

Sugar & Gur Domestic & International Fundamentals**Recent Update:**

The prices across India showed mixed trend today. The prices in Delhi and Khatauli stood firm at Rs.3370/q and Rs.3400/q. While the prices in Kolhapur, Chennai and Vijayawada stood steady at Rs.3300/q, Rs. 3500/q and Rs.3700/q respectively.

Uttar Pradesh alone has put a record of producing 126.5 LT of sugar this year in the current season that crushed 1,116 lakh tons of sugarcane. And a record cane price payment of more than Rs. 1,00,000 crores has been paid between 2017 and 2020 to the 47.20 lakh sugarcane farmers in the state. The demand across UP has seen a significant rise in prices in last one week to 10 days. The lifting up of restriction on lockdown picked up the demand supported the sugar prices. The prices stood between Rs.3255/q and Rs.3400/q in last 10 days.

Previous Updates:

After the lockdown from first week of June, the sugar markets are witnessing a good demand in sugar. The prices are gradually increasing in last 3-5 days by Rs.20-150/q across India within 5 days. The sugar industry feel a relief after a long stagnant demand amid COVID-19 lockdown for more than 2.5 months.

In order to help sugar mills improve their cash flow, the Food ministry has planned to liquidate stocks worth Rs 30,000 crore in 4 months. It will help sugar mills to improve cash flow and pay cane arrears to farmers. The sugar sales in March and April'20, was lower by about 10 lakh tonnes. Due to low sales, mills are under deep financial crisis and are unable to pay cane dues. Apart from that, the ministry is releasing assistance of Rs. 1,100 crore on account of export and buffer subsidy to sugar mills this month itself. This would facilitate sugar mills in clearance of their balance arrears, which have crossed Rs. 22,000 crore.

According to UNICA, a huge surge in the second two weeks of May'20 was by around 36% producing 25.48 LT of sugar and a total of 8 million tonnes in two months. The mills allocated 47.35% of the cane to produce sugar in 2nd half of May'20, compared to 35.28% at this time last year. Brazilian producers are expected to continue to maximize their sugar production, given the increased profitability of sugar production over ethanol production. The amount of sugarcane crushed was around 144 million tonnes so far till May end in 2 months up by around 12% compared to the same time previous year.

China produced only 197,400 tonnes of sugar, white value, in May 2020, down from 398,000 a month earlier but above 78,900 in the same month last year, according to China Sugar Association (CSA). As of May 31, Guangxi of China had a total of 45.79 million tons of sugarcane, a decrease of 8.92 million tons

year-on-year and produced 6 million tons of mixed sugar, a year-on-year decrease of 340,000 tons. The sugar production rate was 13.11%, an increase of 1.52 percentage points year-on-year and cumulative sales 3.74 million tons of sugar, with a decrease of 4 million tons.

Thailand sugar exports declined significantly year on year till April this year. The imports of Thai sugar by other countries experienced a decline due to the fall in sugar demand during January and April. While Vietnam was the top importer of Thai refined sugar from January to April this year, as the country had abolished sugar import quota for ASEAN-origin sugar in January. For January-April, Vietnam imported 157,925 MT of white and refined sugar (10 times more y-o-y). Despite the strong off-take from Vietnam, Thai premiums are weakening as purchases were reported to have slowed in 2nd quarter 2020. The prices of Thai sugar is higher in the international market and the buyers would seek for cheaper alternative including Indian sugar.

Fresh contracts of sugar and rice can be expected this year and for the coming sugar season as well. As the relations between India and Malaysia got better after the formation of new cabinet. Malaysia's top buyer had bought around 88,000 metric tonnes of raw sugar from India last year, whereas it procured 130,000 metric tonnes of raw sugar worth \$50 million for the January-March quarter this year. As India being the world's largest buyer of edible oils, now Indian importers will also benefit from Malaysia's decision to fully exempt palm oil from export duty for the rest of this year.

Kharif crop sowing has started from June 1st in Andhra Pradesh with the onset of monsoon. Kharif season has been set at 39.59 lakh hectares as against the normal crop acreage of 37.54 lakh hectares. Pulses, oilseeds and sugarcane crops are at vegetative stage. The targeted area under sugarcane for 2020-21 season is 1.09 lakh ha against normal crop acreage is 1.02 lakh ha.

After some crew members tested positive for Covid-19 in Santos, Brazil, the port has suspended operations and faced for 14 days quarantine. Around 70 cargo ships lined up at the port for loading sugar for export. There would be cancellations of orders if the vessels are unable to berth or load quickly. India, the second largest producer of sugar is the sole alternate at the time being as India has excess sugar stock and now the port operations are getting smoother making the way for sugar exports across the world. Brazil's top export destinations were Algeria, Bangladesh, Saudi Arabia, Nigeria and China in 2019-20 season.
