

Sugar & Gur Domestic & International Fundamentals**Recent Update:**

Indian sugar prices showed mixed trend in almost all over markets on Saturday. The prices are expected to remain steady to low for coming few days due to less demand and higher sales quota as per the consumption. Kolhapur sugar market prices stood unchanged at Rs.3100 and may move below MSP whereas in U.P's Khatauli market at Rs.3270INR.

Brazil CS sugar production for 2019-20 season reached 42.4 mln tonnes till first half of June whereas by June 30th, 2.451 mln tonnes of cane have been crushed by Australia compared to 3.77 mln tonnes crushed by July last year.

Weather Forecast:

Light to moderate rain with few heavy spells can be seen over parts of Himachal Pradesh, Uttarakhand, East Rajasthan, East Gujarat, Konkan and Goa, West Madhya Pradesh, parts of Chhattisgarh, Vidarbha, North Telangana, North Coastal Andhra Pradesh, Coastal Karnataka, and North Kerala and Assam. Light to Moderate rains with isolated heavy spells will be seen over parts of Uttar Pradesh, East Madhya Pradesh, North Chhattisgarh, and Jharkhand. While scattered light to moderate rains will be seen over Punjab, Haryana, Delhi, North Rajasthan, Bihar, Gangetic West Bengal, Odisha, Sub-Himalayan West Bengal, and Sikkim, rest Northeast India, Madhya Maharashtra, and Interior Karnataka.

Previous Updates:

***Brazil expects rise in sugar and ethanol exports demand from European Union.** It was announced recently that an agreement has been reached on different terms, allowing 562 million liters of ethanol to enter the EU without a tariff every year, and 250 million liters to receive lower tariffs. Also, the tariff will be zero for 180,000 tonnes of sugar imports per year. This could bring the value of annual exports from Brazil to the EU to BRL 2 billion, up from BRL 600 million in the past.*

***Kisan Cooperative Sugar Mill from Uttar Pradesh has got permission from Central government to export 59,000 quintals sugar to Sri Lanka.** The government is planning over framing new sugar export policy to reduce surplus and address the concerns of the glut in sugar industry.*

***Kharif sowing of sugarcane crop was delayed in key growing states like Maharashtra, Karnataka.** The total Kharif planting reached 49.81 lakh hectare as on 28th June'19 down by 1.46 lakh ha compared to previous year (50.68 lakh ha) in 2018-19 season. It is expected to pick up the pace due to onset of monsoon in major growing states and the revival of standing sugarcane crop is now on positive side.*

***Export demand for sugar has been decreasing since last month, exporting around 31LT till May'19.** Exports are expected to reach upto 33-35LT till the end of this season (2018-19 SS). Domestic sugar prices are dwindling at or below MSP due to lack of demand against the huge stacks of sugar piles.*

***The food ministry has allocated July month's sales quota at 20.5 LT to each 534 mills in India lower than 21.5 LT in previous month.** Due to unsold stocks in the previous month and due to the possibility of less demand in July because of arrival of monsoon, less sales quota has been decided for this month.*

May month sugar exports of Brazil stood at 17.5 LT higher than previous month which was 12.2 LT (April) due to supportive Brazilian real at 308 \$/ton. The major export destination for Brazil were Algeria, China, Saudi Arabia, UAE and Bangladesh in the current season (April'19-Mar'20) for Brazil.

Unica reported last Wednesday that Brazil's Center-South mills sold 902 mln liters of hydrous ethanol in the domestic market in the first half of June, down -1.5% y/y. Weaker ethanol demand may encourage Brazil's mills to crush less cane for ethanol and more for sugar, thus increasing sugar supplies.

ISMA estimates production of about 282 lakh tons of sugar in the season 2019-20, which is about 47 lakh tonnes lower than the current 2018-19 SS production of around 329.5 lakh tonnes, down 14.26%. Uttar Pradesh is estimated to have sugarcane area at 23.60 lakh ha, as against 24.11 lakh ha in 2018-19. Maharashtra's cane area has estimated down by about 30% for 2019-20 SS, due to poor rainfall from September'2018 onwards and lack of pre-monsoon rainfall, followed by low reservoir levels, which adversely affected sowing of 15 month and 12 month crops. Sugarcane area in Karnataka has also decreased for 2019-20 sugar season to be about 4.20 lakh ha as against 5.02lakh ha in 2018-19, which is lower by about 16%. Sugarcane area in Tamil Nadu for 2019-20 has also decreased to about 2.30 lakh hectare as against 2.60 lakh hectare in 2018-19 SS.

As Indian government is encouraging mills to divert to ethanol from sugar production, as on 17th June'19, ethanol blending has increased around 10 times to 6.2% as compared to 0.67% in 2012-13 and 4.22% in 2017-18. The government plans to achieve 10% blending of ethanol in petrol by 2022 to boost agriculture sector, creating independency on energy imports and promoting the use of environment friendly fuel.

Weekly Outlook:

Indian Sugar markets remained weak during last week. We expect sugar prices may trade steady due to no demand in the market. As per the Agriwatch estimate, spot sugar prices (M grade) in benchmark Kolhapur market are likely to range between Rs 3100–Rs 3200 per quintal for next week.
