

**Sugar & Gur Domestic & International Fundamentals****Recent Update:**

**Mixed trend is seen in the sugar market across India on Wednesday.** Overall the prices are expected to be steady due to lower demand. Kolhapur sugar market stood steady at Rs.3250/q and U.P's Khatauli market prices stood lower at Rs.3420/q.

**Weather Forecast:**

During the next 24 hours, scattered light to moderate rain and thundershower are possible over South Coastal Andhra Pradesh, Tamil Nadu, Kerala, and South Interior Karnataka. Isolated light rain and snow can be seen over Arunachal Pradesh. Light rain is a possibility over Assam and Jammu and Kashmir. Minimums may fall further over the northwest and central India and over few pockets of East India. Delhi pollution is likely to increase further.

**Previous Updates:**

**As per the latest estimate of USDA, sugar production is projected at 8.6 million tons, decrease by 572,000 ton from the previous month's prediction.** The poor growing weather and forecasts for smaller beet and sugar cane crops have affected sugar production in the US. The US is planning to allow more imports of sugar so as to fulfil the demands from bakers, candy makers, and food manufacturers. The sugar is likely to be imported from Mexico, which has surplus sugar at present. The decision in this regard will be taken in December. India with export incentives this could get opportunity to export to US on subsidized prices.

**The crushing season was going to commence in Farrukhabad (U.P) on Thursday but due to scarcity of cane in the district due to insufficient supply of sugarcane,** the mills has stopped the operations. The next day cane available in mill yard was only 687 quintal whereas 1200 quintal cane is required to run the mill smoothly. Currently, 30-35 mills have started crushing operations in the Western and Central UP regions. The plants in Eastern UP would soon start crushing. The Centre has retained the cane FRP at Rs. 275/quintal sugarcane for all the states in 2019-20. UP traditionally announces a much higher SAP to remunerate the state farmers. Last year, the state had announced SAP of Rs. 315 per quintal.

**Karnataka decided earlier in the month to ban sugarcane selling to other states which may create hardships for Maharashtra** that use to buy sugarcane from bordering areas of Karnataka. The millers from Maharashtra have decided to oppose the move. Also the farmers from Karnataka had appealed the government to intervene in this issue because mills from Maharashtra pays high to farmers than that of Karnataka which attracts the cane farmers to Maharashtra. As sugarcane production has been affected in Maharashtra as well as in Karnataka this year following the drought and the recent floods.

**The main sugar producing region in Brazil, the centre- south region mills is likely to end its crushing earlier than expected due to drier-than-normal weather.** According to the Unica, 67 mills have already finished crushing as against 52 during the same period last year. Because of better realization on selling ethanol instead of sugar, the country is more focusing on producing more ethanol production. Also, the falling prices of sugar in the international market has helped Brazil to emphasise more on ethanol production.

**Thailand government has recently posed ban of using Paraquat, Chloropyrifos and Glyphosate chemicals especially used in sugarcane production.** The ban on paraquat will affect sugar production as well as impact food processing, animal feed and ethanol production sector. There will be a decrease in the production of sugarcane between 20 per cent and 50 per cent. Thailand being the 2<sup>nd</sup> biggest exporter, the ban would impact the raw sugar production and further would decline the exports. If no alternative is introduced as soon as possible, other countries would get the opportunity to liquidate their stock in the global market especially India.

**Government has extended the duration till December to export last year's balance quota of sugar.** As the sugar mills exported around 3.8 million tonnes only against the target of 5 million tonnes during Oct'18-Sep'19. Now, it has been decided by the central government to allow those sugar mills, which had partially exported their MIEQ of 2018-19 till September 2019, to export the balance quantity of their MIEQ by December 31, 2019.

**The crushing in Maharashtra has already been delayed where usually the season starts after Diwali or in October.** But this year due to the prolonged rainfall, drought and the state assembly elections in the state, cane crushing is delayed. According to the reports, 89 mills have received the crushing license, and 72 are still waiting for it. Maharashtra sugar commissioner recommended to delay further to commence the crushing season from 25<sup>th</sup> Nov'19.

**Ties between Pakistan and China becoming stronger after US and China trade war started.** Pakistan likely to export more goods especially sugar to China in the current year. Pakistan exported sugar worth \$609.9 million to China, which was over four times compared to sugar exports in fiscal year 2017-18. India remained behind in case of sugar exports to China due to imposition of heavy tariffs by China and the domestic prices remained higher in India. The second phase of Pakistan-China Free Trade Agreement (FTA) will become operational from the first of December.

**The production of sugar in China has reached upto 3.98 LT till the end of Oct'19 up by 3.01 LT at the same time last year whereas the total production is forecast to fall 2.4% to 10.5 mln tonnes in 2019-20.** Imports of sugar in China stood at 4.7 lakh tonnes in the month of August'19 around 217.6% higher than last year in the same period. The total imports till Aug'19 stood at 4.3 mln tonnes which is around 1% lower compared to last year.
