

Sugar & Gur Domestic & International Fundamentals**Recent Update:**

The prices across India showed mixed trend in prices today prices at Rs.3050/q in Delhi and Rs.3160 in Khatauli, UP. The prices in Vijayawada stood steady at Rs.3600/q today. While Chennai sugar was steady at Rs.3350/q. The prices in Kolhapur stood steady at Rs.3150/q.

A shortage in Indonesia has prompted mills in the Southeast Asian country to ask consumers to reduce sugar usage as the retail prices rallied to the highest in almost four years. Indonesia is likely to continue to buy sugar from India due to shortage in the country as lockdown has delayed the supply. During lockdown period, the country will have 75,000 tons of sugar stock including 50,000 tons of sugar imported from India and 25,000 tons from local suppliers in June. Out of which India supplied around 21,000 tonnes to Indonesia and remaining would be shipped during June. Indonesia's sugar imports may rise to 4.65 million tons in the year that starts in May, from 4.03 million tons a year earlier.

Weather Forecast:

Thunderstorm accompanied with lightning & gusty winds (speed reaching 30-40 kmph) likely at isolated places over Jammu & Kashmir, Ladakh, Gilgit-Baltistan, Muzaffarabad, Himachal Pradesh, Arunachal Pradesh, Assam & Meghalaya and Kerala & Mahe and with lightning at isolated places over Punjab, Haryana, Chandigarh & Delhi and Bihar. Heat wave conditions likely in isolated pockets over Uttar Pradesh, Rajasthan, Madhya Pradesh, Vidarbha, Coastal Andhra Pradesh & Yanam, Telangana and Rayalseema.

Previous Updates:

In UP, usually out of the total cane production around 60% of cane is crushed to produce sugar and 30% cane is diverted to produce jaggery. During lockdown, the major jaggery units that are located in the western UP have been closed earlier than expected due to which the farmers are bringing cane to the sugar mills. Around 4-5% of the cane is expected to be diverted to sugar mills in western UP. Around 46 sugar mills are still functioning in the state producing around 122LT of sugar till 15th May'20, up by 5% compared to the previous year during the same time. While, the sanitizer production is in full swing producing around 57 lakh litres till mid-May and 47.85 lakh litres of sanitizer has been sold within and outside the state.

Sugar mills have contracted around 42 LT of sugar so far this season till 15th May'20. Out of which, 36-37 LT of sugar have been shipped out of the country. The major destinations were Indonesia and Iran in recent past days. Also new export contracts are being signed by these two countries from India. And it is expected that export operation would be smoother in coming days.

According to ISMA, 264.65 lakh tonnes of sugar have been produced till 15th May 2020 across India as against 326.19 lakh tonnes produced in the same time last year. As on 15th May 2020, 63 sugar mills are crushing sugarcane compared 38 sugar mills which were crushing sugarcane in the same time last year. In UP, sugar mills have produced 122.28 LT of sugar compared to 116.8 LT of sugar with only 46 mills operational mills till 15th May'20. In Maharashtra, 145 mills have closed their operations with only 1 mill operating at this time with producing 60.87 LT compared with 107.15 LT produced year on year.

The government has advised the sugar mills to divert excess sugarcane to produce fuel based ethanol. As excess sugar production has deprived the prices amid less demand in the market, thereby, affecting the liquidity of sugar. Therefore, to encourage the diversion the Centre has announced a soft loan of Rs. 18,600 crore to 362 projects (349 sugar mills and 13 molasses-based standalone distilleries) out of which only 166

mills have submitted applications to banks. Sugar mills are advised to utilize their existing capacity to produce ethanol. Sugar mills with distillation capacity should divert B-heavy molasses and sugar syrup for producing ethanol to utilize their capacity to maximum extent.

According to the sugar mills, exporting the sugar is the better option as they are getting better returns than selling in the domestic market. As the sugar is trading around Rs.3100/q across the country while the trade is taking place around Rs.3400-3500/q by exporting sugar. Most of the contracts are being received from Iran, Indonesia, & Malaysia. In the last few days, Iran and Indonesia were buying for May and June shipments. It is estimated that Indian sugar mills have already dispatched 35-37 LT out of around 41 LT of contracts signed for exports in the 2019-20 marketing year ending on September 30.

China is expecting that the sugar consumption might increase from the second half of the current year so the consumption likely to remain same at 15.2 MMT in 2020-21 MY. But, some industry experts are predicting consumption could fall as low as 14.4 MMT based on the assumption that the impact of COVID-19 could last longer. China applies a tariff-rate quota (TRQ) on imported sugar, most of which comes from Brazil, Cuba, and Thailand. However, the Chinese government has yet to make an official announcement stating its intentions to withdraw the safeguard. After the removal of this safeguard, the imports might surge. However, it seems difficult in such a surge in imports as the market is affected due to coronavirus. China usually imports major sugar from Brazil & Thailand.

UP is making sanitizers in full speed by producing around 2 lakh liters per day. In UP, total production of 39,10,300 litres sanitizer has been done till date in the state and 29,79,700 litres of sanitizer have been supplied in the market and 33,77,500 sanitizer packs are still available for sale. UP has 85 units engaged in commercial production of hand sanitizer; 46 of these are dedicated sanitiser plants, 27 sugar mills, 12 distilleries and eight independent entities.
