International Market Highlights

- Sugar prices in the global market are likely to remain higher around 19-22 US cents a pound for raws (RS 33.075-40.375 a tonne) due to lower production of the commodity in India and the European Union.
- According to the trade sources, the situation would remain the same despite an increase in sugar production in Brazil and Thailand.

- Sugar export from Thailand is expected to increase by 17% to 9 million tonnes in the 2022/23 production year compared to the last season. Thailand is expecting to produce 11.5 million tonnes of sugar by crushing 106 million tonnes of cane by the end of this season. Sugar output in Thailand was 10.15 million tonnes in 2021/22. The increase in global prices and sufficient rainfall has boosted the sugarcane production in the country. The sugar mills had crushed 92.07 million tonnes of cane and had exported 7.69 million tonnes of sugar. The domestic consumption of sugar is around 2.5 million tonnes in the country.
- Sugar production in Brazil is expected to increase by 7.6% to 38.1 million tonnes (mt) this season. Fitch Solutions Country Risk and Industry Research states that sugar prices would continue to remain higher over a lower supply of sugar in various parts of the globe. Sugar supply from the new crop might disappoint as the sugar stocks are low at present.

Jaggery:

As per AgriWatch sources, Jaggery-making units in Uttar Pradesh are working on a lower scale as winter season will end in coming 1-2 months, along with it there is enough stock available in the market.

The Karnataka government is planning to provide an industry tag on jaggery. Consumption of jaggery is likely to increase as the focus on sustainable lifestyle increased. India is the biggest exporter of jaggery and Karnataka is the third largest cane producer which can give an advantage to the state to increase jaggery production.
