

Sugar & Gur Domestic & International Fundamentals

Recent Update:

Most of the sugar prices were noticed mixed tone on Wednesday. Increase in monthly sugar release quota of the country by over 14% to 20 lakh tonnes for the month of September has led to decline in sugar prices by about 2%. Exporters expect that the millers, who have been sitting on huge sugar stocks, may begin to export the sweetener as price margin between domestic and export prices reduces slightly. Raw sugar futures in New York touched a three-week high as the market continued a rebound from last week's 10-year low of 9.91¢/lb. and expecting Futures will trade at below 13 cents/Lb till March.

Brazil's sugar exports fell to 1.732 mln tonnes, raw value, in August 2018, down from 1.885 mln in July and sharply below 2.816 mln in the same month last year, Trade Ministry data showed.

Weather Update:

06th Sep: Heavy to very heavy rain with extremely heavy rain at isolated places very likely over Odisha; heavy to very heavy rain at isolated places very likely over Chhattisgarh and heavy rain at isolated places over Gangetic West Bengal, Jharkhand, Uttarakhand, Uttar Pradesh and Madhya Pradesh.

Overall, the monsoon till August 30 has been 6 per cent less than normal, with several districts of north interior Karnataka, Rayalaseema, Bihar, Jharkhand, Saurashtra and Kutch staring at a shortfall. The rainfall, according to agriculture ministry officials, has been well-distributed, though overall quantum might have been low in some regions. This they said

SPATIAL DISTRIBUTION (% of Stations reporting)			
% Stations	Category	% Stations	Category
76-100	Widespread (WS/Most Places)	26-50	Scattered (SCT/A Few Places)
51-75	Fairly Widespread (FWS/Many Places)	1-25	Isolated (ISOL)
Dry (No station reported Rainfall)			

won't have any impact on the overall

production of kharif crops in 2018, which is poised for another record.

Previous Updates:

Crushing of cane for the next sugar season (October 2018-September 2019) would commence in October this year with production Agriwatch expected to be about 35 million tonnes. The mills usually complete crushing of cane by April and they would have to pay a fair remunerative price of Rs 97,000 crore to the farmers next season.

ISMA officials had visited several countries, with some delegations led by government officials, to learn about export opportunities. Refineries and importers in Bangladesh, Dubai, and China have shown interest to enter into long-term import contracts for raw sugar from October this year. However,

exporters are unable to give commitments. These countries want the sugar at prices on a par with countries such as Brazil and Thailand.

Brazil expected to produce about 30 million tonnes of sugar in the 2018-19 sugar season (including North East Brazil), 22 per cent lower than in the previous year. India, on the other hand, is projected to have an output of 35.5 million tonnes in the 2018-19 season (October-September), breaking the record of 32 million tonnes in 2017-18

Till 31st Aug 2018, sugarcane has been sown 51.94 lakh hectares, 2.1 % higher than 49.86 lakh ha till date last year and 5.6% higher than the normal acreage of 46.36 lakh ha till date.

The Centre has ordered Sugar mills to pay for their past failures in meeting levy obligations in a surprise move that has come five years after the system was abolished. The new directive, issued a few days back, mandates sugar mills that did not fulfil their levy obligations to pay the difference between the prevailing market rate and the levy sugar price of the season. Under the now-abandoned levy obligation system, every domestic producer was supposed to sell a certain portion of sugar to government at a subsidized rate every sugar season.

Sugar prices have fallen to their lowest levels in a decade and are likely to remain under pressure as record world-wide production collides with rising trend of health conscious food habits which limits the intake of sugar in diets. Raw sugar futures traded on the ICE Futures U.S. exchange settled at 10.23 cents a pound on Friday, the lowest finish for a front-month contract since June 10, 2008.

According to Agricultural Statistic Agency. Brazil's total cane crush in the current crop at 635 million tonnes compared to 625 million tonnes in its May estimate and 633 million tonnes in the previous crop (2017/18). The agency, however, lowered its views for sugar production both for the country and for the center-south region. The agency projected center-south cane crush at 587 million tonnes versus 580 million tonnes seen in May and 588 million tonnes reported for the 2017/18 crop.

The food ministry last week extended the deadline for exporting 2 million tonne of sugar by three months to December as only a fourth of it has been shipped so far. In March, the government had allowed sugar export in view of record domestic output of 32 million MT. Mill-wise, Minimum Indicative Export Quotas (MIEQ) were allocated by the ministry in May. Mills can export either sugar produced in the current 2017-18 season or the next 2018-19 season (October-September). The extension in deadline has been made because the international demand is for raw sugar whereas the Indian mills have stocks of only white currently. As the crushing of new crop of sugarcane begins in October, mills will be able to supply raw sugar to the international market.

The sugarcane crushing season is about to begin & Sugar mills will start the 2019 crushing season with a huge backlog of unsold stock & huge arrears. Several farmers are yet to get their arrears from the previous season. The outstanding arrears are now Rs 16,600 crore against the peak of Rs 23,232 crore in

May-end. Problem of pending payments is particularly acute in UP, which accounts for 64% of the total outstanding arrears.

Brazil is expected to produce 2.7 million mt of sugar in the North-Northeast region and 27 million mt in the Center-South region, yielding 29.7 million mt of sugar for CY 2018-19, which runs from April-March in the North-Northeast region, and October-September in the Central-South region, according to the JOB report. The CS Brazil production figures would be 9.1 million mt lower than CY 2017-18 levels, according to the report. Brazil is expected to produce 31.2 billion liters of ethanol in the same period, including 29.2 billion liters in the CS region. The expected ethanol production in the CS region would break the previous record of 28.2 billion liters set in 2015-16, according to the report.

The central government has set minimum selling price of Rupee 29/kg along with prescribing a monthly release quota. As a combined result of both the decisions, ex-mill prices have been ruling in the range of Rupee 30-33/kg. However, sugar mills from Uttar Pradesh, where sugar production has been rising every year, are keen to sell more sugar. It will help them clear the cane price arrears. But, sugar industry of Maharashtra thinks that release mechanism is necessary for the survival of small-sized sugar cooperatives.

As per the Agriwatch estimate, India's sugar production is expected to rise to 355 LT in 2018/19 as the country is expecting a good cane crop this marketing year particularly from the state of Uttar Pradesh & Maharashtra. Agriwatch is expecting Maharashtra to produce 8-10% of more sugar in 2018-19 (01st October, 2018 -30th September, 2019). In addition, Uttar Pradesh is also expected to produce a large quantity of sugar this year too due to a surge in cane area, yield and sugar recovery.

NCDEX Sugar (M grade) Future Quotes (At 05:00 p.m. as on 05-09-2018)
