

Sugar & Gur Domestic & International Fundamentals**Recent Update:**

The firm trend has been seen in the sugar wholesale market prices on Tuesday. Mills are warned by the government to sell sugar not below MSP in all sugar producing states. The sudden rise in temperature and improved bulk and retail demand from cold drinks and juice makers lifted sugar prices by Rs.10-30 at major markets. In contrast, Kolhapur sugar mill price remained below MSP at Rs.3050/q whereas in Khatauli market price is trading at 3205 INR per quintal up by 30 INR from previous day.

Brazil exported 1.133 mln tonnes of sugar, raw value, in March 2019, down from 1.214 mln in February and the lowest level for the month of March since 2012 compared with 1.802 mln tonnes of sugar exported in March 2018.

Weather Forecast for tomorrow:

Heat wave to severe heat wave conditions are very likely in some parts of Madhya Pradesh and Marathwada during next 2-3 days. Heat wave conditions are also likely to prevail in some parts/at isolated pockets over Rajasthan, Gujarat, remaining parts of interior Maharashtra, Chhattisgarh, Uttar Pradesh and southern parts of Haryana upto 4th April, and over Rayalaseema, south Coastal Andhra Pradesh and Tamilnadu during next 2 days.

Previous Updates:

ICRA the rating agency released their revised prediction for total sugar production for 2019-20 at 30.7 million tonnes from its earlier estimate of 31.5 mt due to a decline in Uttar Pradesh, the largest growing state. Also the production may be further hit due to the diversion of 'B' heavy molasses and sugarcane juice away from sugar into ethanol.

114 mills in India are expanding their ethanol capacities, which in the next 24 months will add 90-crore litres of capacity. In 2018-19, Brazil converted 65 per cent of its cane into ethanol directly. This helped it to keep sugar production at the required level and also reduce significantly its oil import bill at a time when crude oil prices rose sharply.

Only 27 mills were operating in the center-south region in the first half of March, compared with 50 mills at this time last year according to Unica said on Tuesday. Center-south mills crushed 1.59 million tonnes of cane in the first half of March, 53 percent less than in the same period a year earlier. Due to dry spell in December and January, followed by ample March rains which delayed crushing in mills. Sugar production was marginal at 9,000 tonnes (80 percent less than previous year). Ethanol production was 142 million liters (23 percent less).

Pakistan bagged an opportunity by winning a 300,000-tonne sugar export quota from China taking a lead over India, according to traders. For which India has been waiting since long to bag the export quota from China.

Indian traders have contracted 2.2 million tonnes of sugar for exports as of March 7, according to industry officials. Maharashtra has exported about 800,000 tonnes of sugar, including third-party exports. Uttar Pradesh has exported 300,000 tonnes and Karnataka too exported 300,000 tonnes.

According to data compiled by the Cane Commissioner's Office in Lucknow, as on March 22, the state's sugar mills have bought cane worth Rs 24,888.65 crore during the current 2018-19 crushing season (October-September) at the state government's fixed ("advised") price of Rs.315 per quintal for normal and Rs.325 per quintal for early-maturing varieties. They were to pay Rs.22,175.21 crore within the stipulated 14-day period of taking cane delivery. But the actual payments have been only Rs.12,339.04 crore, translating into arrears of Rs.9,836.17 crore. Adding the dues of Rs.238.81 crore from the previous 2017-18 season takes the total to Rs.10,074.98 crore. Of the Rs 10,074.98 crore, as much as Rs.4,547.97 crore, or over 45 per cent, is due from mills in just six constituencies: Meerut, Baghpat, Kairana, Muzaffarnagar, Bijnor and Saharanpur.

The expected percentage of sugarcane crushing for sugar production to be 38.3% in Brazil's key Center-South region in the 2019-20 season, according to analysts surveyed by S&P Global Platts on Friday. The amount of sugarcane crushed in 2019-20 to total 573.5 million mt, up 0.8% year on year from Platts Analytics' estimate for the current season. The 2019-20 sugarcane season will officially start from April 1 in the Center-South, the world's largest sugarcane- and sugar-producing region.

The Centre on Wednesday asked sugar-producing States to ensure that mills do not sell refined sugar below the prescribed minimum selling price (MSP) of Rs 31 per kg as this was against the Sugar (Price Control) order, 2018. As we know that some sugar mills are selling refined sugar below MSP, while some others have made MSP inclusive of GST, which is against the directives.

According to ISMA, the arrears of UP mills have further increased to about Rs.12000 crore (on SAP basis), while pan India outstanding are estimated at more than Rs.24000 crore according to ISMA. While the union government has extended the soft loan window for the sugar sector by another 4 weeks.

Sugar mills across the country have produced 273.47 lakh tonnes (LT) of sugar till March 15, nearly 6 per cent more than 258.2 LT produced during the corresponding period in the previous sugar season, said a release from the Indian Sugar Mills Association (ISMA) on Monday. While 154 mills have closed crushing operations whereas 373 are still crushing.

In the ongoing sugarcane crushing season of 2018-19, the 119 operational UP sugar mills-94 private, 24 co-operative, and one state - had procured cane worth Rs 23,200 crore from farmers and paid Rs 11,350 crore, thus leaving an unpaid portion of Rs 11,850 crore. Besides, mills have to make a payment of Rs 290 crore for the 2017-18 season.

Weekly Outlook:

Indian Sugar markets remained weak during last week compared to first two days of this week. We expect sugar prices may trade lower as good physical supplies from mills are continuing in the physical market. Prices will be supportive in coming days due to the expectation of weak cane crush this season in the key producing states of UP, Maharashtra and Karnataka which contribute 55% of sugar. As per the Agriwatch estimate, spot sugar prices (M grade) in benchmark Kolhapur market are likely to range between Rs 3050-Rs 3200 per quintal for next week.
