

Domestic Market Highlights

- The 2022-23 Sugarcane crushing season has been completed across India except in Karnataka. Karnataka sugarcane special crushing season has commenced and full pace crushing is expected in the coming July month. However, with the arrival of monsoon sugarcane sowing has begun in India for the 2023-24 season.
- Demand was slightly higher in the major markets during the past month.
- During the past month, On 28th June 2023, the central government hiked the Fair and Remunerative Price (FRP) of Sugarcane by Rs 10/quintal to Rs 315/quintal for the 2023-24 season for a basic recovery rate of 10.25% against the previous season FRP of Rs. 305/quintal.
- It has also been approved to provide a premium of Rs.3.07/quintal for each 0.1% increase in recovery over and above 10.25%, & reduction in FRP by Rs.3.07/quintal for every 0.1% decrease in recovery. There shall not be any deduction in case of sugar mills where recovery is below 9.5%. Such farmers will get Rs.291.97/quintal for sugarcane in the ensuing sugar season 2023-24 against Rs.282.12/quintal in 2022-23 season.

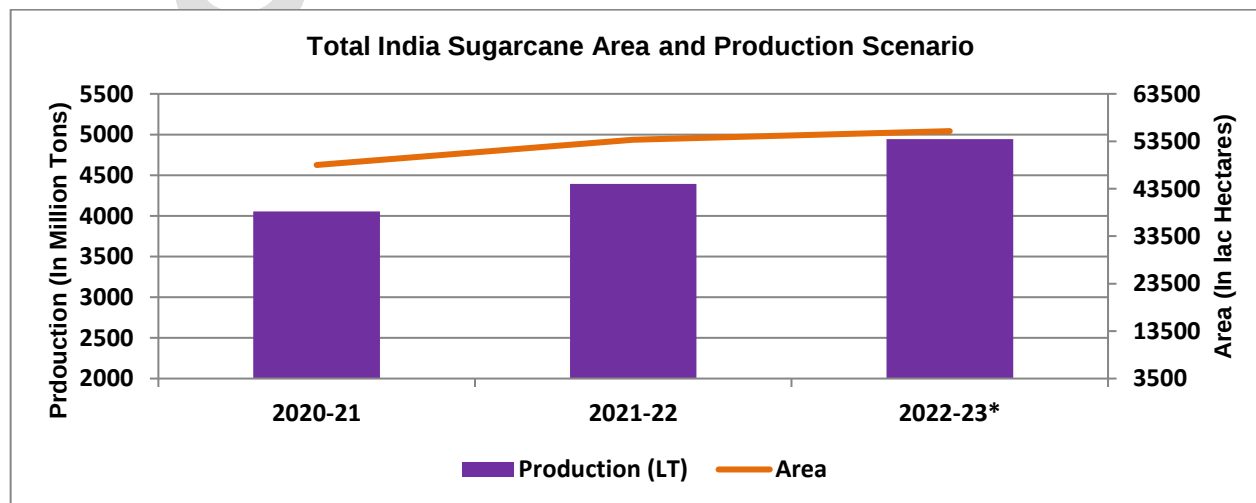

- As per IMD, conditions are favorable for further advancement of SW-monsoon and by end of June to early July, the key states are likely to receive some rainfall activity. Rain deficiency has been noticed in major sugarcane grown states including MH, UP, and Karnataka amidst delayed monsoon progress.

- Sugarcane output for the upcoming 2023–2024 season could be impacted if the monsoon is further delayed. Therefore, the coming 10-15 days (1st -2nd week of July) are very crucial for the sugarcane crop in Maharashtra and Karnataka.

Sugarcane Sowing Progress (2023-24 season):

State	Sugarcane Sowing progress as on 30th June'23		
	(Lakh Ha)		% Change
	2023	2022	
Maharashtra	10.54	12.11	-12.96

Sugar Production Estimate:

Source: dacnet.nic.in *03rd Advance estimate

As per the Third Advance Estimates by the Ministry of Agriculture and Farmers Welfare, Total Sugarcane production in India for 2022-23 is estimated at 4942.28 LMT, higher than the previous estimate of 4687.89 LMT. Agriwatch has estimated sugarcane production at 4452.00 LMT mainly due to poor yield.

