

Domestic Market Highlights**Recent Updates:**

- Maharashtra sugar production is expected to decline in the 2022-23 season. The adverse climatic conditions have impacted sugarcane production in Maharashtra during the ongoing season. Early flowering during the season has largely impacted the sugar yield which has resulted in lower production.
- Sugar production is estimated at 124 lakh tonnes in the 2022-23 season for Maharashtra, lower from the previous crop of 137.28 lakh tonne during the 2021-22 season. AgriWatch estimates sugar production across India for the 2022-23 season at 345 lakh tonne against 356 lakh tonne in the 2021-22 season.
- The sugarcane crushing season is expected to get over by March end in Sangli, Satara and Kolhapur districts whereas in Marathwada it will end by April.
- According to the UP-Sugar Mills Association, sugar mills across the state have cleared around 45% of the cane dues for the ongoing 2022-23 crushing season. Out of the Rs. 1740.28 lakh of cane dues, sugar mills have cleared about Rs. 789.39 lakh.
- However, the government has not increased the State Advised Price (SAP) for the 2022-23 season as the mills are already burdened with the pressure of less revenue recovery due to the low cost of sugar in the open market. The government is currently focusing on timely cane payments to farmers rather than hiking SAP.

AW Production Estimates

S.No.	State	No. of Working Factories		Net estimated Sugar Production (without Diversion) (Lakh Tonne)		Estimated Sugar Diversion into ethanol upto 15 th February (Lakh Tonne)		Actual Sugar Production (after Diversion) (Lakh Tonne)

*Others include -Tamil Nādu, Gujarat, A.P., Telangana, Bihar, Punjab, Haryana, Rajasthan, M.P., Chhattisgarh, Uttarakhand & Odisha

As per govt. 2nd Adv. estimates, the total sugarcane production in the country for the 2022-23 season will reach a record high of 4687.89 lakh tonne, representing an increase of 293.64 lakh tonne from previous year production of 4394.25 lakh tonne.

Sugar Exports:

- With the lower sugar production expectation government is not likely to allow sugar exports further. As per National Sugar Federation Sugar production for the 2022-23 season is likely to be lower by 7% at 335 lakh tonne against previous season 359 lakh tonne. The lower sugarcane yield from Maharashtra and Karnataka has resulted in lower sugar production and poor recovery.
- Also, the lower sugar output will not lead to a spike in domestic prices this year as the demand for sugar is around 27 MMT per year.
- Over 35 lakh tonnes (LT) sugar have been dispatched by sugar mills to ports and refineries in special economic zones (SEZs) for exports in the current season (October 2022-September 2023).
- According to the All-India Sugar Traders Association (AISTA), 27.83 LT of sugar have been physically exported out of the 35.87 LT dispatched by the mills.

- While 3.7 LT have been delivered to refineries in SEZs, considered as deemed exports and the remaining 4.24 LT is either being loaded or waiting to be loaded onto vessels.
- Bangladesh and Indonesia are the top buyers of Indian sugar purchasing 2.70 LT and 2.61 LT, respectively. Djibouti has imported 2.47 LT of Indian sugar, while Somalia has bought 2.46 LT. The United Arab Emirates follows next purchasing 2.06 LT, Sudan has bought 1.66 LT and Saudi Arabia 1.65 lt. Malaysia, Sri Lanka, China (1.12 LT), Iraq, Afghanistan and Cameroon are other significant importers of Indian sugar.

Price Outlook:

The average sugar prices were slightly down at Rs. 3,404 per quintal during the past week from Rs.3,423 per quintal in Delhi market. Whereas, sugar prices in Maharashtra remained lower at Rs.3275 per quintal during the week under review from Rs. 3285 per quintal. Shamli market too witnessed a stable trend at Rs. 3460 per quintal during the past week.

Price Projection for the Next week

Average prices for Sugar 'M' grade in key Kolhapur market shows a stable trend and are likely to range between Rs. 3250- Rs. 3450 per quintal in the coming week. Good demand will keep supporting the prices.

International Market Highlights

- International Sugar Organization has revised the sugar production estimated to rise from 172.52 million tonne to 180.43 million tonne for the 2022-23 season. Meanwhile, consumption is projected to rise to 176.280 million tonne, up from 174.773 million tonnes last season. The projected trade balance has a surplus of 0.404 million tonne in 2022-23 season and 0.765 million tonnes in 2021-22 season.

- ISO's fundamental view has changed from neutral-to-bearish to neutral for the next three months. In mid-January, raw sugar prices rose sharply supported by speculators re-establishing long positions. Meanwhile, the market continues to face a futures board in backwardation.

**ICE (Raw Sugar Exchange) Future Market Scenario (Mar'23 Contract)****Technical Commentary:**

As depicted in the above chart, market was showing a mostly bearish trend during the past week. However, prices have taken support but again corrected. Prices have broken to more than 75% Fibonacci retracement level. Overall market is further expected to trade bearish in the coming week.

International Sugar Futures Price Projection

	Contract Month	Present Quote	The expected Price level for next week
ICE Sugar #11 (US Cent/lb)	Mar'23	21.26	21.28-21.50

Jaggery:

The Jaggery arrivals in Anakapalle have declined by around 30-40% in the 2022-23 season as compared to the previous season. About 6,000-8,000 jaggery lumps are arriving per day against the previous season of 10,000-14,000. The major reason behind the lower arrivals is lower production as farmers have switched to other crops from Anakapalle and Vizianagaram districts.

GST Council has reduced tax on liquid jaggery, GST rate has been reduced between nil to 5 per cent. If jaggery is sold loose, it will be nil and in case of pre-packaged and labelled jaggery, it will be 5 percent.

As per AgriWatch sources, Jaggery-making units in Uttar Pradesh are working on a lower scale as winter season is almost over, along with it there is enough stock available in the market.

Jaggery Price at Muzaffarnagar Benchmark Market (Rs./Quintal)

Forecast Date	Past Week	Coming week
25-Feb-23	2888	2650-3020

Ethanol:

World ethanol production in 2022 is estimated to have reached 109.4 billion liters, up from 104.6 billion liters in 2021. For 2023, ethanol output is expected to recover further, reaching 111.8 billion liters. Meanwhile ethanol consumption is expected to be at 104.2 billion liters in 2022, revised lower from 104.5 billion liters. Consumption in 2023 is expected to rise to 106.9 billion liters, driven by increases in India.

Ethanol production in Uttar Pradesh is likely to cross the 135 crore liters mark during the ongoing fiscal as more distilleries are engaged in producing ethanol in the last year. The distilleries in the state have produced 97 crore liters of ethanol during the 2021-22 fiscal.
