

Sugar & Gur Domestic & International Fundamentals**Recent Update:**

The cooperative sugar mills in Haryana have so far produced over 13.97 lakh quintals of sugar by crushing 152.57 lakh quintals of sugarcane during the current crushing season. So far, the average rate of sugar recovery by the cooperative sugar mills has been registered at 9.53 per cent.

March NY world sugar #11 (SBH19) on Tuesday closed down -0.10 (-0.78%) and March ICE London white sugar (SWH19) closed down -3.20 (-0.93%). Sugar prices moved lower on Tuesday after Petrobras cut Brazil wholesale gasoline prices to 1.4907 reals/liter from 1.5104 reals/liter, which is negative for ethanol and may prompt Brazil's sugar mills to divert more cane crushing toward sugar production rather than ethanol production, thus boosting sugar supplies.

Sugar millers in India are urging the government to increase the benchmark price of the commodity to help them pay off about \$2.7 billion they owe to farmers. The Indian Sugar Mills Association sent a letter to the government asking for the minimum selling price to be raised to Rs 35-36 (\$0.49-\$0.51) a kilogram at factory gates from Rs 29 currently.

Weather Forecast for tomorrow:

Cold wave conditions at isolated pockets very likely over Madhya Pradesh, Vidarbha and Odisha.

◆*Cold day conditions at isolated pockets very likely over Madhya Pradesh and Vidarbha.*

◆*Thunderstorm accompanied with hailstorm very likely over Jammu & Kashmir, Himachal Pradesh, Punjab, Haryana and West Rajasthan.*

◆*Strong wind speed reaching 35-45 kmph likely along & off south Tamilnadu coast, Gulf of Mannar and Comorin area.*

Previos Updates:

The pace of cane crushing in Thailand eased fractionally during the past week but daily cane crushing volumes are still about 1.2 mln tonnes. While, Mexico's sugar production crossed the 1.5 mln-tonne mark, though volumes are still behind in year-ago levels, official data showed.

Data from the Sugar Directorate indicate that the volume of the sweetener imported in 2018 declined to 284,169 from 989,619 tonnes in the previous year when acute shortage compelled the State to remove import duty. Excess sugar attracts import duty at the rate of 25 percent if obtained from 19-member Comesa bloc and 100 percent if it comes from outside.

The prices of M-30 and S-30 grades of sugar remains steady in Kolhapur market on Friday at Rs 2940 and 2900 respectively. March NY world sugar #11 on Thursday closed up +0.01 (+0.08%) and March ICE London white sugar closed up +0.50 (+0.14%). Sugar prices closed higher Thursday on signs of smaller sugar production in Brazil after Unica reported 2018/19 Brazil Center-South sugar production through mid-Jan was down -26.5% y-o-y at 26.350 MMT, with the percentage of cane used for sugar production

falling to 35.5% from 46.9% last year and the percentage of cane used for ethanol production rising to 64.5% from 53.1% last year.

Indian Sugar Mills Association (ISMA) has lowered India's 2018-19 sugar production estimate by 2.5% to 307 lakh tonnes from first advance estimate of 315 lakh tonnes issued in October 2018. ISMA has procured the satellite images of cane area already harvested and remaining un harvested area in the fields, across the country during mid-season i.e. in the second week of January 2019. On the basis of these images of harvested and balance area, trend of yields and sugar recoveries achieved till now as also expected yield/sugar recovery in the balance period of the sugar season, sugar production in the current season is estimated to be around 307 lakh tonnes, against the first advance estimates of 315 lakh tonnes released by ISMA in October 2018. This is after considering estimated diversion of 5 lakh tonnes of sugar into production of ethanol through 'B' heavy molasses.

Weekly Outlook:

Indian Sugar market traded week during last week. On hopes of increase in floor price which is currently at Rs 2,900 per quintal. We expect sugar prices may trade down on good physical supplies from mills are continuing in the physical market due to imposed stock limit on mills. Prices are supportive after Jan due to the expectation of weak cane crush this season in the key producing states of UP, Maharashtra and Karnataka. The release quota for January month of 18.50 LMT little lower than December month, since UP and Maharashtra states demanding extra sales quota, due to the low sales quota, mills are unable to sell their sugar and repay the farmers on time.

NCDEX Sugar (M grade) Future Quotes (At 05:00 p.m. as on 20-12-2018)