India's Sugar Production Estimate (LMT)		
	2021-22	2022-23*
AgriWatch	356	330
ISMA	360	328
USDA	368	358

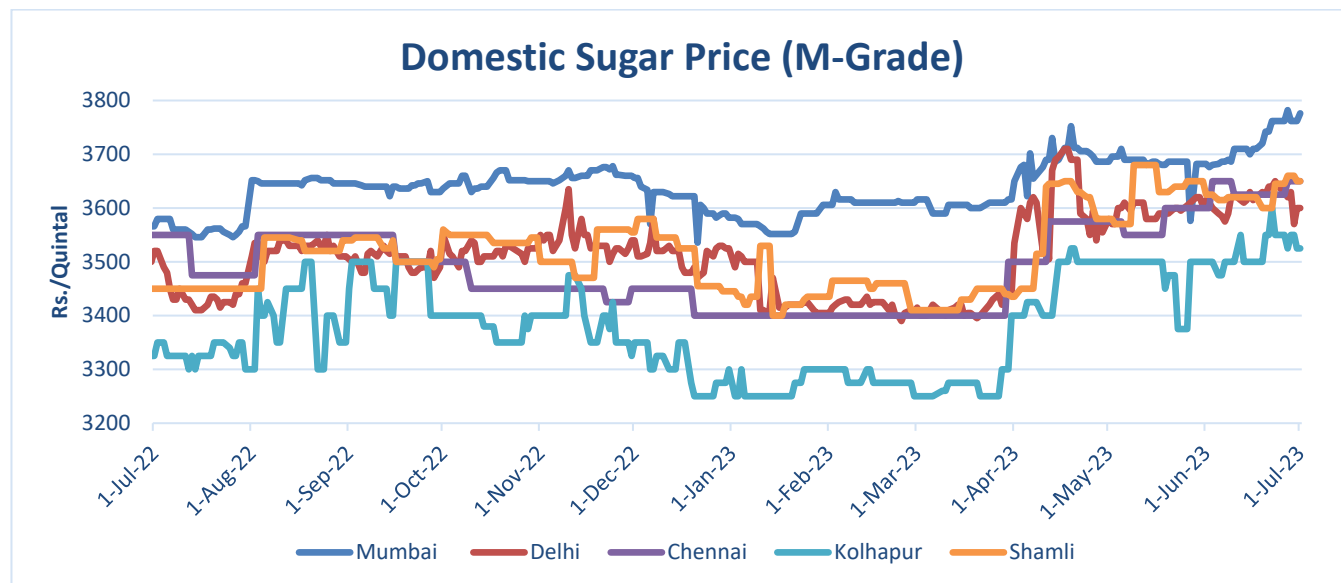

Domestic Sales Quota:

- Food Ministry has allocated 24 LMT monthly sugar quota for July 2023 which is around 0.50 LMT higher than that of the previous month's quota. With the onset of monsoon, sugar demand in July is expected to go down which along with the increased sales quota by the government could lead to prices to decrease by Rs. 20-50 per quintal in the major markets.

