

Sugar & Gur Domestic & International Fundamentals**Recent Update:**

Mixed trend is seen in the sugar market across India on Friday. Overall the prices are expected to be steady due to lower demand. Kolhapur sugar market stood steady at Rs.3250/q and U.P's Khatauli market prices stood lower at Rs.3410/q.

Mills have so far crushed 3.56 mln tn of cane and produced 325,000 tn of sugar. The average recovery of sugar has so far been 9.14%. According to the National Federation of Cooperative Sugar Factories Federation, so far, 74 mills in the country have started crushing cane this season. In Maharashtra, Of the total 195 mills in the state, only 105 mills have issued licences to crush cane so far. The lower cane availability in the state also likely to reduce cane crushing duration to 70-80 days against the usual of 140-150 days.

Brazil so far has produce around 408.54 billion litres of ethanol out of which around 1.19 billion litres have been exported till October'19 since start of the season in April'19 at an average price of 516 US\$/m³, the exports increased by around 17% compared to the previous year. Brazil's ethanol stocks reached 11.42 billion litres by 31st Oct'19, up 3.9 % from the same time last year and 4% more than on 15th Oct'19 this year. By 31st Oct last year, ethanol stocks in the country were at 10.99 billion litres. The monthly average price increased by 11% at 529 US\$/m³ which encouraged the exports.

Weather Forecast:

During the next 24 hours, light to moderate rain and thundershowers are expected at many places in Jammu and Kashmir, Ladakh, Himachal Pradesh and northern parts of Uttarakhand. There is a good possibility of snowfall as well in these places. Northwest India is likely to experience partly cloudy to cloudy sky with shallow to moderate fog during early morning hours. The latter part of the day will be bright, sunny and comfortable. Delhi is most likely to experience very poor pollution levels. Due to the presence of a trough, Tamil Nadu, Kerala and extreme southern parts of Karnataka south Andhra Pradesh will receive light to mod rain and thundershower.

Previous Updates:

According to the trade sources, Indian sugar mills have so far contracted exports of around 10-12 LT sugar in 2019-20 sugar season since October'19. In the October month, sugar mills have exported around 4-5 LT of old sugar stock and it is projected that around 6-8LT of sugar have been exported so far. Good demand have been reported from the following countries: Afghanistan, Iran, Sri Lanka, Somalia, Nepal, Kenya, Bangladesh, Saudi Arabia, & Qatar. Indian FOB is hovering around \$323/tonne for refined sugar and \$ 309/ tonne for raw sugar at present which is lower than LIFFE sugar which is hovering around \$336/tonne (Refined sugar). The mills in the last season were ineligible to avail the incentives for exports due to partial fulfilment of export quota. Hence, on the request of the mills, the government has extended the last date to exhaust last year's export quota by December 31, 2019.

As per the latest estimate of USDA, sugar production is projected at 8.6 million tons, decrease by 572,000 ton from the previous month's prediction. The poor growing weather and forecasts for smaller beet and sugar cane crops have affected sugar production in the US. The US is planning to allow more imports of sugar so as to fulfil the demands from bakers, candy makers, and food manufacturers. The sugar is likely to be imported from Mexico, which has surplus sugar at present. The decision in this regard

will be taken in December. India with export incentives this could get opportunity to export to US on subsidized prices.

The crushing season was going to commence in Farrukhabad (U.P) on Thursday but due to scarcity of cane in the district due to insufficient supply of sugarcane, the mills has stopped the operations. The next day cane available in mill yard was only 687 quintal whereas 1200 quintal cane is required to run the mill smoothly. Currently, 30-35 mills have started crushing operations in the Western and Central UP regions. The plants in Eastern UP would soon start crushing. The Centre has retained the cane FRP at Rs. 275/quintal sugarcane for all the states in 2019-20. UP traditionally announces a much higher SAP to remunerate the state farmers. Last year, the state had announced SAP of Rs. 315 per quintal.

Karnataka decided earlier in the month to ban sugarcane selling to other states which may create hardships for Maharashtra that use to buy sugarcane from bordering areas of Karnataka. The millers from Maharashtra have decided to oppose the move. Also the farmers from Karnataka had appealed the government to intervene in this issue because mills from Maharashtra pays high to farmers than that of Karnataka which attracts the cane farmers to Maharashtra. As sugarcane production has been affected in Maharashtra as well as in Karnataka this year following the drought and the recent floods.

The main sugar producing region in Brazil, the centre- south region mills is likely to end its crushing earlier than expected due to drier-than-normal weather. According to the Unica, 67 mills have already finished crushing as against 52 during the same period last year. Because of better realization on selling ethanol instead of sugar, the country is more focusing on producing more ethanol production. Also, the falling prices of sugar in the international market has helped Brazil to emphasise more on ethanol production.

Thailand government has recently posed ban of using Paraquat, Chloropyrifos and Glyphosate chemicals especially used in sugarcane production. The ban on paraquat will affect sugar production as well as impact food processing, animal feed and ethanol production sector. There will be a decrease in the production of sugarcane between 20 per cent and 50 per cent. Thailand being the 2nd biggest exporter, the ban would impact the raw sugar production and further would decline the exports. If no alternative is introduced as soon as possible, other countries would get the opportunity to liquidate their stock in the global market especially India.
