

**Sugar & Gur Domestic & International Fundamentals****Recent Update:**

**Mixed trend was dominated in Indian sugar market across India on Monday.** The prices are expected to be bullish in coming days. Prices might remain at higher side if government accepts the rise in the minimum support price and creates export opportunities to relieve the sugar millers from clearing the increasing 2 years mounting arrears to be paid to cane farmers. Kolhapur sugar market prices stood same at Rs.3120 whereas in U.P's Khatauli market at Rs.3415INR.

**Maharashtra sugar millers have opted to export sugar through third party quota at Rs. 28-28.5/kg selling 3-4 lakh tonnes sugar.** Tepid demand of sugar in the domestic market, millers are not able to sell its sugar at MSP. This has forced them to store sugar stocks in open and as monsoon is arriving very soon according to IMD, therefore, selling sugar on third party export quota over and above their own export quota, helped the mills liquidate the excess sugar with them.

**Weather Forecast:**

The monsoon is likely to be delayed this year as its arrival expected on June 7, five days after its normal onset date, the India Meteorological Department said on Wednesday. This year, the statistical model forecast suggests that the monsoon onset over Kerala is likely to be slightly delayed according to IMD. The dreaded El Nino, which often disrupts global weather patterns including the monsoon, is likely to be neutralised by a local phenomenon in the Indian Ocean, which can lead to good rainfall in the June-September season, top meteorologists said.

**Previous Updates:**

**Government fixes June sales quota slightly higher at 21.5 LT to each of 534 mills** in the country against 21LT for last month along with added incentivized quota to those mills who have completed their export targets under MIEQ Quota.

**Sugar domestic consumption is likely to increase by 2-3% in this sugar season to 258 lakh tonnes** this year according to ICRA in its recent report. Sugar production in 2019 is expected to be marginally higher at around 32.5-33.0 million MT higher by at least 6.5-7.0 million MT when compared to 32.2 million MT in 2018.

**Haryana cooperative sugar mills received Rs.350 crore on Tuesday** to clear arrears and paying off to sugarcane farmers for crushing season of 2018-19. Payments of Rs.1,098.38 crore had been made till now and outstanding dues is decided to pay in the next coming week.

**The centre has asked the sugar mills to calculate the cost of sugar production which may range around Rs.34 but the sources says that the stress would be relieved if the prices are finalized at Rs.35-36.** The government has finally came with initiation for the solution regarding setting of the minimum support price which is much lower than the cost of sugar production.

**Banks have sanctioned a soft loan of Rs.689 crore 2 lakh 79 thousand to 42 sugar mills in Maharashtra** to aid the factories to clear the pending cane arrears due to glut in production resulting in depressed prices. The Central government will bear the interest for one year on this loan.

*India's sugar production is likely to decline 8.4 per cent to 30.3 million tonnes for the second straight year in the 2019-20 marketing year that would begin from October because of likely fall in sugarcane output due to unfavorable weather in major producing states, a latest USDA report said.*

*This year prices of oil rose 35 per cent, whereas sugar fell 5 per cent, and hike in oil prices led to increasing values for gasoline in Brazil. Due to this demand and prices for ethanol raised. Sugar production in Brazil is also likely to fall from expected production as mills are likely to allocate less cane for sugar.*

*The jaggery production in Visakhapatnam district is likely to come down at least by 50% compared with the last season. As a result of this, the arrival of jaggery at the Anakapalle jaggery market in Vizag district—the second biggest market in the country—has registered a downward trend.*

*The Maharashtra government informed that water storage in Aurangabad Division, which comprises Aurangabad, Beed, Hingoli, Parbhani and Osmanabad districts, was 0.43 per cent as against 23.44 per cent at the same time last year affecting the sugarcane production in the coming season.*

*Farmers have started uprooting sugarcane in the severely drought affected regions of Maharashtra to feed their animals. This is expected to hit sugarcane growth. Apart from this, sugarcane has also been damaged due to heat waves in the state. Moreover, farmers have decided to switch to other crops like soybean and pulses amongst others to boost their farm income. All these factors are set to bring down the overall cane sowing area by 10-15 per cent in the next sugar season (SS) October 2019 to September 2020.*

*In the current sugarcane crushing season (October to September), the country's sugar exports have increased to 21.29 lakh tonnes, which is much higher than last year. In the marketing year 2017-18, about 5 lakh tonnes of sugar was exported. Mills have to export 5 million tonnes of sugar. To reduce the excess payment of sugarcane farmers and reduce the excess of stock on sugar mills, the government is giving a lot of incentives for sugar exports. It has also been noticed on the export figures.*

*AISTA Chief Executive Officer RP Bhagaria said that till date, there has been an export agreement for about 30 lakh tonnes of sugar, out of which 28.53 lakh tonnes have been sent from sugar mills.*

*The food ministry yesterday released the notification allocating 21 LMT monthly sugar quota to each of 534 mills in the country. Those sugar mills which have completed their 75% to 100% export targets under MIEQ (Minimum Indicative Export Quota) allotted to them for the sugar season 2018-19 have been given incentive in the form of additional allocation @ 10% of their normal allocation for the month of May 2019.*

### Weekly Outlook:

**Indian Sugar markets remained firm during last week.** We expect sugar prices may trade firm due to good demand in the market. Prices will be supportive in coming days due to the expectation of weak cane crush this season in the key producing states of UP, Maharashtra and Karnataka which contribute 55% of sugar. As per the Agriwatch estimate, spot sugar prices (M grade) in benchmark Kolhapur market are likely to range between Rs 3120–Rs 3290 per quintal for next week.

### NCDEX Sugar (M grade) Future Quotes (At 05:00 p.m. as on 20-12-2018)