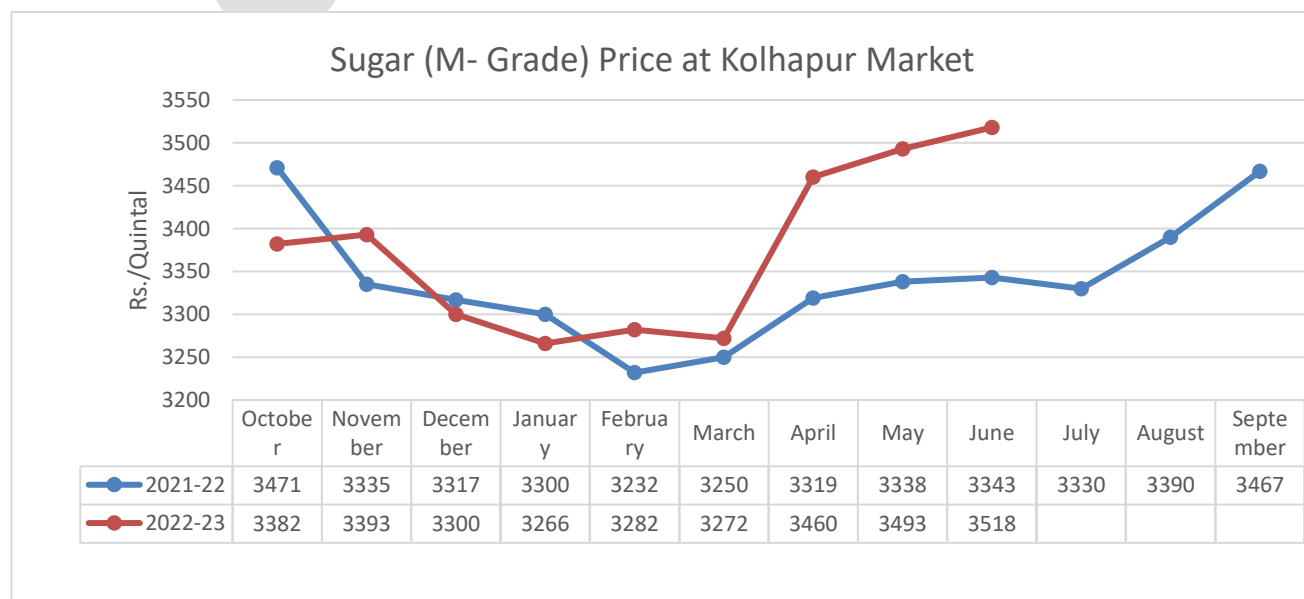

Source: Agriwatch

Sugar Prices:

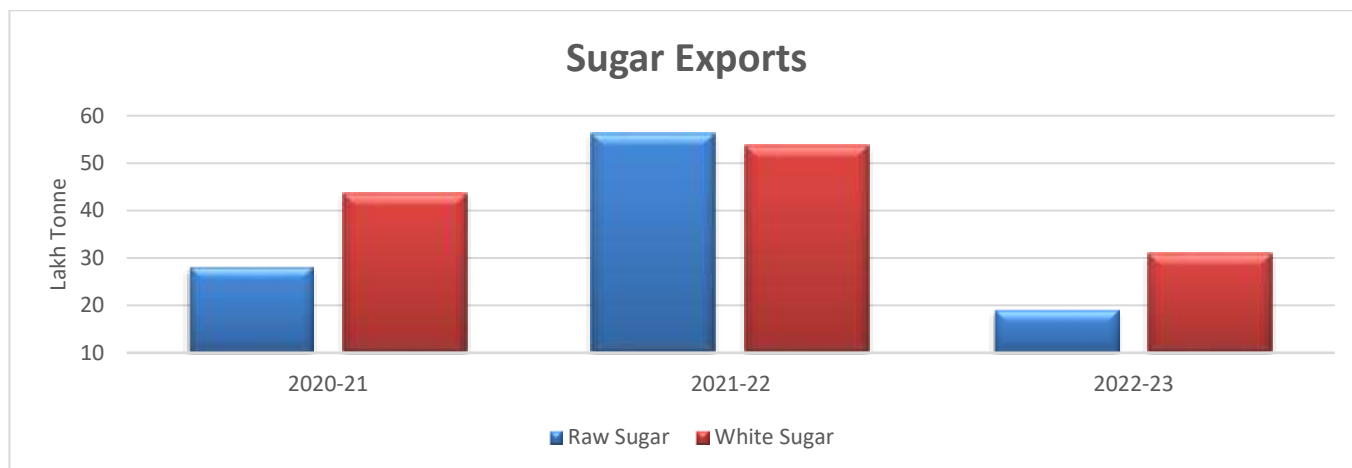

Domestic sugar prices have increased amid lower production expectations and increased festive demand in the market. The Sugar M-Grade at Kolhapur is at Rs.3525 per quintal, around Rs.25/quintal higher from previous month.

