

**Sugar & Gur Domestic & International Fundamentals****Recent Update:**

***Indian Sugar markets across India are closed and the cities are locked down till this month end and is likely to extend because to avoid the effects of coronavirus spread in India.***

**Weather Forecast:**

*Thunderstorm accompanied with lightening, hail and & gusty wind very likely at isolated places over Arunachal Pradesh and Vidarbha. Thunderstorm accompanied with lightening at isolated places over Assam, Meghalaya, Madhya Pradesh and Marathwada; with lightening & gusty wind likely over Jammu & Kashmir, Uttarakhand, Himachal Pradesh and Nagaland.*

**Previous Updates:**

***Government fixed the monthly sugar sales quota as 18 LT for March month to 545 mills lower by 3 LT compared to the previous month that stood at 21 LT. Also, the allocated quota is same as in the previous year during April. In March, the sugar millers have reported that there was weak demand due to the outbreak of coronavirus in India. The millers are not able to sell sugar, therefore, the government has extended the March sales quota till 15<sup>th</sup> April'20.***

***After the licenses issued to the Maharashtra sugar mills to make sanitizers from ethanol, around 20 companies including sugar distilleries in UP also have applied for the same. As the demand for hand sanitizers has surged amid the outbreak of coronavirus. These units in UP can produce around 50,000 litre of hand sanitizer daily. The manufacturing of sanitizers is likely to commence in UP after the getting clearances from the excise department.***

***Although today the government has taken an important step as Sugar and Sugarcane come under Essential Commodities Act 1955, therefore, those mills across India which have not yet completed their sugarcane crushing operations will continue to operate. All the sugar mills across India were facing problem in operating the mills to produce sugar due to which majorly the mills have halted the functioning. As the mills are not able to get the proper supply of raw material in the production. Already many mills have completed the crushing activity earlier this year due to the lack of availability of cane in Maharashtra and Karnataka expect UP. However, the fall in global sugar prices and the lockdown situation in all the states, India is unable export sugar as well as the mills are not able to sell sugar in the domestic market due to which DFPD extended the March sales quota till 15<sup>th</sup> April'20.***

***The Indian government is taking all the possible preventive measures to control coronavirus. Out of which Maharashtra is majorly hit state, therefore, the sugar mills in the state have adopted the measure to produce sanitizers from the ethanol produced. Sugar mills produce ethanol as by-product which is an active ingredient of hand sanitizers. Sanitizers contain 70% ethanol and water as a major ingredient. As there would be the maximum use of hand sanitizer.***

***The government was planning to increase the ethanol production to 9 billion litres from 3.55 billion litres within two years earlier in the month. And the target of achieving of 10% ethanol blending in petrol seems difficult as a big fall in sugarcane production is reported this year by around 14% to 356 million tonnes especially in Maharashtra and Karnataka. So far, only 1.94 bln ltr of ethanol have been supplied to OMCs against their total demand of 5.11 billion of ethanol. This year many mills were unable to get loans from***

banks for the installation of new distilleries due to improper balance sheets. Out of the total 362 applicants, the loans have been disbursed to only 37 sugar mills and 27 bln rupees has been sanctioned to 57 mills so far. This year in 2019-20 only 4% blending is likely to achieve by India lower compared to the previous year of 4.9%.

**The global raw sugar prices have fallen by around 18% since 1st of Mar'20 from 13.81 cents/lbs to 11.33 cents/lbs** and similarly the white sugar have plunged to \$326/tonne from \$391.9/tonne during the same period due to the pandemic effect globally. The downfall in crude oil prices is encouraging one of the largest sugar producing countries Brazil and a major competitor of India to divert the sugarcane crushing to sugar production instead of ethanol production.

**The government has asked the sugar mills to sell their March sales quota till 15th April'20 due to the impact caused because of coronavirus.** There might be lower sugar quota for the next to prevent sharp fall in prices as mills would have unsold March quota that will be carried forward to April. From the past two weeks, the effect of COVID-19 can be witnessed in the sugar demand. A significant fall in sugar demand and consumption is likely to occur as social gatherings, weddings and celebrations have been postponed are avoided by the people in attending the functions due to spread of coronavirus. People are avoiding consuming cold drinks, ice creams and other products.

**Despite the downfall in the international sugar prices in the last one week, the Indian sugar exports likely to increase.** As the decline in production in Thailand (down by 5 million tonnes) and the increased demand of sugar from Indonesia will help India to pick up the pace in exports. As per ISMA, sugar mills have dispatched almost 30 lakh tons of sugar for export against MAEQ of 60 lac tons till 15<sup>th</sup> Mar'20. And about 36-38 lac tons of sugar have been contracted for exports so far. The Indonesian government has released an additional import quota to its refineries and the recent decision of Indonesian Government to allow 600 ICUMSA sugar at a concessional import duty from India, Australia and Thailand has open the wider gates for India to export large quantities of sugar to Indonesia.

## NCDEX Sugar (M grade) Future Quotes (At 05:00 p.m. as on 20-12-2018)
