

Daily Sugar & Gur Fundamental Report

18th June, 2019

Sugar & Gur Domestic & International Fundamentals

Recent Update:

Indian sugar market across India was weak on Monday. The prices are expected to remain down for coming few days due to less demand and the prices in UP is likely to remain bearish due to incoming supply of sugar from Maharashtra. Prices might remain at higher side if government gives the final decision for the rise in the minimum support price and creates export opportunities to relieve the sugar millers from clearing the increasing 2 years mounting arrears to be paid to cane farmers. Kolhapur sugar market prices stood same at Rs.3120 whereas in U.P's Khatauli market at Rs.3370INR.

Indian Sugar Mills Association that India's sugar mills expect to export a record 7 million MT of sugar in 2019/20 to reduce its huge stockpiles, up from 3 million MT in 2018/19.

Weather Forecast:

Moderate to heavy rain and thundershowers with strong winds will occur in Odisha, Chhattisgarh and northeastern states. Dust storm and thundershowers with strong winds will occur over Punjab, Haryana, Delhi, West Uttar Pradesh and Madhya Pradesh. Rain and thundershowers with isolated snowfall are likely over Himachal Pradesh and Uttarakhand along with one or two places of Jammu and Kashmir. Light to moderate rains will occur in parts of Gujarat, Maharashtra, Andhra Pradesh, Telangana, Kerala, Coastal Karnataka and Bay Islands. Eastern parts of Bihar, Jharkhand and West Bengal will also witness scattered rains. Heat wave will occur over Bihar, parts of Jharkhand and East Uttar Pradesh.

Previous Updates:

There are rumours among the industry that government may take an action by raising the minimum support price by Rs.200 to Rs.3300 after the meeting held by Department of Food and Public Distribution on the hike of sugar prices to help the sugar industry to clear off the cane arrears and to discuss the long term reforms for the sugar sector.

After the glut at global level, it is expected a deficit of around 2-4 million global sugar. International futures market is likely achieve further gains after India reports for delay in monsoon which is highly affected in sugarcane producing states like Maharashtra and Karnataka. It is estimated that around 43% of India is affected by drought in 2019. Also the Brazilian real is getting stronger in Brazil which discourages exports from Brazil results in increase in international prices.

Sugar output this season is expected to be 3 year low due to dry weather, may decline to 28-29 million tonnes likely to support prices that drop around 20% last year. A lower harvest would trim a record domestic surplus, potentially curtailing exports and supporting global prices. The standing sugarcane crop in major producing states get rainfall at this phase of time but delay in monsoon in these states has hit the crop badly and deficient pre-monsoon rains has not supported the crop efficiently.

The data released by the Ministry of Agriculture, till first week of June area sown in sugar season 2019-20 stands at 47.85 lakh hectares as compared to 47.91 lakh hectares sown at the same time last year. The sugarcane cultivation in Maharashtra has declined around 18% to 8 lakh hectares as compared to 9.49 lakh hectares sown last year. Other major cane producing states such as Uttar Pradesh and Karnataka has registered a growth in acreages by 3% and 24% respectively.

Daily Sugar & Gur Fundamental Report

18th June, 2019

ISO's latest forecast depicted increase in global sugar surplus in 2018-19 to 1.83 million tonnes up from a previous estimate of 6,41,000 tonnes. This increase in surplus is majorly due to robust production India followed by Thailand along with fall off sugar consumption to 176.91 million tonnes from the previous forecast of 178.04 million tonnes in 2018-20.

According to the Maharashtra sources, in 2019-20 season, over 300LT less cane is expected for the crush to 650LT from 8.5 lakh hectares available cane as against 952LT from the 11 lakh hectares reported for 2018-19.

Maharashtra is likely to divert 25% of cane to ethanol production due to low prices of sugar, surplus stocks and pilling cane arrears. Maharashtra sugar commissioner has made a proposal to Chief Minister for the assistance of promotion of ethanol production from sugarcane juice in the state.

Weekly Outlook:

Indian Sugar markets remained steady during last week. We expect sugar prices may trade firm due to good demand in the market. Prices will be supportive in coming days due to the expectation of weak cane crush this season in the key producing states of UP, Maharashtra and Karnataka which contribute 55% of sugar. As per the Agriwatch estimate, spot sugar prices (M grade) in benchmark Kolhapur market are likely to range between Rs 3100–Rs 3250 per quintal for next week.