Average price at Kolhapur market during June 2023 were at Rs. 3518 per quintal, up by 4% from previous month and 7% higher from previous season. For the coming July month prices are likely to remain bearish due to highly sales quota by the government.

Source: AgriWatch

Sugar Export:

Source: AgriWatch

India's sugar export has reached 60 lakh tonne exhausting the allocated export quota for the 2022-23 season. However, the government is unlikely to allow further export as domestic production remains lower at 330 lakh tonne in the 2022-23 season, though mills have been appealing for an additional quota.

As a result, Brazil has the opportunity to export more sugar in the market. As per the sources, Asian and African buyers have already shifted to Brazil from India.

Sugarcane dues:

Uttar Pradesh:

- According to the UP-Sugar Mills Association, sugar mills across the state have cleared around 80% of the cane dues (around Rs. 30,749.23 crores) for the ongoing 2022-23 crushing season. Sugarcane crushing for 2022-23 season has been completed in Uttar Pradesh. Sugar mills have produced around 105.41 lakh tonne of sugar during the current season.

Source: AgriWatch; Unit MMT

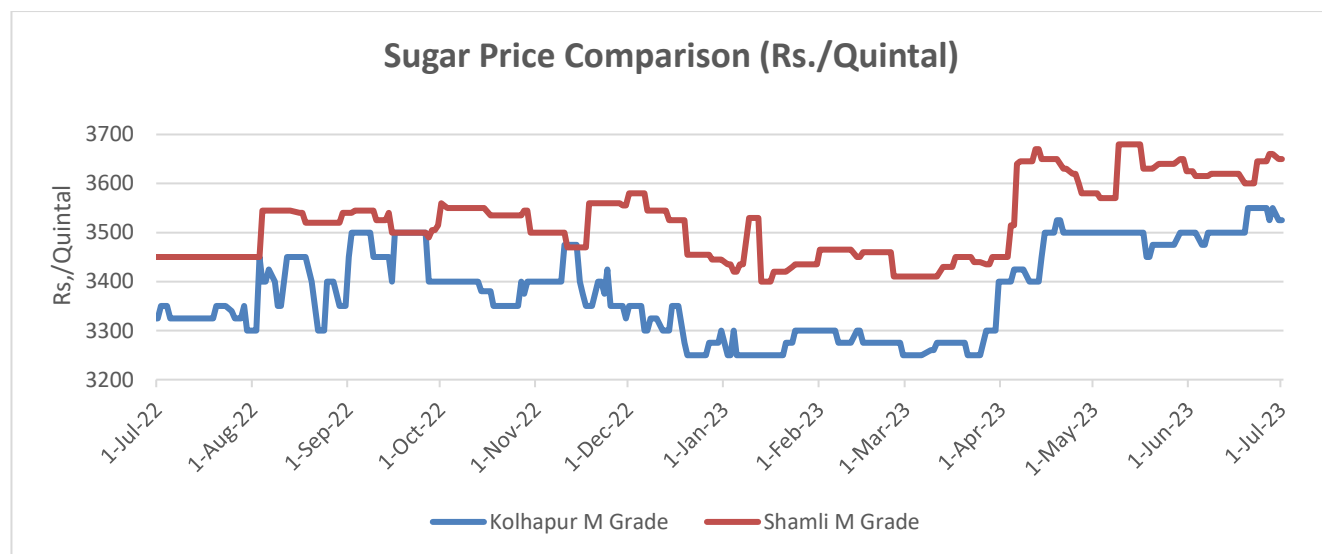

AgriWatch has revised its sugar production at 33.0 MMT in the 2022-23 season, lower from 2021-22 season due to poor sugar recovery expectations from Maharashtra and Uttar Pradesh along with unseasonal rainfall during the past months across India. Exports for the 2022-23 season are expected to be lower at 6.0 MMT. Further, domestic consumption is expected to improve in 2022-23 season to 27.2 MMT from 26.5 MMT in 2021-22 season.

