 2017-18 sugar season's cane area of around 50.42 lac ha. It is also noted that area is almost similar to the area reported in 2013-14 and 2014-15 and slightly below 54 lac ha.
- **Uttar Pradesh, the leading sugarcane producing State in the country, is estimated** to have higher sugarcane area at 23.40 lakh hectares, as against 23.30 lac ha. in 2017-18 SS. ISMA is expecting a better yield in 2018-19 SS due to further increase in area under the high yielding cane variety Co0238. That will increase the sugarcane production and availability for crushing by sugar mills. Thus, sugar production in U.P. in 2018-19 SS is estimated to increase and be around 130 - 135 lakh.
- **The other major sugar producing State, viz. Maharashtra's cane area has gone up by about 25 per cent** in 2018-19 SS, which is mainly due to timely and adequate rainfall from June to September 2017. As against the cane area of 9.15 lac ha. in 2017-18 SS, area is expected to increase to 11.42 lac. Ha in 2018-19.
- **Sugarcane area in Karnataka also increased in 2018-19 SS.** Area under sugarcane in 2018-19 SS is expected to be about 5.02 lac. Ha as against 4.15 lac ha. in 2017-18 SS. Sugar production in 2018-19

SS is estimated to be around 44.80 lac tons, as against 36.54 lac tons expected to be produced in 2017-18 SS.

- **World sugar production is likely to hit a record 187.6 million tonnes this year** on account of increase in output in India, the EU, Thailand and China, according to the Food and Agriculture Organization (FAO). Global sugar trade is expected to contract by 4.10 percent to 55.5 million tonnes in the 2017-18 marketing year (October-September), from 57.9 million tonnes last year because of surplus availability. With regard to global sugar consumption, it is likely to increase to 170.6 million tonnes in 2017-18 from 166.8 million tonnes last year.
- **In India, Sugarcane has been sown in around 50.52 lakh hectares as of 13th July 2018** which is higher than 49.72 lakh hectare covered during corresponding period last year. In Uttar Pradesh, it has been sown in 23.05 lakh hectare which is higher than 22.56 lakh hectare covered during corresponding period last year, In Maharashtra it has been sown 9.49 lakh hectare which is higher than 9.37 lakh hectare covered during corresponding period last year and in Karnataka it has been sown 4.38 lakh hectare which is higher than 4.27 lakh hectare covered during corresponding period last year. Area of 2018-19 is about to increase 5-10% compared to previous year because of supportive weather and availability sufficient water in growing regions.

NCDEX Sugar (M grade) Future Quotes (At 05:00 p.m. as on 18-07-2018)
