The National Federation of Cooperative Sugar Factories (NFCSF) has estimated sugar production at 160 lakh tonnes sugar till 15th January 23 across India which is about 10 lakh tonne higher than the corresponding date of last year. However, the average sugar recovery is decreased by 0.14% as compared to the last year's average recovery of 9.64%.

As per the NFCSF's estimate, the 2022-23 sugar season will be over by the end of April and the sugar production is estimated at 343 lakh tonnes which is expected to be lower by 16 lakh tonnes compared to last year's 359 lakh tonne.

Apart from this, around 45 lakh tonnes of sugar will be diverted to ethanol production. Thus this year, the gross total sugar production will be around 390 lakh tonne.

Sugar Exports:

As per the market sources, the government may take a decision in the coming February month for increasing the sugar export quota from the current 60 lakh tonne. In the current marketing year so far, the mills have dispatched 30 lakh tonnes of sugar for exports and out of that 18 lakh tonnes have already been shipped. As per the food ministry, the entire 60 lakh tonnes will get exported by May. The government is currently assessing the supply and demand estimate in the domestic market along with the actual sugar production.

As per the All-India Sugar Traders Association, sugar exporters, including mills have almost exhausted the 6 million tonne of export quota allocated by the Centre for the current 2022-23 sugar season. Almost all the deals signed till 31st December 22 will be exported by 31st March'22. Also, Iran and Indonesia have emerged as the biggest buyers of Indian sugar this season.

India has exported around 1.692 million tonne of sugar till 4th January 2023, including 59,596 tonne to china. About 147,000 tonnes of sugar was exported to Bangladesh and around 82,462 tonne to Sri Lanka.

International Market Highlights

China sugar production is likely to be lower in the 2022-23 season at 9.6-10 million tonne. During the previous 2021-22 season sugar production was around 9.56 million tonne. As per the market sources, the sugar production is expected to be lower mainly due to high beet prices in the 2022-23 season. Also, the domestic consumption is estimated at around 15 million tonne which is comparatively lower than the production.

The red rot disease was detected in the Sugarcane crop of Parsa and Bara region of Nepal. Farmers are planning for a early harvest of the crop to prevent infection from the crop. Also, the farmers are selling crops on the prices which mills are offering as the government has not yet announced the minimum support price for sugarcane.

Jaggery:

As per AgriWatch sources, Jaggery-making units in Uttar Pradesh are working on a lower scale as winter season will end in coming 1-2 months, along with it there is enough stock available in the market.

The Karnataka government is planning to provide an industry tag on jaggery. Consumption of jaggery is likely to increase as the focus on sustainable lifestyle increased. India is the biggest exporter of jaggery and Karnataka is the third largest cane producer which can give an advantage to the state to increase jaggery production.
