- However, average price during March 2023 remained firm at 3272 per quintal around -0.3% down from previous month and 0.6% higher from previous season. For the coming April month prices are likely to trade higher but may trade moderate after the Brazil and Thailand sugar which will come in the market between Apr- end May.

International Market

- Sugar prices rise on surge in crude oil prices, NY sugar at 6.5-year high and London sugar at 10.5-year high.
- Tighter global sugar supplies support bullish prices.
- Reduced sugar production in India, Europe and increased sugar output in Brazil impact prices.
- Global supply of sugar is tightening, mainly due to reduced exports from India after rains hurt the sugar cane crop and as more sweetener is diverted to ethanol.
- Sugarcane production in Brazil is expected to be higher, but rains have delayed harvesting and port capacity may constrain supplies to the global market.
- Sugar prices in Pakistan's retail market have increased by Rs. 20 per kg within the past one month. In the wholesale market, sugar prices have jumped from Rs. 4,500 per 50-kg bag to Rs. 5,600 per bag.
- The Pakistan Sugar Mills Association (PSMA) attributes the hike to government-imposed taxes, high interest rates, and an increase in sugarcane prices.
