Previous Updates:

Brazil Sugar Production have decreased in July 2021. According to data released by the trade association, UNICA Sugar production in the center-south region of Brazil has lowered by 2.8 percent in the first half of July compared with last year. The mills in the region have produced 2.94 million tonnes of sugar. As per the information shared by the 24 mills, agriculture yield of sugarcane was 14% lower in the first half of July compared to last year. The mills have in the first half of July crushed 45.6 million tonnes of cane which was 2.3% less compared to last year. At the same time, ethanol production increased by 1.1% to 2.16 billion litres.

Over 2.5 lakh hectares area is estimated to be damaged in Maharashtra due to rains and Floods. The recent spate of rains and floods which have ravaged Maharashtra over past few days, has seen over 2.5 lakh hectares of crop area bearing the brunt of it. Many parts of Maharashtra have faced torrential rains, which have led to more than 100 deaths across the state. Konkan, Kolhapur, Sangli, Satara, Parbhani, Akola, Washim, Nagpur and Wardha are some of the districts which have reported damage to the crop. By far, the cane capital of Kolhapur has seen the maximum damage with 50,000 hectares of cropped area reportedly destroyed. Sangli, Pune and Satara have reported around 4,000 hectares each damaged, while Washim, Akola, Nagpur and few other districts in Vidharbha have reported 30,000 hectares of damage. As per the Sugar industry experts, unlike crops like soybean, groundnut and vegetables, chances of complete crop loss is minimal in cane due to the physiology of the crop, which allows it to survive extremes in terms of drought and floods better than any other crop, as even if the top portion of the crop is submerged in flood waters for 10 day, the crop can regenerate and revive. Also, the final figure is expected to raise as more flood waters recede, allowing officials to reach remote areas that have been cut off so far.

Brazil Sugarcane crop may get affected due to upcoming new polar air mass. The sugarcane crop in Brazil was affected due to frost in Brazil last week and is likely to get affected further due to new polar air mass that will move over the country's agricultural areas this week, this is the third cold wave that will impact the crops in Brazil. According to the forecast, the air mass will reach southern Brazil by Wednesday.

Uttar Pradesh leads in ethanol production in India. The state has produced 58 crore litres of ethanol and the total operated distillers were 54, the average ethanol blending rate has reached 7.93 percent. Ethanol output is likely to increase in the upcoming season 2021-22 as government has emphasized its production.

Mawana Sugar Mill has cleared cane dues of Rs. 102 crore. The sugar mill has crushed 202.08 and 104.78 lakh quintals of sugarcane respectively in the crushing season 2020-21 in their 2 sugar mills Mawana sugar mill and Mawana & Nanglamal sugar complex. The sugar mill on 24th July'21 has cleared cane dues of Rs. 102 crore which include Rs. 50.19 crore by Mawana sugar works and Rs. 51.81 crore by the Nanglamal sugar complex.

Bijnor sugar mill will focus on ethanol production. Around five sugar mills in the district have accelerated ethanol production. The mills have produced around 9,60,40,000 litres of ethanol, out of which 8,86,94000 litres of ethanol have been sold, mills have paid 55 per cent of the money earned by selling ethanol to sugarcane farmers. The mills from the district have sold ethanol worth Rs 504.72 crore. Currently, for the coming season 2021-22 ethanol output is likely to increase as the government has emphasized its production.
