#### **Recent Update:**

**Sugar physical market showed a stable trend today in India.** Sugar prices were slightly higher in the Delhi market at Rs. 3515/qtl whereas prices were stable in Kolhapur at Rs. 3500 per quintal.

Sugar millers in Maharashtra have urged the Centre to announce an export policy for the 2022-23 sugar season. The government in the 2022-23 season is planning to allow sugar exports in two tranches from October 2022. The sugar exports of around 4-5 million tonnes will be allowed in first tranche and rest in the second. Currently, sugar exports are under restriction till 31<sup>st</sup> October 2022.

According to the Ministry of Agriculture and Farmer's Welfare data, till 02<sup>nd</sup> September 2022, the area under sugarcane cultivation has reached 55.65 lakh hectares as compared to 54.70 lakh hectares during the previous season.

#### **Previous Domestic Market Updates:**

According to the market sources, sugar exports in India are likely to fall at around 8 million tonnes in the upcoming 2022-23 season as compared to 10.5 million tonnes in the 2021-22 due to expected lower opening stock and an increase in diversion of sugar for ethanol production. Around 45 lakh tonnes of sugar is expected to be diverted for ethanol in the next season against 34 lakh tonnes in the 2021-22 season.

In a notification issued on 31<sup>st</sup> August 2022, the food ministry has allocated higher monthly sales quota of 23.5 Lakh MT (LMT) for monthly September 2022, compared to 22 LMT allocated during August 2022. As per Agriwatch Sources, demand is expected to remain smooth with the beginning of the Ganesh Chaturthi festival and the upcoming Navratri festival in early October month.

As per the market sources, Sugarcane crushing is likely to commence early from 01<sup>st</sup> October 2022 in Maharashtra. However, the official decision is yet to be taken by the Cabinet Committee on 15<sup>th</sup> September 2022. The sugarcane crushing usually starts from late October 2022 to early November and ends in mid-April but during the previous 2021-22 season the sugar crushing continued till June 2022 mainly because of excess production. According to Indian Sugar Mills Association, overall sugar production during the 2021-22 season in Maharashtra was 138 lakh tonnes which is further expected to increase in the coming 2022-23 season to 148 lakh tonnes amid good rains in the key growing districts i.e. Kolhapur, Sangli, Satara, Ahmednagar, Nasik, Amravati, Nagpur etc

According to the market sources, sugar exports in India are likely to fall at around 8 million tonnes in the upcoming 2022-23 season as compared to 10.5 million tonnes in the 2021-22 due to expected lower opening stock and an increase in diversion of sugar for ethanol production. About 45 lakh tonnes of sugar is expected to be diverted for ethanol next season against 34 lakh tonnes this season.

## **International Market Updates:**

Brazil Sugar production is expected to fall in the coming 2022-23 season. The major reason behind the fall in production is bad weather which is likely to affect the crop, along with it the expected shift in acreages as farmers have switched to more profitable crops like soya and corn. Brazil's Center-South region sugar production was down by around -12.8% year on year basis to 18.625 MMT in the 2022-23 season. Also, CONAB, Brazil has reduced its sugar production estimate to 33.9 MMT from its previous forecast of 40.3 MMT in anticipation of reduced acreages under the crop.

Also, the hot and dry weather conditions in France and Germany threaten to lower sugar beet yields in the European Union. However, the outlook for larger sugarcane crop in India and Thailand is bearish for sugar prices.
