

Recent Update:

A firm tone was witnessed in Sugar physical markets today in India. Sugar prices were higher in Delhi by Rs.10-20 at Rs. 3630/q. Prices were higher in Kolhapur at Rs. 3500/q.

India and Thailand would be competing for sugar export during 2021-22 season. The India and Thailand would be competing for Indonesia market besides these two nations, Australia will also compete for market share there. Thai sugar will give competition to Indian sugar, especially due to the high freight differential (\$15-\$20) for destinations such as Indonesia. India needs to price its sugar to match Thai offers. Thailand sugar production is projected to rebound by 33 per cent to 10 MT this season. After taking into consideration domestic consumption of 3 MT in Thailand, it would have 7 MT of surplus sugar to export. It is expected to export 2.5-3 MT more sugar than last year. According to ISMA, after a record 7.1 million tonnes (MT) exports last season (October 2020-September 2021), Indian sugar shipments will likely face stiff competition from Thailand during the 2021-22 season. Sugar prices in the domestic market are currently prevailing between Rs. 3200- Rs. 3500 per quintal.

Weather Forecast:

Thunderstorm accompanied with lightening very likely at isolated places over Andaman & Nicobar Islands, with lightening at isolated places over Sub- Himalayna West Bengal & Sikkim, Konkan & Goa, Madhya Maharashtra, Marathwada, Coastal Andhra Pradesh, Rayalseema, Tamil Nadu, Pondicherry, Karikal. Heavy rainfall at isolated places over Andaman & Nicobar Islands, Konkan & Goa, Madhya Maharashtra, Marathwada, Coastal Karnataka and Kerala & Mahe.

Previous Updates:

Maharashtra sugarcane labourers will get an identity card. The Maharashtra government has initiated a programme to keep a record of the migrant workers and provide them with an identity card. The government plans to provide health schemes, financial assistance and accommodation for sugarcane cutters and their families and identity cards will help to get the benefits of schemes planned for them. Earlier, Over 6 lakh workers in the Marathwada region of Maharashtra migrated to western parts of the State, and neighboring Karnataka and Andhra Pradesh for six months between October to March to cut sugarcane. However, this massive movement of workers was not on government record and hence they were deprived of development schemes and social security.

Sugar mills have exported around 7.06 million tonnes of sugar in the 2020-21 season. According to the All India Sugar Trade Association, out of the total shipments, 7.06 million tonnes of sugar have been exported, while 1,66,335 tonnes are under loading in the 2020-21 season. The maxium exports were undertaken to Indonesia at 1.82 million tonnes, followed by Afghanistan at 6,69,525 tonnes, UAE at 5,24,064 tonnes, and Somalia at 4,11,944 tonnes in 2020-21 season. For the coming 2021-22 sugar season, export deals of about 15 lakh tonnes have taken place till 4th October 2021. Whereas, as per the Indian Sugar Mills Association India's sugar export has risen around 20 percent to an all-time high of 7.1 million tonnes during the 2020-21 season.

Pakistan's government is planning to increase the minimum purchase price (MRP) of sugarcane from Rs. 220 per 40 kg to Rs. 250 per 40kg this season. The Sugarcane Control Board (SCCB) is planning to propose a hike of at least Rs. 30 per 40kg in the previous year's rate, the meeting is scheduled for the next week. The cane prices are scheduled to increase due to an increase in the farm input price and high electricity rates for tube wells. According to the Punjab Crop Reporting survey, the failure of the cotton crop has led the farmers to turn to cane cultivation. The area under sugarcane cultivation in the country has also increased by 12 percent to 2.148 million acres against the set target of 1.880 million acres.

The sugar export from India is expected to remain profitable in the coming season. Due to the rise in sugar prices in the international market sugar exports are expected to increase in the coming month. According to Director General of ISMA, the global sugar prices have again moved up beyond 20 cents and the dry weather in Brazil is expected to lower the sugar output in that country and Thailand's sugar production is yet to return to a normal level. As a result, the global prices would remain bullish. World prices are very good, therefore even without a subsidy India is in a position to export sugar into the international market.
