The sugarcane production is likely to be 70-75 million tonnes in the new crop year. Thai sugarcane output decreased to 66.7 million tonnes in 2020-21 from 74.9 million tonnes in 2019-20. The state government is yet to announce the FRP for the next season, as per the local sources, the area is expected to increase to 6.68 lakh hectares in the current year but it is only possible if the government agrees to hike FRP to the input cost level.

India's sugar production is at 30.67 million tonnes (MT). According to the Indian Sugar Mills Association, Sugar mills are confident that they would be able to sell 0.8 -1 MT more in domestic market compared with last year and export 7 MT, which is 1.1 MT more than the previous season. This is expected to leave the sugar industry with 2-2.5 MT less sugar stocks at the end of the season to September 30. According to the Department of Food and Public Distribution records, closing stocks at the end of the last season was 110 MT. As on June 15, only five sugar mills are continuing with sugarcane crushing and the rest of the mills across the country have closed crushing operations already.
