

Sugar & Gur Domestic & International Fundamentals**Recent Update:**

Mixed trend was seen in Indian sugar market on Tuesday. Overall the prices are expected to be firm in Indian markets. Kolhapur sugar prices stood higher at Rs.3300 and in U.P's Khatauli market stood at Rs. 3440 INR.

Excessive rainfall in Haryana also on verge to damage of sugarcane crop after the Maharashtra and Karnataka. According to the trade sources, the crop is under submerged condition after the excess water released from the Hathnikund barrage. Mainly Yamunanagar, Karnal, Panipat and Sonipat districts in the state are affected till now.

Weather Forecast:

In the next 24 hours, light to moderate rain with few heavy spells can be seen over East and Central Uttar Pradesh, West Madhya Pradesh, parts of Vidarbha, Marathwada, and Coastal Karnataka. Scattered light to moderate rains can be seen over Assam, Meghalaya, Nagaland, Chhattisgarh, Odisha, Telangana, and Uttarakhand. The weather of West Rajasthan, Punjab, Haryana, and Jammu and Kashmir will be dry while scattered light rains with one or two moderate spells will be a sight over rest parts of the country.

Previous Updates:

Since the beginning of this month, around 15 days the sugarcane crop remained in water logging (submerged) conditions upto 5-5.5 ft of muddy water after the continuous heavy rainfall in Kolhapur, Sangli and Satara. East Kolhapur and south Sangli were the most affected areas (around 75000 ha sugarcane area) accounting more than 50% loss in crop, overall crop loss is estimated to be around 40-50% till date in Maharashtra. Eventually in this condition, the average sugar recovery of the state is likely to reduce by approximately 20-30% to 8-10% recovery rate. The Adsali crop planted during May-June'19 for 2020-21 crushing season is also been destroyed according to the trade sources.

According to the Maharashtra state government, 10-15% sugar reduction after floods is likely to be observed in the coming crushing season 2019-20 as only around 570 lakh tonnes of sugarcane would be available for crushing from 8.40 lakh ha in Maharashtra. Sugarcane has been damaged by excessive waterlogging. Therefore, it is expected that this may have an impact on sugar production in the state. Once the water level recedes, clarity of total crop loss can be assessed by the end of this week.

All India sugarcane sowing progress released by Government of India, as on 16th Aug'19, the sowing has almost been completed under sugarcane. Total area stood at 52.30 lakh ha this year lower by 3.15 lakh ha (5.6%) but higher by 9.5% than normal area as on date. The acreage in Tamil Nadu, Maharashtra, Telangana, AP, and UP declined this year by 28%, 24%, 18%, 8% and by 2% respectively due to unfavourable prolonged drought conditions in all the states.

Surplus sugar stocks in Myanmar has urged the country to export as much as possible. China is likely to buy Myanmar sugar after inspecting the sugar quality, mills and warehouses of the country. China used to import sugar from Myanmar between 2015 to mid-2017 and China was one of the top sugar

importers of Myanmar. But soon after China barred the sugar import, the country's sugar glut has been rising.

Mexico sugar production is estimated to decline by 4% for 2019-20 season compared to the production in 2018-19. According to country's cane growers association Union Nacional de Caneros, Mexico is expected to produce 6.2 MMT of sugar in 2019-20 season with the 50 sugar mills in operation. In the 2018-19 season, the country had produced 6.4 MMT of sugar. The decline is expected as few cane producing regions in Mexico are suffering from drought, which will hamper the sugar output.

As on 14th Aug'19, 78% sugarcane area in AP is sown, covering 1.06 lakh ha which is 9.6% less from corresponding period last year (0.97 lakh ha). In Telangana also, 64% area of the season normal has been sown under sugarcane and declined on large scale compared to previous year by 9,295 ha this year covering only 21,932 ha. The crop in both the states are in vegetative phases.

The government is likely to announce the sugar export policy by the end of this month of 60 to 80 LMT as the millers are not able to export as per the MIEQ quota allocated to the mills. Also, the Indian sugar millers seek export and transport subsidy of Rs.1030 to Rs.1200 per quintal. Although lakhs of hectares is on verge of damage due to recent floods in Satara, Sangli, Kolhapur, Karad, Belgaum which are also prominent cane areas. Despite of that, there is surplus sugar in the mills and a quick decision is necessary to clear the stocks. Of the existing policy, 37 LMT to 38 LMT has been contracted and is likely to get exported by 30th Sept 2019 which actually running behind of 12 LMT.

The heavy rains in Kolhapur, Sangli and Satara resulted in more than 90,000 ha of sugarcane is under water since last 4 days. According to Western India Sugar Mills Association (WISMA), 50% of Maharashtra has been hit by drought in the last two months and the remaining 50% has been affected by floods that hit western Maharashtra last week. More than 40% of crop could be affected as sugarcane is the main crop in the region according to the trade sources.

Weekly Outlook:

Indian Sugar markets remained weak during last week. We expect sugar prices may trade steady to firm due to growth in demand in the market. As per the Agriwatch estimate, spot sugar prices (M grade) in benchmark Kolhapur market are likely to range between Rs 3200–Rs 3350 per quintal for next week.