Price Scenario of June 2023:

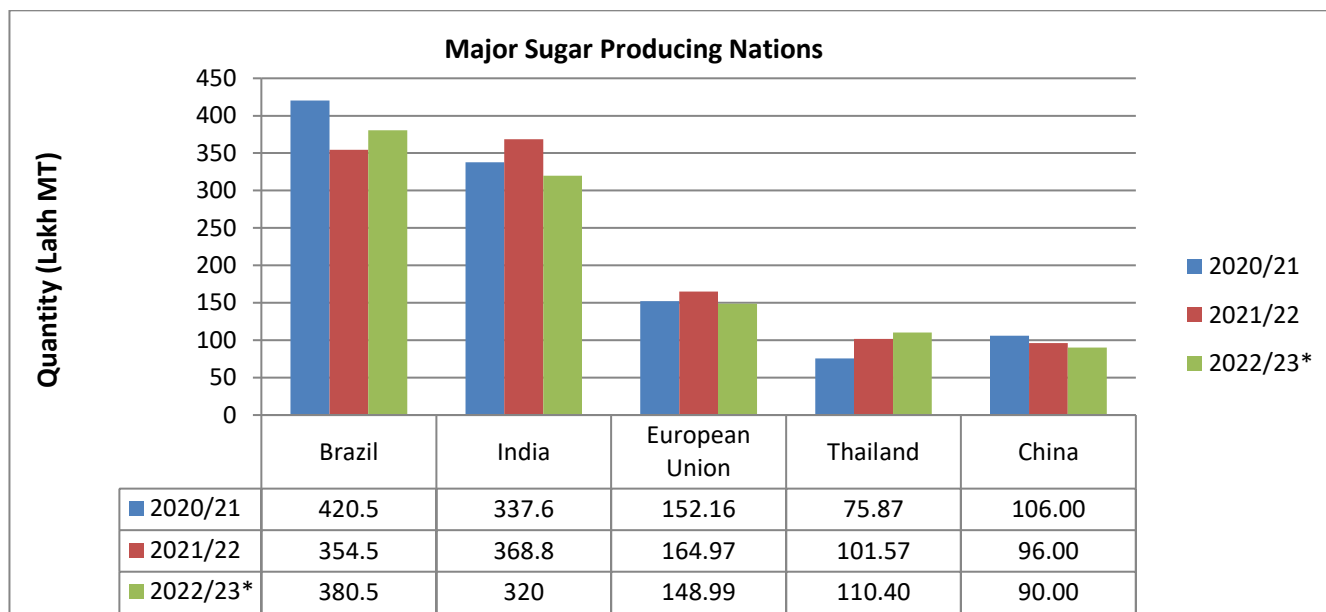

Sugar prices had increased in the major markets across India last month due to improved demand in the domestic market. The average sugar prices were at Rs.3615 per quintal in Delhi market. Prices in Maharashtra also stood slightly higher at Rs.3719/q in Jun'23 as compared to the previous month.

Price Projection for the Next Month:

As per AgriWatch estimates, spot sugar prices (M grade) in the benchmark Kolhapur market are likely to remain between Rs.3,400 -3,500 per quintal in July 2023. With the arrival of monsoon demand is likely to go down in the domestic market. In Shamli market prices were steady at Rs. 3650 per Quintal.

International Market

Source: USDA

Major Market Highlights:

International Sugar Organization has revised the sugar production estimated to rise from 172.52 million tonne to 180.43 million tonne for the 2022-23 season. Meanwhile, consumption is projected to rise to 176.280 million tonne, up from 174.773 million tonnes last season. The projected trade balance has a surplus of 0.404 million tonne in 2022-23 season and 0.765 million tonnes in 2021-22 season.

