

Sugar & Gur Domestic & International Fundamentals**Recent Update:**

Sugar M-30 Kolhapur Spot prices have traded with no momentum and closed at INR 2975 in the last trading day. March NY world sugar #11 (SBH19) on Friday closed down -0.02 (-0.16%) and March ICE London white sugar (SWH19) closed down -3.80 (-1.13%). Sugar prices moved lower Friday with Mar London sugar at a 5-week low due to weakness in the Brazilian real. The real tumbled to a 1-week low against the dollar Friday, which encourages Brazil's sugar producers to boost exports.

Weather Forecast for tomorrow:

Fairly widespread rain and snow is expected over Jammu and Kashmir, Himachal Pradesh and Uttarakhand. Light to moderate rain and thundershower with few heavy spells is possible over Punjab, Haryana, West Uttar Pradesh and scattered over Delhi and North Rajasthan. Hailstorm is also possible over parts of these states. Light rain may also commence over parts of Bihar. Light to moderate rain will occur over Chhattisgarh and parts of Vidarbha. Day temperatures will drop across the northern plains.

Previos Updates:

Payment arrears to Maharashtra cane growers during the current crushing season that started last October at over Rs 4,800 crore already, cash-strapped sugar mills in Maharashtra have come up with a new formula to address the problem. They will, henceforth, pay about 20 per cent of dues in the form of sugar. This means that for every tonne of cane supplied, mills will give 17 kg of sugar as payment.

March NY world sugar #11 (SBH19) on Tuesday closed down -0.03 (-0.23%) and March ICE London white sugar (SWH19) closed up +1.90 (+0.56%). Sugar prices were undercut Tuesday by an updated weather forecast from Somar Meteorologia calling for rain this week in south to central Brazil. Mar NY sugar earlier posted a 1-week high in overnight trading on concern about dry conditions in Brazil's Center-South, its largest sugar-producing region.

Sugar production has increased by 8 percent as on January 31, 2019, to 185.19 lakh tonne during the current sugar season (SS), against 171.23 tonne in the year-ago period. However, considering the trend of yields, recoveries and as well as the diversion of some 'B' heavy molasses to ethanol, sugar production in the current season is ISMA estimated to be 307 lakh tonne, a 5-6 percent lower than the 325-lakh tonne output in the previous season,

Cane price arrears across the country had reached about Rs 20,000 crore at the end of January 2019. Considering the pace of crushing in the remaining three peak months of current SS and if the current average all India domestic ex-mill price remains at Rs 29-30 per kilo, millers might not be able to clear the dues on time. further sugar exports were also not happening at the desired pace. Several mills are either not voluntarily willing to export sugar against their allocated export quotas or do not find it viable enough to do so. Therefore, to ensure that all mills fulfil their allocated export quotas, the government should enforce the quotas.

Sugar millers in India are urging the government to increase the benchmark price of the commodity to help them pay off about \$2.7 billion they owe to farmers. The Indian Sugar Mills Association sent a letter to the government asking for the minimum selling price to be raised to Rs 35-36 (\$0.49-\$0.51) a kilogram at factory gates from Rs 29 currently.

According to a report published in TimesofIndia.com, 36 sugar factories in Kolhapur and Sangli district have deposited Rs 2,207 crore in the bank accounts of farmers. The factories in two districts still owe Rs 1,207 crore to the farmers. Total amount payable to farmers in Kolhapur and Sangli district is Rs 3,114 crore till January 31. It has been almost three months of crushing commencement, and still many mills have yet not paid the first installment. The rule mandates that FRP amount should be deposited to the farmers' bank accounts within 14 days after the sugarcane harvest is handed over to the factory owners.

Indian Sugar Mills Association (ISMA) has lowered India's 2018-19 sugar production estimate by 2.5% to 307 lakh tonnes from first advance estimate of 315 lakh tonnes issued in October 2018. ISMA has procured the satellite images of cane area already harvested and remaining unharvested area in the fields, across the country during mid-season i.e. in the second week of January 2019. On the basis of these images of harvested and balance area, trend of yields and sugar recoveries achieved till now as also expected yield/sugar recovery in the balance period of the sugar season, sugar production in the current season is estimated to be around 307 lakh tonnes, against the first advance estimates of 315 lakh tonnes released by ISMA in October 2018. This is after considering estimated diversion of 5 lakh tonnes of sugar into production of ethanol through 'B' heavy molasses.

Weekly Outlook:

Indian Sugar markets were weak during the week. We expect sugar prices may trade lower as good physical supplies from mills are continuing in the physical market. Prices will be supportive in coming days due to the expectation of weak cane crush this season in the key producing states of UP, Maharashtra and Karnataka. After demanding the UP and Maharashtra sugar mills on extra sales quota the government has released 21.00 Lakh MT of sugar for Feb higher than the previous month. As per the Agriwatch estimate, spot sugar prices (M grade) in benchmark Kolhapur market are likely to range between Rs 2950–Rs 3300 per quintal for next week.
