Domestic Market Highlights

Recent Updates:

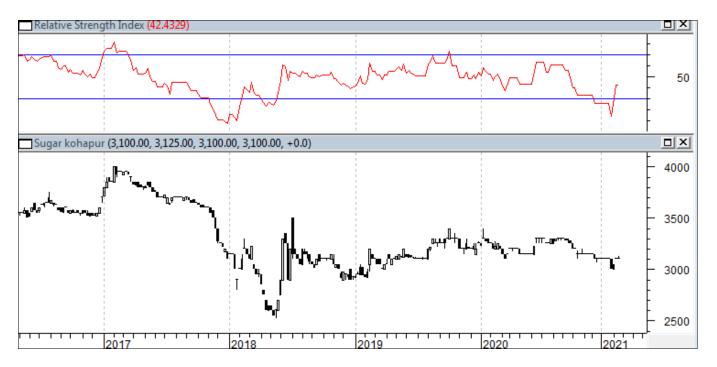

• Sugarcane SAP remains unchanged in Uttar Pradesh. State Advisory Price for sugarcane has remained the same in Uttar Pradesh again. The farmers were expecting a hike this year in sugarcane prices but the government has made no such changes. The rates of three different varieties of sugarcane have remained unchanged at Rs 315 per quintal for common variety, Rs 325 for early variety and Rs 310 for rejected varieties.

Previous Updates

- Sugar Production has decreased in Uttar Pradesh this year. Sugar mills in Uttar Pradesh have produced 63 lakh tonnes of sugar after crushing 611 lakh tonnes of sugarcane till 15th February '21. The mills during the same period last year had produced 64 lakh tonnes of sugar by crushing 584 lakh tonnes of sugarcane. The sugarcane recovery reported this season is 10.29 % as against 10.96% last season.
- Kolhapur region has recorded 12 percent sugar recovery rate. About 37 sugar mills are operating in the Kolhapur division in the current crushing season. Around 183 sugar mills have participated in the cane crushing operation in Maharashtra and have produced 724 lakh quintal of sugar by crushing 717 lakh tonne sugarcane. Although, Solapur division is leading in the state with a maximum of 41 sugar mills operating in the current season.
- Sugarcane farmers from Kendrapara are switching to other crops. The sugarcane cultivators from Kendrapara district are switching from sugarcane cultivation as the sugar mills in the district have been closed. This has led to a decline in cultivation area in the region. The area under cane cultivation has been also been reduced to 5000 hectares. Marsaghai, Pattamundai, Rajkanika, Mahakalapada, Garadapur, Aul and Derabishi are the blocks where cash crop was grown in the region.
- India's sugar exports are likely to decrease more than 24 percent in the current season till September 2020-21 due to the logistical constraints such as shortage of containers and congestion at the country's ports. Also, Brazil is likely to export 4.3 million tonnes during 2020-21 season against 5.7 million tonnes shipped in previous year.
- Shortages of shipping containers have affected sugar export from India. The shortage of shipping containers has affected the white sugar export on a large scale. The trade imbalance between US and China has affected the availability of containers globally, including in India. Hence, even as the sugar demand continues to increase from Afghanistan, Sri Lanka and East Africa, movement of sugar our of India remains slow due to lack of containers. The government has fixed the target of exporting 60 lakh tonnes of sugar in the current sugar season According to Indian Sugar mills Association, 7 lakh tonnes of sugar has been exported from October 2020 to January 2021. This includes the exports allocated for the year 2019-20 against the Maximum Admissible Export Quota (MAEQ) that was extended till December 2020. About 4 lakh tonnes had been exported under current year's export policy. India has also signed 25 lakh tonnes of sugar export contracts so far.
