

Domestic Market Highlights**Recent Updates:**

The National Federation of Cooperative Sugar Factories Limited has estimated lower sugar production by 14.73% during October 2022-23 season. Sugar mills in India had produced 4.05 lakh tonne in October 2022-23 as against 4.75 lakh tonnes during the same period previous season.

The sugarcane crushing has begun in the states of Maharashtra and Karnataka as the rains has completely withdrawn. The sugarcane crushing operations in Uttar Pradesh & rest of the cane growing states is likely to pick up in a week's time. It is forecasted that the sugarcane crushing season might be extended till the month of May or even few days of June in some states where sugarcane area and sugarcane productivity both are projected to be increased due to prolonged rain earlier in major growing areas of the country. The State-Wise sugar production is estimated as below:

State-wise Sugar Production estimate 2022-23 season						
State	Mills in Operation		Average Sugar Recovery (%)		Estimated Sugar Production	Actual Sugar Production
	2022-23	2021-22	2022-23	2021-22	2022-23	2021-22
Uttar Pradesh	6	8	-	-	104	102
Maharashtra	78	85	6.3	7	137	137.35
Karnataka	40	51	7	7	60	61.5
Tamil Nadu	10	4	8.9	8.7	14	12.65
All India	134	160	7.01	7.07	360	359.25

Sugar Exports:

Government of India has released sugar export policy for the 2022-23 season. As per GOI, to prevent uncontrolled export of sugar and with a view to ensure sufficient availability of sugar for domestic consumption at a reasonable price, GOI has decided to allow export of sugar up to a reasonable limit w.e.f 01.11.2022 to 31.10.2023.

- All grades of sugar i.e. raw, white as well as refined sugar can be exported by a sugar mill / refinery / exporter up to the extent of 60 LMT allocated.
- All the sugar mills have been allocated a uniform export quota of 18.23% of their 3 years average production of sugar in the operational sugar season.
- The new sugar mills which may commence sugar production for the first time during the sugar season 2022-23 or the mills which were closed in previous three season but restart in season 2022-23 or the mills who have not been allocated quota will be allocated export quota of 18.23% of their estimated sugar production in sugar season 2022-23.

According to the Directorate General of Foreign trade, the department has extended restrictions on sugar export for one year up to 2023. The Central government extends the date of 'Restriction' on export of sugar (Raw sugar, Refined sugar, and White sugar) under HS codes 1701 14 90 and 1701 99 90 beyond 31st October, 2022 till 31st October, 2023, or until further orders, whichever is earlier. This restriction is not applicable to sugar being exported to EU and USA under CXL and TRQ quota. The other conditions will remain unchanged.

Earlier, to maintain the domestic availability and price stability of sugar, the government brought restrictions on sugar exports with effect from 1st June, 2022 till 31st October, 2022. Government shall allocate quota to the mills for export. As per market sources, India has contracted around 2.3 million tonnes of sugar of new crop prior to announcement of quota. India is expected to produce record sugar crop this year, which could allow exports of up to 8 million tonnes in the 2022-23 season. AgriWatch expects sugar exports of around 7.5 million tonnes in the 2022-23 season.

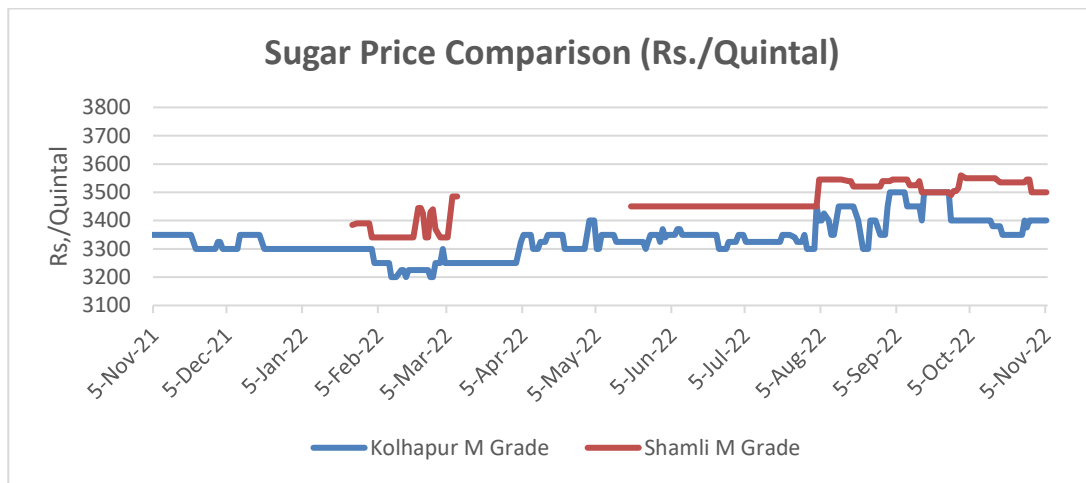

Price Outlook:

- The average sugar prices were slightly lower at Rs. 3,543 per quintal during the past week from Rs.3,516 per quintal in Delhi market. Whereas, sugar prices in Maharashtra were higher at Rs.3350 per quintal.

