

Sugar & Gur Domestic & International Fundamentals**Recent Update:**

Mixed trend was seen across Indian sugar markets on Thursday. The prices are expected to remain steady for coming few days due to less demand. Kolhapur sugar market prices stood same at Rs.3110 whereas in U.P's Khatauli market at Rs.3420INR.

Weather Forecast:

Moderate to heavy rains with few very heavy showers of rain will occur over Assam and Meghalaya. Light to moderate rains will occur over rest northeastern states, Sub-Himalayan West Bengal and Sikkim. Light to moderate rains with few heavy spells are expected over Coastal Karnataka, Konkan & Goa, and Gujarat. Scattered light to moderate rains will occur in parts of Madhya Maharashtra, Kerala, Telangana, Coastal Andhra Pradesh, parts of Chhattisgarh, South Madhya Pradesh, Odisha, Rayalaseema, parts of Tamil Nadu Gangetic West Bengal, parts of Jharkhand. Isolated rains are likely over hills of North India and Rajasthan.

Previous Updates:

Sugarcane production and yield is likely to decrease in the coming season 2019-20 in major states Maharashtra and Karnataka due to low moisture availability and absence of pre-monsoon rains. Maharashtra is prevailing from drought with around 40% of the state drought –prone.

The Indian government has approved to give the financial assistance to sugar mills for enhancement and augmentation of ethanol production capacity. Among all states, maximum number of mills under the scheme are covered in Maharashtra (30) followed Karnataka (12) and UP (6). The incentives on ethanol diversion will help the sugar industry to liquidate the stock piles in every state.

According to ISMA, this year sugar production is expected to reach 328 LT, 2 LT down from previous estimate. Sugar exports are expected to increase by 5 LT totalling to 35 LT this year. The officials have requested the government to make urgent proposals for sugar export to China. China being the neighbouring country is importing sugar from Brazil and Philippines.

Sugar production in U.P is likely to reach upto 11.82 MT against the previous estimates of 12.4 MT due to higher sugarcane acreage of 3.4 million ha and production of 224MT in 2018-19. Although recovery rate of UP this year was higher compared to previous year.

Strong demand for ethanol in Brazil that has prompted Brazil's sugar mills to climb up ethanol production at the expense of sugar production after Unica reported the percentage of cane crushed for ethanol production rising to a record 65.59% from 65.55% last year and that that Brazil's Center-South May domestic ethanol sales rose +50.6% y/y to 2.86 bln liters.

As on June 18th, Sugarcane arrears to farmers have reached Rs.18,958 crore (Oct,2018- Sep,2019) out of which Uttar Pradesh owes the maximum amount of Rs.11,082 crore followed by Karnataka (Rs 1,704 crore) and Maharashtra (Rs 1,338 crore). Surplus sugar production made the sugar prices depressed which adversely affected the liquidity of sugar mills.

In the coming week, monsoon is likely to reach southern states, Maharashtra, Odisha and Madhya Pradesh. IMD forecasted that monsoon would be near normal this year with total seasonal rainfall likely to be about 96% of average.

Brazilian real remains lower against the US Dollar. Therefore, sugar prices traded lower but higher ethanol prices and potential for appreciation in the Brazilian real against the US dollar could create a bullish movement for the sugar futures market over the coming weeks and months.

Reduced US corn harvest in 2019 is giving opportunity for Brazil to divert more sugarcane towards ethanol production as prices for cane ethanol may rise in the 2019-20 season. This scenario is likely to erase global sugar surplus of the last two years. US corn prices have risen 25% due to delayed corn planting and threatened production. Ethanol prices have jumped more than 20%.

Vietnam forecasts increase in sugar prices during the coming season usually because of predicted low production of sugar reduced by 2.5 million tonnes in the coming season. Governments of Southeast Asian nations are working to keep the sugarcane industry competitive and meet consumer's demand.

International and domestic market may remain firm in the coming season after a long phase of low prices in the sugar industry. It can be attributed that the major sugar producing countries like Brazil, India and Thailand are going to have low sugar production mostly due to diversion in ethanol and unfavourable weather conditions in India. In the latest meeting held in by ASEAN Sugar Alliance, reported that global sugar deficit of about 2.5 million tonnes in 2019-20.

Weekly Outlook:

Indian Sugar markets remained weak during last week. We expect sugar prices may trade steady due to no demand in the market. As per the Agriwatch estimate, spot sugar prices (M grade) in benchmark Kolhapur market are likely to range between Rs 3100–Rs 3200 per quintal for next week.
