International Market Highlights

- As per UNICA, In the 2023-24 season center-south regions of Brazil are expected to crush record sugarcane. Usually, sugar season in Brazil starts in April but the mills have started processing earlier as they are expecting a bumper crop this season. In the first half of March, around 24 mills have already started operations, and they have crushed about 608,000 tonnes of cane against 142,000 tonnes last year.
- In the second half of March, around 36 mills will start operations as per the group's projection taking the total number of operating mills to 60 as against 25 during the same period last year.
- Sugar prices in Bangladesh have maintained an upward trend at both wholesale and retail level despite a reduction in import duty. After the reduction, the overall import cost of raw and refined sugar is expected to decline by Tk 6,500 and Tk 9,000 per tonne at the import stage, respectively. But despite that, the price of sugar remained higher, the price increase came amid continued supply shortage and a spike in demand due to Ramadan.