Price Projection for the Next week

The average prices for Sugar 'M' grade in key Kolhapur market remained stable at Rs.3400 per quintal during the week under review. Sugar prices in Kolhapur market are further likely to range between Rs.

3450- Rs. 3550 per quintal in the coming week. In the Shamli market prices were slightly lower during the last week at Rs. 3550 per quintal.

Ethanol:

The Cabinet Committee of Economic Affairs, has approved higher ethanol price derived from different sugarcane based raw materials under the Ethanol Blending Program for the 2022-23 season and Ethanol Supply Year (ESY) 2022-23 From 01st December 2022 to 31st October 2023. The Government has also advanced the target of 20% ethanol blending in petrol from 2030 to ESY 2025-26.

Raw Material	Ethanol Procurement Price (Rs./liter)				
	2018-19	2019-20	2020-21	2021-22	2022-23
C-heavy molasses	43.46	43.75	45.69	46.66	49.41
B-heavy molasses	52.43	54.27	57.61	59.08	60.73
Sugarcane juice/Syrup	59.19	59.48	62.65	63.45	65.61
Damaged food grain	47.13	50.36	51.55	-	
Surplus rice issued by FCI	-	-	56.87	-	
Maize	-	-	51.55	-	

The highest price was for ethanol manufactured from juice or sugar syrup while the one manufactured from C molasses was lowest price. This was done to incentivize the production of ethanol and reduce production of sugar by mills. During the 2022-23 ethanol supply year, India is expected to achieve 12% ethanol blending. Sugar Mills are expected to divert about 45 lakh tonnes of sugar towards ethanol production.

According to the National Federation of Cooperative Sugar Factories Limited, Overall sugarcane production in India is estimated to be 3600 Lakh Tonne and is projected to produce 410 Lakh Tonne of sugar. Out of this 50 Lakh Tonne is expected to be subsumed in Ethanol production, while 270 Lakh Tonne will be consumed domestically. The opening stock is estimated at 55 Lakh Tonne and exports at 85 Lakh Tonne, the estimated closing stock as of 30th September 2023 is likely to be 60 Lakh Tonne would be sufficient to meet 2.5-3 month's domestic consumptions.

International Market Highlights

Sugar Consumption in China is expected to decline in the 2022-23 season. The Consumption in China is expected to be lower than 15 million tonnes in the 2022-23 season mainly due to severe restrictions because of the pandemic, the sale of candy, cakes and sweetened beverages has also fallen. As per the market sources, the imports of raw sugar by refineries in China have fallen to the lowest level since 2019 and are projected to be at 4.47 million tonnes in 2022. The imports are likely to lower further in 2023 at 4 million tonnes as the stocks remain higher.

Sugar Production from Center south region of Brazil is set to recover to 36 million tonnes from previous estimate of 33 million tonnes in 2022-23 season. The sugar will hit the global market by May 2023, the freight rates have also fallen which will further help in higher exports from Brazil.

Thailand Sugar Balance Sheet (Nov-May)				
Season	Sugar Production	Exports	Domestic Consumption	Ending Stock
2020-21	75.87	37.39	235.0	9.06
2021-22	102.30	100.00	242.0	6.87
2022-23*	105.00	110.00	252.0	3.85

Brazil Sugar Balance Sheet (Apr-Mar)				
Season	Sugar Production	Exports	Domestic Consumption	Ending Stock
2020-21	420.5	321.5	101.5	3.40
2021-22	353.5	256.5	98	2.40
2022-23*	363.7	266.2	98	1.90

Source: USDA; Unit: Lakh Tonnes

The Center south region of Brazil is set to recover its sugar production to 36 million tonnes from previous estimate of 33 million tonnes in 2022-23 season. The sugar will hit the global market by May 2023, the freight rates have also fallen which will further help in higher exports from Brazil.

Both Thailand and India's sugar production is expected to increase in the 2022-23 season. Sugar production may increase to 10.5- 11 million tonnes in the 2022-23 season. India's sugar production is expected to increase to 36 million tonnes as compared to 30 million tonnes in 2021-22 season.
