

**Sugar & Gur Domestic & International Fundamentals****Recent Update:****2**

*Steady to weak tone are extended in Sugar & gur physical markets today in India. Sugar prices closed steady at Rs.3200/q in Delhi, 3150/q in Kolhapur and by Rs. 40 to Rs.,3560/q in Vijayawada.*

*Distillery units and other companies likely to have diverted 0.8 MT of sugar production towards ethanol during the last season, which may be lower than the target, as cane acreage was lower in Maharashtra and Karnataka. It is expected that up to 2.5 MT of sugar production can get diverted for ethanol production in 2020-21 sugar season.*

*The labours and contractors have gone on strike demanding higher wages from the sugar mills in Maharashtra. At present, the labours are offered at rate of Rs.239 for harvesting per tonne cane and the yare demanding more as the rate sugar harvesting machine per tonne provides Rs.350-400. The contractors also want additional 10 per cent hike in the commission from 18.5 per cent.*

*In Uttar Pradesh, the mills had diverted around 5LT cane to produce ethanol from B- molasses in 2019- 20 season. And the mills are expected to divert around 6-10 LT this year (2020-21). One of the reasons for the increase in diversion is that the OMCs are directed to release the payment within 30 days and the central government's aid given to the distillery units for the expansion of ethanol production capacity. The state had offered 105 crore litre of ethanol to OMCs in 2019-20 season, of which 63.73 crore litre has already been supplied.*

*Ethanol production in 2020-21 which starts from December and continues till November is estimated to increase to 360 crore liters. This would help the government to achieve a target of 7.5 to 8% ethanol blending in petrol up from the current 5.1%. Currently, the ethanol prices are between Rs. 43.75 and Rs.59.48 per litre depending on the quality of molasses from which it is extracted. To encourage the cane crushing towards ethanol production, the government is mulling raising the price of ethanol derived from B-heavy molasses byRs.3.34 per litre, C-heavy molasses by Rs.1.94 per litre, and 100% cane juice by Rs.3.17 per litre.*

*Pakistan likely to import 1.517 lakh tonnes of sugar to meet the domestic demand. According to private dealers, the sugar stocks of 0.445 million tonnes are available till 4th November'20 in Punjab and 0.565 million tonnes sugar would be available on 9th November'20 in Sindh. The sugarcane crushing in Punjab will start in the first week of November whereas the sugarcane crushing in Sindh would start by mid-November.*

**Weather Forecast:**

*Heavy to very heavy rainfall with extremely heavy falls very likely at isolated places over Telangana; heavy to very heavy rainfall at isolated places over south Konkan & Goa, Madhya Maharashtra, Marathawada and Coastal & North Interior Karnataka and heavy rainfall at isolated places over Vidarbha, south Chhattisgarh, Odisha, Andaman Islands, north Coastal Andhra Pradesh, Rayalaseema, Kerala & Mahe and South Interior Karnataka.*

**Previous Updates:**

***According to Australian Sugar report released by Australian sugar milling council, the cumulative cane crush reached 19.08 million tonnes (62%) since the beginning of the season from Jun'20 while the operations were ahead in 2019 by crushing around 66% of cane during the same time last year. The crushing operations were delayed and slowed down during the beginning of the season this year. The country is expecting rains in Queensland, the major cane growing state due to which further delay in crushing is expected. Australia in 2020-21, is estimated to produce 30.9 million tonnes of sugarcane against 30.04million tonnes produced in 2019-20 season.***

***The sugar mills in Uttar Pradesh and Maharashtra are expected to start crushing from 15th Oct'20 and no announced has been done regarding hike in MSP. The government would increase the sugar sales quota for the coming months so as to increase the sales so that the mills could pay cane arrears. However, the demand was weaker in 2019-20 season, but is expected to increase in the coming season until all the social gathering places becomes operational by 100 per cent.***

***The government has been encouraging the sugar mills to divert cane crushing towards ethanol production so as to avoid surplus sugar production. Therefore, the government has given a one month duration to the mills for submitting their proposals to avail loans at a subsidized interest rate for increase ethanol capacity in the country. So far, 68 proposals worth Rs.3,500 crore have been approved and banks have sanctioned the loan.***

***The domestic sugar prices fall after the announcement of sales quota for the September month. The sugar traders consider that the quota is higher against the demand considering the surge in number of coronavirus cases and the sugar industry is awaiting for any announcement regarding rise in sugar MSP.***

***The monthly sales quota for October 2020 was fixed at 23 Lakh MT, distributed among 547 mills. The Oct'20 sales quota is 2 LT higher compared to the previous year quota during the same month and 1 LT higher compared to the previous month's quota (22 LT). The demand for sugar expected to increase during October amid upcoming Hindu festivals (Durga puja and Dussehra) and keeping in view the easing of lockdown nationwide.***

***Recently, the Thailand Sugar Mills Corporation recently reported that Thailand 2020-21 sugar production likely to fall by 13% compared to the previous year to an 11-year low of 7.2 MMT as dry weather this year devastated cane crop. Also, USDA recently declined Australia 2020-21 sugar production estimate to 4.3 MMT from an April forecast of 4.5 MMT and sugar export estimate to 3.40 MMT from an April forecast of 3.54 MMT.***
