

Sugar & Gur Domestic & International Fundamentals**Recent Update:**

Indian Sugar market showed steady to low trend compared to previous day across India. Overall the prices are expected to be steady due to lower demand. Kolhapur sugar market stood steady at Rs.3225/q as new stock has arrived in the market and U.P's Khatauli market prices stood weak at Rs.3265/q.

According to the trade sources, India exported 3.58 LT of sugar in January month. The Indian mills have started exporting the sugar produced in the new season (2019-20) due to which the prices reported are slightly higher compared to the previous month December. Out of the total exports, largest quantity of refined sugar has been exported to Malaysia exporting 1,39,033 tonnes at an average FOB of \$330/MT followed by Iran of 59,565 tonnes at an average FOB \$343/MT and Afghanistan exporting 53,973MT worth \$342/MT. Sugar has been exported to Middle Eastern countries including Somalia (11,751 tonnes at an average FOB \$355/MT), Saudi Arabia (9,135MT tonnes at an average FOB \$354/MT). The export to Sri Lanka was at an average \$337/MT (19,822 tonnes) and to Pakistan at an average of \$347/MT (10,589 tonnes).

Weather Forecast:

During the next 24 hours, light to moderate rain and thundershowers with isolated heavy spells may occur in Odisha, parts of Jharkhand and Chhattisgarh. Scattered light to moderate rain is likely in East Uttar Pradesh, Bihar, West Bengal, Assam and Arunachal Pradesh. Sikkim and Arunachal Pradesh may even receive isolated light snowfall. Isolated showers are likely in Uttarakhand. Isolated light rain and thunderstorm activity may occur in Northwest Rajasthan and West Punjab.

Previous Updates:

*The sugar exports at this point of time this sugar season has picked up the pace due to the export subsidy incentives given to the sugar mills across India. This prompted the government (DFPD) to issue new guidelines directing the reallocation export quotas from mills that haven't been able to use them to those that have asked for higher quotas. Also, Indonesia has finally decided to allow sugar imports from India, discussions for which had been going on for about two years. Therefore, today the government released a notification revising MAEQ of sugar for export during 2019-20 sugar season. In order to improve the liquidity position of the sugar mills so that they can move a step forward to clear off the cane price dues of farmers. Therefore, **export quotas of 611,797 tonnes have been redistributed after reviewing exports performance of the mills.** This would help the mills to export at faster pace those who have higher stocks. About 1.6-1.7 MMT have been exported and about 3.2-3.3 MMT of export contracts have been signed.*

According to the 2nd advance estimate released by the government recently, the total sugarcane production in India might reach upto 3528.45 lakh tonnes against the target of 3855 lakh tonnes. The 2nd advance estimate is lower by around 6% compared to the first advance estimate due to the lower production this year. Due to which the sugar production declined by around 22% at 169 lakh tonnes so far till 15th Feb'20.

According to ISMA, all sugar mills across India have produced around 169 lakh tonnes of sugar lower as compared to 219.66 lakh tonnes produced on the corresponding time last year lower by 22.6%. This year around 23 sugar mills have stopped crushing operation due to lack of availability of cane out of 449 sugar mills. While, out of 521 sugar mills, only 19 mills have stopped the operations during the same time last year.

Maharashtra this year have produced sugar less by around 47% to 43.38 lakh tonnes with a closure of 8 sugar mills compared to 82.98 lakh tonnes last year till 15th Feb. In U.P. 119 sugar mills which are in operation have produced 66.34 lac tons of sugar till 15th February'20, compared with 63.93 lac tons produced by 117 mills on the corresponding date of last year.

In Karnataka, 63 sugar mills are in operation on 15th Feb'20, who have produced 30.80 LT of sugar, as compared to 38.74 LT produced by 66 sugar mills during the same period last year. Out of 63 sugar mills which went for crushing this season, 13 sugar mills have stopped crushing as on 15th February'20. Tamil Nadu has produced only 2.6 lakh tonnes of sugar till 15th Feb'20 by 21 sugar mills compared to 32 sugar mills producing 3.85 lakh tonnes of sugar in the same period last year. In Gujarat, 15 sugar mills are operating for 2019-20 SS and they have produced 5.95 LT of sugar till 15th Feb'20 lower compared to 7.78 LT in the same period last year. As per market reports released by ISMA, about 16 lac tons of sugar have been exported from India and about 32 lac tons of contracts have been signed for exports.

Many sugar mills in Maharashtra intended to close the mills in February due to lack of availability of cane this year as the area was impacted by floods and drought along with less availability of labour for harvesting. As per data from Maharashtra Sugar Commissionerate, overall 8 sugar mills, 3 in Ahmednagar and another 5 in Aurangabad District have closed their operations. This season overall 143 sugar mills participated in the crushing season. It is expected that the crushing would be completed in next 20-25 days.

Russia is likely to produce sugar in 2019-20 rose to 70 lakh tonnes setting a new high record this year. This is 4th year that Russia has produced the significant sugar with the estimation of record high production this year. The country is expecting to export around 11 lakh tonnes of sugar this year. Although Russia is experiencing higher cost of exporting sugar at the ports due to lack of investments in port logistics. The demand for export is growing but supply for service is the same. So it seems difficult that Russia could reach its target of 11 lakh tonnes.

Due to the higher sugar production, the year ended with higher ending stock. Therefore, due to excess sugar supply, the sugar mills which had partially exported their MIEQ of 2018-19 sugar season till 30th Sep'19, were allowed to export their remaining MIEQ of 2018-19 sugar season by 31st Dec'19. Now, it has been decided by the Central Government to allow those sugar mills which had partially exported their MIEQ of 2018-19 sugar season till 31st Dec'19, to export the balance quantity of their MIEQ of 2018-19 sugar season by 15th Feb'20, over and above the Maximum Admissible Export Quantity (MAEQ) allocated for 2019-20 sugar season.

The Uttar Pradesh expects a total sugar production in Up might reach upto 120 lah tonnes this crushing season with an average recovery rate of above 11% higher than what Maharashtra state government expects. As on 31st January 2020, 119 sugar mills were in operation and they have produced 54.96 lakh tonnes of sugar compared with 52.86 lakh tonnes produced by 117 mills on the corresponding date of last year. The harvesting of wonder variety 238 which has higher yield in terms of crop harvest as well as results in higher percentage of sugar content resulted in the better yield and thereby higher sugar production.
