

Recent Update:

Sugar physical market showed a weak trend today in India. Sugar prices were lower in the Delhi market at Rs. 3525/qrtl and in Kolhapur were lower in Kolhapur at Rs. 3350 per quintal.

As per the Indian sugar mills association, Sugar production in India has reached 19.9 lakh tonne as against 20.8 lakh tonne till 15th November 2022. The crushing operations were delayed this year because of rains during late October month and early November. As per market sources, around 35 lakh tonnes of exports contract have already been signed for the 2022-23 season. Out of which, 2 lakh tonne has been physically exported till October 2022 as compared to 4 lakh tonnes during the corresponding period last year.

State	Sugar Production		Mills in Operation	
	(as of 15 th Nov'22)		(as of 15th Nov'21.)	
	No. of Operating Mills	Sugar Production	No. of Operating Mills	Sugar Production
Uttar Pradesh	76	3.6	74	2.9
Maharashtra	141	8.6	134	8.9
Karnataka	62	6.1	63	7.6
Gujarat	14	0.6	14	0.8
Tamil Nadu	5	0.8	3	0.4
All India	321	19.9	308	20.8

Sugarcane crushing in Punjab is likely to start from 20th November 2022. The Punjab Government has also increased the State Advised Price SAP for the 2022-23 season. The price of advanced, medium, and late-quality sugarcane has increased to Rs 380 per quintal, Rs 370 per quintal and Rs 365 per quintal respectively.

As per the market sources, around 93 sugar mills had started cane crushing operations in Maharashtra for the 2022-23 season. Earlier, sugarcane crushing was delayed due to heavy rainfall. Around 215 sugar mills are likely to participate in the cane crushing operation during the 2022-23 season as compared to the previous season 205 sugar mills in the 2021-22. The commissioner has issued crushing licenses to 165 mills of which 84 are in the cooperative sector while the rest are in the private sector.

Weather Forecast

Thunderstorms accompanied with lightning at isolated places over Tamil Nadu, Pondicherry & Karaikal.

International Market Updates:

According to the U.S. Crop progress report, as of 14th Nov, 2022. Overall 98 percent of the U.S sugarbeet crop is harvested as compared to previous week 94 percent. During the previous season sugarbeet harvested was around 99 percent.

The International Sugar Organization has forecasted that sugar production may increase by around +4.5% year on year basis to a 5-year high of 181.9 million tonne in 2022-23 season, as a result, global sugar market would be in a surplus of +5.6 MMT. However, higher sugar output in India is bearish for prices. India's Sugarcane acreages has increased by +5.4% year-on-year basis, and sugar production is expected to increase by +2.9% year-on-year basis to 35.8 MMT.

World Balance Sheet				
	2022-23	2021-22	Changes in Million tonne	Percentage Change (%)

Ethanol:

The government has released guidelines for producing ethanol from sugar and grain-based feedstocks in India. According to the new guidelines, the validating agencies will have to send a copy of the validation report to the directorate of sugar and vegetable oils, the department of food and public distribution and the ministry of petroleum and natural gas within a fortnight of undertaking the onsite validation.

- The guidelines issued encompass sugar/molasses-based ethanol distilleries and grain-based distilleries. These norms will help distilleries identify the quantity of ethanol produced from different routes.
- The quantity of ethanol produced by any of the routes should conform to the desired specifications as per IS 15465(22): Anhydrous ethanol for use in automotive fuel or as per the requirement of oil marketing companies. As specified in their tender document, the ethanol content percentage by

volume shall not be below 99.6 at 15 degrees Celsius. These distilleries units shall be operated with one type of feedstock at a time.

- However, in case of ethanol unit having two identifiable processing streams, they may use a different class of feedstock for the two streams subject to proper recording of data of two streams with respect to quantities and qualities.
- The validating agency shall specify the loss in sugar recovery due to diversion, sugar recovery during the diversion and estimated sugar recovery, considering no diversion of juice/syrup or B,C Heavy molasses so as to facilitate the calculation of fair and remunerative price (FRP) for sugarcane.

The Oil Marketing Companies, have proposed an allocation of around 400 crore litres at different OMC'S locations across the country. The state-wise allocation is mentioned below:

State-wise Allocation					
State	Sugarcane Juice	B-Heavy Molasses	C-Heavy Molasses	Damaged Food Grains	Surplus Food Grains
