

**Sugar & Gur Domestic & International Fundamentals****Recent Update:**

**Indian Sugar market showed mixed trend compared to previous day across India.** Overall the prices are expected to be steady due to lower demand. Kolhapur sugar market stood unchanged at Rs.3300/q as new stock has arrived in the market and U.P's Khatauli market prices stood slightly firm at Rs.3370/q.

**Weather Forecast:**

During the next 24 hours, light to moderate rain is likely in Jammu and Kashmir, Himachal Pradesh, Ladakh, and Uttarakhand. Scattered rain and thundershower activities are expected in Southwest Uttar Pradesh, East Rajasthan, and West Madhya Pradesh. Isolated rainfall activities may occur in the northern parts of Punjab, Haryana and in parts of Delhi and NCR. Isolated rain is also likely in Assam and Arunachal Pradesh.

**Previous Updates:**

**As on 14<sup>th</sup> Jan'20, total 119 sugar mills has been crushing sugarcane in Uttar Pradesh against 117 mills during the correspond period previous year.** So far, UP has crushed 9.13% more sugarcane around 391.37 LT against 358.62 LT in the previous year and produced 42.35 LT of sugar which is 7.90% higher due to the favorable conditions in the state this year. Whereas, the recovery declined slightly by around 1.19% to 10.82% against 10.95% in the same time previous year from the start of the season in Oct till 14<sup>th</sup> of January.

**According to the USDA report, USA revised its sugar production estimates to 8.158 MMT from 8.28 MMT in 2019-20 sugar season,** however, the production is estimated around 9% lower compared to the previous year's production. Subsequently, the estimates for imports have increased to 3.881MMT in January estimates from the Dec'19 estimates of 3.860 MMT and also higher compared to the previous year's imports of 3.070 MMT in 2018-19 sugar season.

**Thailand sugarcane production is expected to be lower down by 22% compared with the previous season due to bad weather conditions in 2109-20 season.** The drought and weak monsoon in Thailand's major cane producing regions during the crucial growing season would also lead to slower cane development and a reduction in sugar yield. The cane crushing usually starts between mid and end of November but delayed to the start of December this year. White and refined sugar exports for January-November dipped 4.62% (92.72LT) in the current year, while raw sugar exports fell by 4.8% due to the China's enforcement on cross-border movement of sugar from Taiwan and Myanmar. But Thailand is likely to gain support by the increasing demand from Indonesia after the government announced that industrial raw sugar import permits for 2019 would be reduced by 22% from the previous year to 2.8 MMT.

**In 2019-20 sugar season in Mexico, the sugar production declined by around 30% compared to the previous year at 74.44 LT with average sugar recovery of 9.24% till the week ending in 4<sup>th</sup> of January'20** lower compared to 9.52% in 2018-19 during the same period last year. The sugar exports in December'19 reached 26,830 MT lower compared to 38,029 MT in November'19. The total exports from October'19 till 5<sup>th</sup> of January'20 reached 99,154MT lower by 41% which was 1.67LT in 2018-19 during the same period last year.

*Few months earlier, Indonesia has announced to reduce down the import duties for raw sugar to import raw sugar from India against the deal that India will give priority to import palm oil from Indonesia. The sugar industry is waiting since last year for Indonesia to take action on relaxing norms for sugar import from India. But the sugar mills in India have commence refining the raw sugar and it is already late to export raw sugar now. Also, according to the norms the imported raw sugar should have ICUMSA 1200 and above but India produces better quality of sugar of ICUMSA 400-800. Indonesia accepted and bought down the import duty but still haven't made changes in the quality norms. Therefore, exports to Indonesia in the current year becomes difficult while it will be a good opportunity to export sugar from India in the coming season.*

*According to the trade sources, India has exported around 2,57,000 tonnes of refined sugar from Indian ports (Kakinada & Kandla) in the month of December'19. Out of the total, 75,000 tonnes of sugar have been exported from Kakinada port while 1,82,600 tonnes of refined sugar have been exported through Kandla port. The major importing countries were Iran, Bangladesh, Somalia and Sri Lanka.*

*Maharashtra has produced only 194.03 lakh quintals of sugar with an average recovery of 10.17% till the first week of January. The untimely and heavy rains in the state and droughts in other parts of the states have hit severely on the sugar recovery rate. Kolhapur division where the recovery rate used to be around 12% at this period of time but this year the average sugar recovery stood at 11.21%. Recoveries have slightly increased to 10.39% in Pune division, 9.12% in Solapur, 9.29% in Ahmednagar, and 8.74% in Aurangabad and the impact can be seen on the sugar production. While the average recovery in Nanded stood slightly higher at 9.68% compared to Solapur, Ahmednagar and Aurangabad. As estimated earlier, the sugar recovery slightly improved due to cold weather in the coming days in January.*

*As on 7<sup>th</sup> Jan'20, total 119 sugar mills has been crushing sugarcane in Uttar Pradesh against 117 mills during the correspond period previous year. So far, UP has crushed 7.73% more sugarcane around 355.94 LT against 330.41 LT in the previous year and produced 38.34 LT of sugar which is 6.38% higher due to the favorable conditions in the state this year. Whereas, the recovery declined slightly by around 1.28% to 10.77% against 10.91% in the same time previous year from the start of the season in Oct till 7<sup>th</sup> of January.*

*Three sugar vessels named Behdokht, Dignity, and Jairan of 30,000 tonnes, 17,000 tonnes and 20,000 tonnes respectively have been loaded for export from Kandla and Jaigad port in the first week of January. While vessels naming Best Adventure, Best Trader M, Capt Khaldoun and ABK Tiger are waiting at berth for loading at Kandla and Kakinada port of around 1 lakh tonnes of sugar which is likely to be exported soon from the ports.*

*Two sugar mills in Maharashtra from Aurangabad and Ahmedabad district have closed the crushing operations earlier due to unavailability of cane in the area as well as labour. Both the areas were effected with flood and drought, thereby, crushing around 1,790 tonne to 2,660 tonne of cane. It is expected that most of the mills will finish crushing by January end this year. According to the trade sources, in Kolhapur, the average recovery has improved and hovering around 11.3-11.6 as the weather is getting colder. From the start of crushing in November till 31<sup>st</sup> December, the average sugar recovery % in the State stood at 10% as against 10.5% in the same time last year.*
