

Sugar &Gur Domestic & International Fundamentals

Price Outlook:

- **Sugar Mills are quoting lower prices now on the back of poor demand as buyers have already made purchases for the festival.** Increased selling pressure on domestic mills due to high sales quota for November also weighed on prices. The government has restricted sales by sugar mills in the country at 2.2 mln tn for November in a bid to trim supply in the market. Sugar mills having distilleries with ethanol production capacity which divert B-heavy molasses to produce ethanol and thereby sacrifice sugar, shall be eligible to sell additional quantity of sugar in addition to the quantity of white/refined sugar prescribed for domestic sale. Prices of sugar, however, are likely to rise later this month on the back of renewed demand and due to a cut in production estimate for 2018-19 (Oct-Sep) by the Indian Sugar Mills Association.

Recent Update:

- **The U.S. Department of Agriculture, in its Nov. 8 World Agricultural Supply and Demand Estimates report, lowered from October its forecast for 2018-19 U.S. beet sugar and total sugar production, but also lowered forecasts for domestic sugar use.** For the current year (2018-19), beet sugar production was lowered 262,000 short tons, raw value, to 4,974,000 tons, down 5% from the October forecast and down 5.8% from record high production in 2017-18 of 5,279,000 tons. Cane sugar production was forecast at 4,041,000 tons this year, up 15,000 tons from October and up 27,000 tons from 2017-18. Imports were left unchanged from October, resulting in total supply forecast at 13,809,000 tons, down 268,000 tons from October due to lower production and lower beginning stocks, forecast at 1,993,000 tons.
- **Total deliveries in 2018-19 were forecast at 12,320,000 tons, down 85,000 tons from October, with deliveries for food at 12,175,000 tons, down 75,000 tons, or 0.6%, from October but up 1.1% from 12,048,000 tons in 2017-18, which was lowered by 52,000 tons from October.** The ending stocks-to-use ratio for 2018-19 was forecast at 11.3%, down from 12.7% projected in October and compared with 16% in 2017-18. The U.S.D.A. is expected to increase allowed imports from Mexico in the December WASDE as outlined in agreements between the two countries, which requires a minimum 13.5% ending stocks-to-use ratio.
- **Sugar stocks rallied up to 8 per cent after reports that India in 2019 will resume exporting raw sugar to China,** as it eyes overseas markets to clear surplus stocks that have muted prices and created financial distress in mills. Triveni Engineering rallied 7.74 per cent, followed by Dalmia Bharat Sugar (up 5.22 per cent), Ugar Sugar (up 5 per cent) and Dhampur Sugar (up 4.90 per cent).

Weather Update:

12th Nov♦ No weather warning

- In October, India got a paltry 44% of the month's average—the lowest since 1976.
- An erratic monsoon, such as the one this year, poses extensive challenges for adaptation.

- *Maharashtra, which has declared drought in 42% of its area, is in the throes of a groundwater crisis.*
- *Experts have rung warning bells about the possible impacts of the brewing El Niño.*

Previous Updates:

- **Ministry of Commerce said on Thursday that India will start exporting raw sugar to China from the beginning of next year.** This step will help to bridge the trade deficit with neighboring countries. In a statement, the ministry said, "An agreement has been made for the export of 15,000 tonnes of raw sugar between the Indian Sugar Mill Association (ISMA) and the Chinese government's public sector undertaking, Kauffo." It has been reported that China plans to import 2 million tonnes of raw sugar from the beginning of next year. The Ministry said, Raw sugar is the second product after non-basmati rice which will be imported from China, India, it is the step taken to reduce trade losses of 60 billion dollars with China." India had exported US \$ 33 billion in the year 2017-18, while it imports 76.2 billion US dollars.
- **According to the operational data of Ukr sugar Association, as of November 5, 1,03 million tonnes of sugar were produced.** There are 39 sugar refineries in operation and one refinery has already completed the production season. 7,9 million tonnes of sugar beet have been processed, which is 2,5% less than last year's figures. As it was predicted earlier, according to the climate conditions, this year sugar content is lower than last year's level — 16,26% to 17,21%, sugar output is lower too — 13,31 to 14,24%. As of November 5, 231 thousand hectares of sugar beet were harvested, accounting for 83% of the total harvested areas. Most of sugar beet crops were harvested in Vinnytsia, Poltava and Ternopil regions.
- **Brazilian mills are expected to increase the amount of cane they allocate to sugar production next season due to better prices for the sweetener, which will lead to a rise in sugar output of 3 million tonnes,** broker and consultancy INTL FCStone said on Wednesday. FCStone expects Brazil's center-south to produce 29.6 million tonnes of sugar in the 2019/20 season that starts in April versus 26.3 million tonnes in 2018/19, which was the country's smallest output in years and almost 10 million tonnes lower than in the previous crop.
- **About 10 sugar mills have started crushing operations in UP and another seven-eight are likely to start this week.** The government is confident that by mid-November, a majority of the state's 119 mills would be operational, including 94 private mills, 24 cooperatives and one sugar corporation plant. When UP had clocked sugar production of over 12 million tonnes (mt) with farmers' payables touching Rs 354 billion.
- **Raw sugar futures in New York ended with strong gains in the last session ahead of the weekend with general strength across commodity markets as well as a weaker US dollar supporting values.**
- **As crushing operations in the country's top two sugarcane producing states of Maharashtra and Uttar Pradesh have begun,** the farmers' outstanding of about Rs 125 billion, pertaining to the 2017-18 season, is likely to be reduced by almost 33 per cent, or Rs 40 billion, by the end of November.

- *The Haryana state government is likely to continue with last year's State-Advised Price (SAP) of sugarcane, apparently under pressure from private sugar mills owned by influential politicians. The cane crushing season is expected to start in the next two weeks and the mills have even refused to pay the last year's SAP. The seven private sugar mills have announced that they will not pay a single rupee more than the Fair and Remunerative Price (FRP) of Rs 255 per quintal of cane. They say if the government insists on giving SAP to the growers, it would itself have to pay the differential price between FRP and the SAP (Rs 55 per quintal), as was done three years ago.*
