

## Sugar &Gur Domestic & International Fundamentals

### Recent Update:

**Sugar prices in most of the markets were witnessed steady to firm on Friday.** After the announcement of the export incentives for sugar millers in the country, Sugar prices have risen up to Rs 20-50 per quintal at the wholesale market Sugar market ruled firm on higher festival demand. Prices at the Vashi wholesale market increased by ₹10-20 a quintal tracking firm mill tender rates.

**Sugarcane production is forecast to decline 4% to 130 million tonnes in 2018-19, due to reduced average yields after less rain fell than expected in major growing areas, according to an attache report published in the USDA.** Sugar production for the same period is expected to decrease 6% from a record 14.7 million tonnes in 2017-18 to 13.8 million tonnes. The USDA attache in Thailand said in the Sept 27 report that during the first half of 2018, sugar consumption was at 1.3 million tonnes, 6% lower than the same period last year. As the third-largest producer of sugar after Brazil and India, Thailand joined the growing list of regions implementing taxes on sweetened beverages in 2017, in an effort to reduce consumption of sugary drinks, for 2017-18, sugar exports are forecast to reach a record 10.5 million tonnes after stronger-than-expected sugarcane production led to lower raw sugar prices. Raw sugar exports are forecast to nearly double in 2017-18, while white and refined sugar exports will likely increase 15% to 4.5 million tonnes, according to the report.

**Indian sugar mills may be able to export only 3 million tonnes (mt) of sugar and not 5 mt as stipulated by the government,** since the international prices of the sweetener is expected to remain weak during the season that has just commenced on account of expected bumper production in Thailand and the European Union, a report from research and ratings agency Crisil said on Wednesday.

### Weather Update:

**06<sup>th</sup> Oct ♦** Heavy to very heavy rain likely at isolated places over Tamilnadu & Puducherry, Lakshadweep and Kerala and heavy rain at isolated places over Andaman & Nicobar Islands, Coastal & South Interior Karnataka

The Indian Meteorological Department (IMD) defines average, or normal, rainfall as between 96 percent and 104 percent of a 50-year average of 89 cm for the entire four-month season. The IMD adopted a so-called dynamic model, based on a US model tweaked for India, for the first time last year to improve the accuracy of its forecasts. The IMD had predicted that the June-September monsoon, crucial

for a host of cash and food crops in India, will set to start receding from the northwest from Saturday onwards. The monsoon usually starts withdrawing in the first week of September, but this year it has

been delayed by nearly four weeks, Meanwhile, an extraordinarily dry spell in the month of September has meant an overall deficit of roughly nine percent in the Southwest Monsoon.

### **Previous Updates:**

***Drought-like conditions delayed sugarcane planting in Maharashtra and other parts of peninsular India that will substantially reduce 2019-20 sugar production of India and help ease pressure on global sugar prices as India begins export of surplus in a couple of years. World sugar prices are under pressure as India will begin export of its surplus sugar production. For 2018-19 sugar year from October to September, Maharashtra government has already reduced the production estimate from 10.5 million tonnes to 10 million tonnes,***

***The Thai Sugar Millers Co. Ltd expects the 2018/19 cane crop to reach only 120-125 mln tonnes against over 135 mln last season. Russian farmers harvested sugar beet from 554,200 ha as of October 3, or 50% of the area sown, according to the Ministry of Agriculture.***

***The government has decided to raise the amount of subsidised loans to sugar mills to expand their ethanol production to Rs 6,139 crore, up 38% from Rs 4,440 crore announced earlier, an official source told FE. The lure of subsidised loans and a recent hike in prices of ethanol meant for blending with petrol, have prompted dozens of sugar companies to plan capacity expansion to produce more ethanol. As many as 114 sugar units belonging to various companies have been selected by the food ministry to avail of the subsidised loan.***

***In Tamil Nadu, with poor rainfall hitting sugarcane production for the last six years, capacity utilisation dropped to 27% and production in 2017-2018 was just 0.7 million tons. It is expected to be 0.85 million tons in 2018-2019 and capacity utilisation at about 32 %. With lower capacity utilisation, the cost of production of sugar for TN mills will be higher by Rs 10 a kg compared to mills in other States.***

***The 1<sup>st</sup> advance estimate of production of sugarcane for 2018-19 have been released by the Department of Agriculture, Cooperation and Farmers Welfare on 26<sup>th</sup> September, 2018. The Production of Sugarcane is estimated at 383.89 million tonnes which is higher by 6.99 million tonnes than the last years production of 376.90 million tonnes. Further, it is higher by 41.85 million tonnes than the average production of last five years.***

***The Union government on last week announced a Rs 5,500 crore package for the sugar industry, including over two-fold jump in production aid to cane growers and transport subsidy to mills for exports. The Centre will provide assistance to mills by compensating expenditure towards internal transport, freight, handling and other charges to facilitate 5 million tonnes (MT) export during the 2018-19 (October-September).***

***A transport subsidy of Rs 1,000 per tonne will be given for mills located within 100 kms from the ports, Rs 2,500 per tonne for mills located beyond 100 kms from the port in the coastal states and Rs 3,000 per tonne for mills located in other than coastal states or actual expenditure, whichever is lower.***

**Raw sugar futures on ICE rebounded on short-covering on Friday** after plunging to 10-year lows in the prior session. Further reports of dry weather issues in some producing regions did not attract enough support to prevent raw sugar futures heading 'south' again this week.

**Sugarcane farmers are currently** battling two problems. On one hand they cannot get the payment of cane. If he is getting delayed then he too will be delayed. At the same time the ground water level is declining. It is also increasing the cost of production. The main reason for not getting the payment from time to time is that the price of sugarcane is fixed by the government whereas sugar mills have to be sold at the Chinese market price.

**With international sugar prices ruling at a decade's low due to surplus supplies, sugar millers from Maharashtra** have asked the state government to make it mandatory for mills to produce raw sugar during the first two months of the crushing season beginning October 1.

**The Union Cabinet did not consider Wednesday Rs 4,500 crore plan to more than double the production assistance** paid to sugarcane farmers and transport subsidy to sugarNSE 0.00 % exporting mills. The Cabinet Committee on Economic Affairs (CCEA) may take up the food ministry's proposal next week, they added. The ministry has proposed sharp increase in production assistance to farmers to Rs 13.88 per quintal for 2018-19 marketing year (October-September) from Rs 5.5 at present. The proposal to raise production assistance and transport subsidy of up to Rs 3,000 per tonne to mills for exports of five million tonnes of surplus sugar is part of the government plan to clear more than Rs 13,500 crore arrears sugar mills have towards farmers. Yesterday, sources had said the government will have to bear about Rs 4,500 crore on account of these measures to help sugar mills and cane farmers.

**As per the Agriwatch estimate, India's sugar production is expected to rise to 355 LT** in 2018/19 as the country is expecting a good cane crop this marketing year particularly from the state of Uttar Pradesh & Maharashtra. Agriwatch is expecting Maharashtra to produce 8-10% of more sugar in 2018-19 (01st October, 2018 -30th September, 2019). In addition, Uttar Pradesh is also expected to produce a large quantity of sugar this year too due to a surge in cane area, yield and sugar recovery.
