

Recent Update:

Sugar physical market showed a stable trend today in India. Sugar prices were higher in the Delhi market at Rs. 3540/mt and in Kolhapur were at Rs. 3400 per quintal.

According to Indian Sugar Mills Association, Government may allow sugar export an additional 30 lakh tonne. This would ensure steady domestic prices, enabling timely cane price payment to farmers and lower inventory levels ensuring there are no additional costs incurred by sugar mills.

Government of India has released sugar export policy for the 2022-23 season. As per GOI, to prevent uncontrolled export of sugar and with a view to ensure sufficient availability of sugar for domestic consumption at a reasonable price, GOI has decided to allow export of sugar up to a reasonable limit w.e.f 01.11.2022 to 31.10.2023.

- All grades of sugar i.e. raw, white as well as refined sugar can be exported by a sugar mill / refinery / exporter up to the extent of 60 LMT allocated.
- All the sugar mills have been allocated a uniform export quota of 18.23% of their 3 years average production of sugar in the operational sugar season.
- The new sugar mills which may commence sugar production for the first time during the sugar season 2022-23 or the mills which were closed in previous three season but restart in season 2022-23 or the mills who have not been allocated quota will be allocated export quota of 18.23% of their estimated sugar production in sugar season 2022-23.

The National Federation of Cooperative Sugar Factories Limited has estimated a dip in sugar production by 14.73% during the first month of 2022-23 season. Sugar mills in India had manufactured 4.05 lakh tonne in October 2022-23 as against 4.75 lakh tonnes during the same period in the 2021-22 season

According to the National Federation of Cooperative Sugar Factories Limited, sugarcane crushing has begun in the states of Maharashtra and Karnataka as the rains has completely withdrawn. The sugarcane crushing operations in Uttar Pradesh & rest of the cane growing states is likely to start in a week's time. It is forecasted that the sugarcane crushing season might be extended till the month of May or even few days of June in some states where cane area and cane productivity both are projected to be increased due to prolonged rain earlier in major growing areas of the country.

Weather Forecast

Heavy rainfall at isolated places over the Andaman & Nicobar Islands. Thunderstorm accompanied with lightening at isolated places over Tamil Nadu, Pondicherry & Karikal, Kerala & Mahe.

International Market Updates:

Sugar Consumption in China is expected to decline in the 2022-23 season. The Consumption in China is expected to be lower than 15 million tonnes in the 2022-23 season mainly due to severe restrictions because of the pandemic, the sale of candy, cakes and sweetened beverages has also fallen. As per the market sources, the imports of raw sugar by refineries in China have fallen to the lowest level since 2019 and are projected to be at 4.47 million tonnes in 2022. The imports are likely to lower further in 2023 at 4 million tonnes as the stocks remain higher.

Sugar Production from Center south region of Brazil is set to recover to 36 million tonnes from previous estimate of 33 million tonnes in 2022-23 season. The sugar will hit the global market by May 2023, the freight rates have also fallen which will further help in higher exports from Brazil.

Both Thailand and India's sugar production is expected to increase in the 2022-23 season. Sugar production may increase to 10.5- 11 million tonnes in the 2022-23 season. India's sugar production is expected to increase to 36 million tonnes as compared to 30 million tonnes in 2021-22 season.

Ethanol:

The Cabinet Committee of Economic Affairs, has approved higher ethanol price derived from different sugarcane based raw materials under the Ethanol Blending Program for the 2022-23 season and Ethanol Supply Year (ESY) 2022-23 From 01st December 2022 to 31st October 2023. The Government has also advanced the target of 20% ethanol blending in petrol from 2030 to ESY 2025-26.

Raw Material	Ethanol Procurement Price (Rs./liter)				
	2018-19	2019-20	2020-21	2021-22	2022-23
C-heavy molasses	43.46	43.75	45.69	46.66	49.41
B-heavy molasses	52.43	54.27	57.61	59.08	60.73
Sugarcane juice/Syrup	59.19	59.48	62.65	63.45	65.61
Damaged food grain	47.13	50.36	51.55	-	
Surplus rice issued by FCI	-	-	56.87	-	
Maize	-	-	51.55	-	

The highest price was for ethanol manufactured from juice or sugar syrup while the one manufactured from C molasses was lowest price. This was done to incentivize the production of ethanol and reduce production of sugar by mills. During the 2022-23 ethanol supply year, India is expected to achieve 12% ethanol blending. Sugar Mills are expected to divert about 45 lakh tonnes of sugar towards ethanol production.

Uttar Pradesh: Mill-wise Ethanol List (04/11/2022)
