

Sugar & Gur Domestic & International Fundamentals**Recent Update:**

Indian Sugar market remained unchanged compared to previous day as the crushing started across India including Maharashtra this week. Overall the prices are expected to be steady due to lower demand. Kolhapur sugar market stood steady at Rs.3220/q and U.P's Khatauli market prices stood firm at Rs.3440/q.

The sugar prices are expected to remain firm above minimum selling price of Rs.31/kg around Rs.34-35/kg in the coming months on the back of lower sugar production this sugar season (2019-20). Also, the diversion towards ethanol has been encouraging to the sugar mills because of the increased demand from oil marketing companies. Therefore, many sugar mills are being aided to increase the installed capacity for the ethanol production. Under the current sugar sale quota mechanism, some relief was given to a few companies to sell higher volumes of sugar on account of higher sugar diversion to produce B-Heavy Ethanol and higher export of sugar.

The oil marketing companies (OMC's) placed tenders for 5.11 billion litres of ethanol in 2019-20. The requirement by oil companies exceeds by 40% and so far 1.88 billion litres have been supplied in 2018-19 out of the contracted 2.45 billion litres in 2018-19. Ethanol delivery new season starts from December and ends in November. Uttar Pradesh, Maharashtra and Karnataka being the bulk sugarcane-based ethanol producer in India, having the total installed capacity for ethanol production is 3.55 billion litres in 2019-20 season. Therefore, government in the coming year expects significant quantities of ethanol to come from non-sugarcane sources like wheat and corn to fulfill the requirements.

USDA in its latest report has reported that the global sugar production is estimated to decline by 6 million tonnes at 174 million tonnes of sugar in the year 2019-20. Major decline is forecasted due to the reduction of sugar production in India in sugar season 2019-2020 which is estimated around 26.5 to 27 million tonnes. The sugar decline is also followed by Thailand where this year in 2019-20 sugar season, the country expects to produce 13.9 million tonnes a decline of 2% from the previous year (2018-19). Whereas the total exports in the country likely to increase to 11.9 million tonnes in 2019-20 from 11.5 million tonnes in 2018-19.

Weather Forecast:

During the next 24 hours, scattered light to moderate rain and snow is expected over Jammu and Kashmir, parts of Himachal Pradesh and Uttarakhand. Scattered light rain with one or two moderate spells is likely over Punjab, Haryana, North Rajasthan and parts of Northwest Uttar Pradesh. However light rain with one or two moderate spells is possible over coastal stations of Tamil Nadu with light rain at few places of interior Tamil Nadu. The weather in the rest parts of the country will be dry

Previous Updates:

U.S. sugar production have declined significantly due to adverse weather in both sugar beet and sugarcane regions. In the November 2019 WASDE Report, the U.S. sugar production projection declined by 524,000 short tons raw value to 13.55 STRV from the previous month, while ongoing weather concerns threaten further reductions. USDA intends to make an announcement between November 18 Daily Sugar & Gur Fundamental Report 27th Nov, 2019 and December 10 as to quantity, type and source of additional sugar needed to ensure an adequate supply for the domestic market.

According to ISMA, as on 15th Nov'19, mills have crushed around 4.85 lakh tonnes in the current season 2019-20 sugar season as compared to 13.38 lakh tonnes sugar produced in the last season. Only 100 mills were crushing compared to 310 mills last year. In UP, 69 sugar mills have started the crushing operations for this season and they have produced 2.93 lac tons of sugar by 15th Nov'19. Whereas, during the same period last year in the same period, they had produced 1.76 lac tons till 15th Nov'18. Maharashtra has recently started the crushing operations this week, therefore, one of the reasons for lower crushing so far this season.

Mills have so far crushed 3.56 mln tn of cane and produced 325,000 tn of sugar as against the reported numbers released by ISMA. The average recovery of sugar has so far been 9.14%. According to the National Federation of Cooperative Sugar Factories Federation, so far, 74 mills in the country have started crushing cane this season. In Maharashtra, Of the total 195 mills in the state, only 105 mills have issued licences to crush cane so far. The lower cane availability in the state also likely to reduce cane crushing duration to 70-80 days against the usual of 140-150 days.

Brazil so far has produce around 408.54 billion litres of ethanol out of which around 1.19 billion litres have been exported till October'19 since start of the season in April'19 at an average price of 516 US\$/m³, the exports increased by around 17% compared to the previous year. Brazil's ethanol stocks reached 11.42 billion litres by 31st Oct'19, up 3.9 % from the same time last year and 4% more than on Daily Sugar & Gur Fundamental Report 26th Nov, 2019 15th Oct'19 this year. By 31st Oct last year, ethanol stocks in the country were at 10.99 billion litres. The monthly average price increased by 11% at 529 US\$/m³ which encouraged the exports.

According to the trade sources, Indian sugar mills have so far contracted exports of around 10-12 LT sugar in 2019-20 sugar season since October'19. In the October month, sugar mills have exported around 4-5 LT of old sugar stock and it is projected that around 6-8LT of sugar have been exported so far. Good demand have been reported from the following countries: Afghanistan, Iran, Sri Lanka, Somalia, Nepal, Kenya, Bangladesh, Saudi Arabia, & Qatar. Indian FOB is hovering around \$323/tonne for refined sugar and \$ 309/ tonne for raw sugar at present which is lower than LIFFE sugar which is hovering around \$336/tonne (Refined sugar). The mills in the last season were ineligible to avail the incentives for exports due to partial fulfilment of export quota. Hence, on the request of the mills, the government has extended the last date to exhaust last year's export quota by December 31, 2019.

As per the latest estimate of USDA, sugar production is projected at 8.6 million tons, decrease by 572,000 ton from the previous month's prediction. The poor growing weather and forecasts for smaller beet and sugar cane crops have affected sugar production in the US. The US is planning to allow more imports of sugar so as to fulfil the demands from bakers, candy makers, and food manufacturers. The sugar is likely to be imported from Mexico, which has surplus sugar at present. The decision in this regard will be taken in December. India with export incentives this could get opportunity to export to US on subsidized prices.