World Sugar Balance Sheet				
Details	Season		Difference	
	2022-23	2021-22	In Million Tonne	Percentage Change

Source: ISO; Unit: Million Tonne

Brazil:

- Due to favorable weather conditions and good rainfall, Sugarcane crushing in Brazil is expected to increase in the 2023-24 season to around 606.5 million metric tonne.
- Earlier, Brazil's sugar production until May 2023-24 increased by 37.7% year-on-year to 6.972 MMT. Moreover, the percentage of sugarcane crushed for sugar rose to 46.88% compared to 40.5% in the previous year.

Thailand:

- Despite record-high prices for cane, the area under cane cultivation may reduce in Thailand. Sugarcane production in Thailand may fall in the coming season mainly due to expectation of El Nino phenomenon and farmers shifting to other profitable crops (Cassava), sugarcane output for 2023-24 is expected to fall by 21% to 74 million tonne compared to the 2022-23 season.
- Sugar production in Thailand has reached 10.998 million tonnes, raw value, which is 1.275 million more than which was produced by the same period last year.

Sugar Season 2023-24:

- Sugar production is expected to pick up in the coming 2023-24 season. United States Meteorological Department has hinted at the threat of El Nino by the end of July, but is likely to have limited impact as, water reservoirs are full due to excess rainfall last year. Also, before the outbreak of El Nino, general rainfall is expected in the months of June-July. Hence, there is little possibility of adverse effects of El Nino on sugar production and the crushing season of 2023-24.

International Sugar Prices

The Raw Sugar futures ICE traded higher by 22.25 percent at Rs. 3,977 per Quintal. The LIFE Sugar traded higher at Rs. 5,058 per Quintal as compared to the previous season of Rs. 4,184 per Quintal.

Comparison of Indian Sugar Prices (All India Average) and International Refined Sugar Prices (LIFFE)

