

Sugar & Gur Domestic & International Fundamentals**Recent Update:**

Indian Sugar market showed mixed trend compared to previous day across India. Overall the prices are expected to be steady to low due to lower demand but likely to be steady due to good export demand. Kolhapur sugar market stood steady at Rs.3150/q as new stock has arrived in the market and U.P's Khatauli market prices stood firm at Rs.3290/q.

Weather Forecast:

During the next 24 hours, fairly widespread rain and snow may continue in Jammu and Kashmir, Himachal Pradesh, Uttarakhand and Ladakh. Fairly widespread rain and thundershowers with hailstorm activities may occur in a few parts of Punjab, Haryana, Delhi, Uttar Pradesh and North Rajasthan. Odisha, Bihar, Jharkhand and West Bengal may also observe light to moderate rain and thundershowers along with hailstorm activities. While scattered rain is likely in Chhattisgarh. A few parts of Kerala, Telangana, Andhra Pradesh and Tamil Nadu may experience scattered light to moderate rain and thundershowers. Scattered light to moderate rain is also expected in Andaman and Nicobar island, and Lakshadweep area.

Previous Updates:

The total 2019-20 EU sugar production likely to decline by 428,000 MT in 2019-20 sugar season (October-September) at 17.502 MMT according to the S&P Global Platts Analytics forecasts due to the dry conditions early in the season and heavy rainfall late in the season. The sugar production has fallen since previous two seasons and is likely to see further drop in production. Prices slumped because of the initial rise in production that forced the EU to try to compete in a depressed global market. Prices have now rebounded as production has fallen in the EU.

Thailand Raw sugar as well as refined sugar exports declined by 6% and 2% respectively in 2019 (Jan'19-Jan'20) whereas the white sugar exports rose significantly by 16% to 7.19 LT till Jan'20 from Jan'19. Overall Thailand sugar exports also declined by around 3.5% to 107.92 LT compared to the previous year. In January, around 462,098 tonnes of raw sugar was exported at an average FOB of \$292.29/ton higher price compared to the previous months' exports. Similarly, White and refined sugar were exported around 44,283 tonnes and 2,49,084 tonnes at an average FOB of \$338.6/ton and \$347.73/ton respectively reported to be the highest price of the season. The Thailand exports in January'20 increased due to the higher imports in Indonesia, Vietnam, Sudan, Singapore, China followed by Philippines.

According to ISMA, all sugar mills across India have produced around 194.84 lakh tonnes of sugar lower as compared to 249.3 lakh tonnes produced on the corresponding time last year lower by 22%. This year around 68 sugar mills across India have stopped crushing operation due to lack of availability of cane out of 453 sugar mills. Maharashtra this year have produced sugar less by around 45% to 50.7 lakh tonnes with a closure of around 22 sugar mills compared to 92.88 lakh tonnes last year till 29th Feb. In U.P. 119 sugar mills which are in operation have produced 76.86 lac tons of sugar till 29th February'20, compared with 73.87 lakh tons up by 4% year on year produced by 117 mills on the corresponding date of last year.

In Karnataka, 63 sugar mills are in operation on 29th Feb'20, who have produced 32.6 LT of sugar, as compared to 41.73 LT produced by 66 sugar mills during the same period last year. Out of 63 sugar mills which went for crushing this season, 32 sugar mills have stopped crushing as on 29th February'20. Tamil Nadu has produced only 3.2 lakh tonnes of sugar till 29th Feb'20 by 21 sugar mills compared to 32 sugar mills

producing 4.63 lakh tonnes of sugar in the same period last year. In Gujarat, 15 sugar mills are operating for 2019-20 SS and they have produced 6.83LT of sugar till 29th Feb'20 lower compared to 8.79 LT in the same period last year. As per market reports released by ISMA, about 22-23 lakh tons of sugar have been exported from India and about 35 lakh tons of contracts have been signed for exports.

International sugar prices have support from reduced sugar output from Thailand, the world's fourth-biggest sugar producer. Thailand's Office of the Cane and Sugar Board on Tuesday reported that Thailand's sugar production from 1st Dec'19 till 23rd Feb'20 was down by -8.1% year on year at 7.9 MMT. According to the Thailand Meteorological Department this year's drought in Thailand is the worst in 40 years, which is slashing the country's sugar output. The Thai Sugar Millers Corp forecasted that Thailand's 2019-20 sugar production would drop -35% year on year to 9 MMT from 14 MMT in 2018-19 as dry conditions reduce sugarcane yields.

Government fixed the monthly sugar sales quota as 21 LT for March month to 545 mills higher by 1 LT compared to the previous month that stood at 20 LT. Also, the allocated quota is 3.5 LT lower at 24.5LT in the same time previous year. In the previous month, the sugar millers have reported that there was moderate demand due to higher stock piles and lower sugar production this year. The millers are holding their stock and waiting for the prices to rise and demand to increase with the commencement of summer season and prices to be firm. While 3 sugar mills faced action against them for selling excess sugar from the monthly sugar sales quota.

ISMA revised its sugar production from its November estimates of 26 million tonnes to 26.5 million tonnes in February month during 2019-20 SS. According to Agriwatch estimates, in 2019-20 SS India likely to produce around 26.2 million tonnes of sugar. Out of which, around 123 LT of sugar production likely to produce from UP (up by around 4%) followed by 60LT of sugar from Maharashtra (down by 45%) and around 35 LT of sugar from Karnataka (down by around 20%). With an expected ending stock of 7 million tonnes according to Agriwatch estimates compared to 6 -10 million tonnes surplus by ISMA at the end of the sugar season 2019-20.

The sugar exports since last year was suspended to Indonesia due to the quality standards. A deal was signed between India and Indonesia to revise the quality standards as India does not produce ICUMSA 1,200 raw sugar. But now, the International Commission for Uniform Methods of Sugar Analysis a standards body that publishes norms for analysis of the sweetener modified the colour standard for raw sugar to 500-600 from 1,200. It also reduced import duties for Indian raw sugar to around 5 percent to further bolster the initiative. Indonesia annually imports 3.5-4.0 million tn of sugar. But the expected exports this year not more than 2.5 LT to Indonesia because raw sugar availability in India is not much as the refining has already been started by the mills in India. So far, Indonesia likely to import 1.3 LT sugar from India by May'20.