Source: USDA and Agmark.net

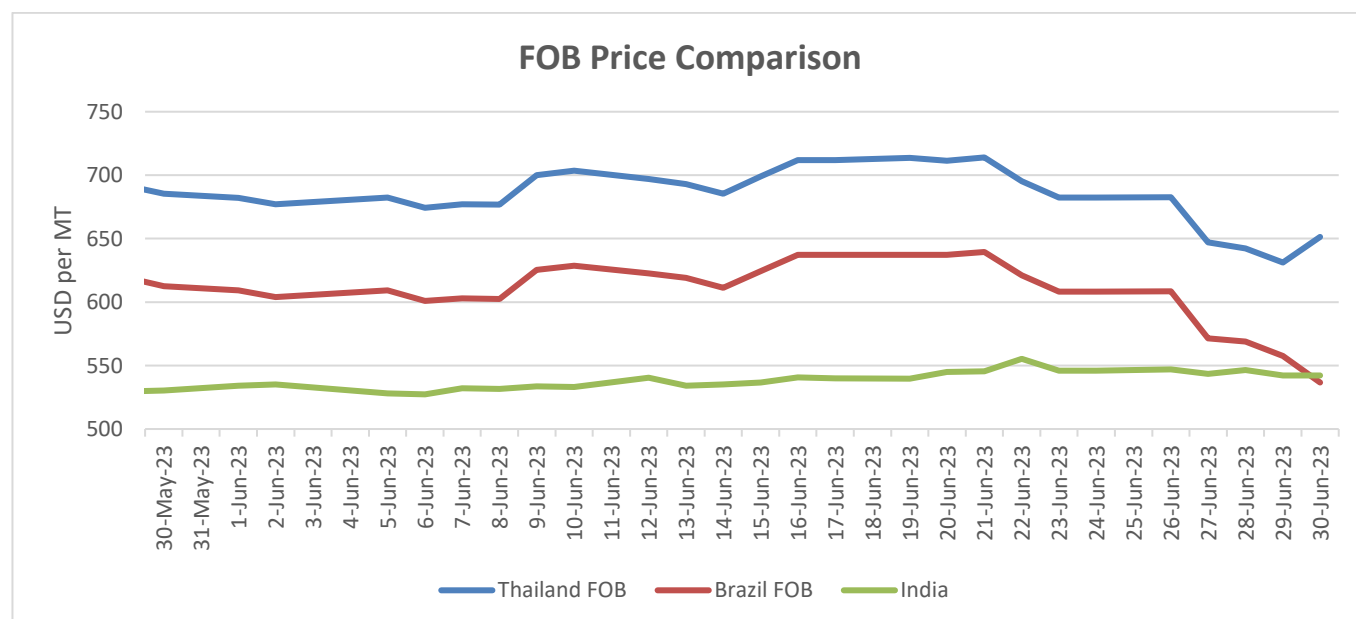

Domestic sugar prices have moved higher during Jun'2023. Domestic prices stood higher at Rs. 40,288 per tonnes in June'23 compared to Rs. 38,742 per tonnes in May'2023. The average international sugar prices have decreased around -5% in Jun'2023 to Rs. 55,197 per tonnes from Rs. 58,139 per tonnes in May 2023. Also, domestic prices are likely to trade stable in coming month as government has already released a higher sales quota during July month. International prices have come down due to increased supply.

Seasonality:

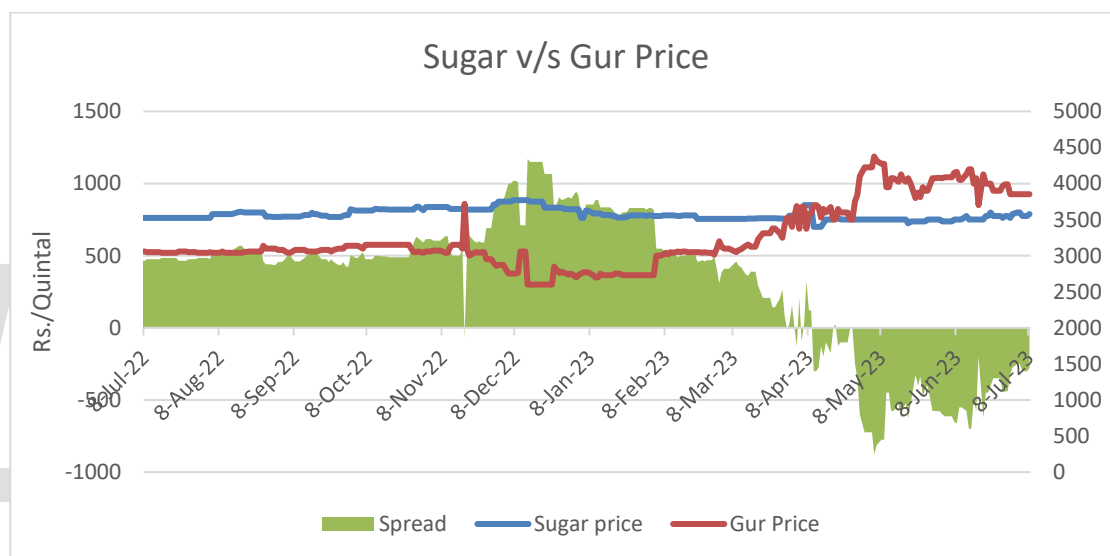

For the current 2022-23 season, sugar prices moved against the seasonality trend. Sugar prices continued to trade higher during Oct-Nov period as the harvesting was delayed and stocks were lower in the market. Between Dec-Mar prices continue to fall as sugarcane crushing entered its peak months and tapering of demand after the culmination of festive season pressurizing the market. But during the past Apr- May month prices traded higher as the supply remains tight due to expectation of lower production.

FOB Price Comparison:

Sugar FOB prices were lower in Brazil during the past month as crushing has begun for the 2023-24 season. Despite lower prices, India is not able to export sugar during the 2022-23 season as to maintain the domestic supply and demand. Whereas, in Thailand an uptrend was observed during the previous month as demand remains higher along with limited supply.
